**Consumer Expenditure Survey**—The Consumer Expenditure Survey program was begun in late 1979. The principal objective of the survey is to collect current consumer expenditure data which provide a continuous flow of data on the

buying habits of American consumers. The data are necessary for future revisions of the Consumer Price Index.

The survey conducted by the Census Bureau for the Bureau of Labor Statistics consists of two components: (1) An interview panel survey in which the expenditures of consumer units are obtained in five interviews conducted every 3 months, and (2) a diary or recordkeeping survey completed by participating households for two consecutive 1-week periods.

Each component of the survey queries an independent sample of consumer units representative of the U.S. total population.

Over 52 weeks of the year, 5,000 consumer units are sampled for the diary survey. Each consumer unit keeps a diary for two 1-week periods yielding approximately 10,000 diaries a year. The interview sample is selected on a rotating panel basis, targeted at 5,000 consumer units per quarter. Data are collected in 88 urban and 16 rural areas of the country that are representative of the U.S. total population. The survey includes students in student housing. Data from the two surveys are combined; integration is necessary to permit analysis of total family expenditures because neither the diary nor quarterly interview survey was designed to collect a complete account of consumer spending.

**Distribution of money income to families and individuals**—Money income statistics are based on data collected in various field surveys of income conducted since 1936. Since 1947, the Census Bureau has collected the data on an annual basis and published them in *Current Population Reports*, P60 Series. In each of the surveys, field representatives interview samples of the population with respect to income received during the previous year. Money income as defined by the Census Bureau differs from the BEA concept of “personal income.”

Data on consumer income collected in the CPS by the Census Bureau cover money income received (exclusive of certain money receipts such as capital gains)

before payments for personal income taxes, social security, union dues, medical care deductions, etc. Therefore, money income does not reflect the fact that some families receive part of their income in the form of noncash benefits (see Section 12) such as food stamps, health benefits, and subsidized housing; that some farm families receive noncash benefits in the form of rent-free housing and goods produced and consumed on the farm; or that noncash benefits are also received by some nonfarm residents which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. For data on noncash benefits, see Section 12. None of the aggregate income concepts (GDP, national income, or personal income) is exactly comparable with money income, although personal income is the closest.

In October 1983, the Census Bureau began to collect data under the new Survey of Income and Program Participation (SIPP). The information supplied by this survey is expected to provide better measures of the status and changes in income distribution and poverty of households and persons in the United States. The data collected in SIPP will be used to study federal and state aid programs (such as food stamps, welfare, medicaid, and subsidized housing), to estimate program costs and coverage, and to assess the effects of proposed changes in program eligibility rules or benefit levels. The core questions are repeated at each interview and cover labor force activity, the types and amounts of income received, and participation status in various programs. The core also contains questions covering attendance in postsecondary schools and private health insurance coverage. Various supplements or topical modules covering areas such as educational attainment, assets and liabilities, and pension plan coverage are periodically included.

**Poverty**—Families and unrelated individuals are classified as being above or below the poverty level using the poverty index originated at the Social Security Administration in 1964 and revised by Federal Interagency Committees in 1969 and 1980.

The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits such as food stamps, medicaid, and public housing. The index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the different consumption requirements of families based on their size and composition. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index. The following technical changes to the thresholds were made in 1981: (1) distinctions based on sex of householder have been eliminated, (2) separate thresholds for farm families have been dropped, and (3) the matrix has been expanded to families of nine or more persons from the old cut-off of seven or more persons. These changes have been incorporated in the calculation of poverty data beginning with 1981. In the recent past, the Census Bureau has published a number of technical papers that presented experimental

poverty estimates based on income definitions that counted the value of selected government noncash benefits. The Census Bureau has also published annual reports on after-tax income (see Tables 664 and 665). The annual income and poverty reports (P60 Series) have brought together the benefit and tax data that previously appeared in the separate reports. These reports have shown the distribution of income among households and the prevalence of poverty under the official definition of money income and under definitions that add or subtract income components. In addition, in July 1999, the Census Bureau released a report (P60-205) that showed the effect of using experimental poverty following the recommendations of a National Academy of Sciences panel on redefining our nation's poverty measure.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Census Bureau data, see Appendix III.

No. 631. Gross Domestic Product in Current and Real (1996) Dollars: 1960 to 2001

[In billions of dollars (527.4 represents \$27,400,000,000). For explanation of gross domestic product and chained dollars, see text, this section]

No. 656. Median Income of Households in Constant (2000) Dollars by State: 3-Year Averages for 1990 to 2000

[Constant dollars based on the CPI-U-RS deflator. Data based on the Current Population Survey; see text, this section and Section 1 and Appendix III. The CPS is designed to collect reliable data on income primarily at the national level and secondarily at the regional level. When the income data are tabulated by state, the estimates are considered less reliable and, therefore, particular caution should be used when trying to interpret the results]

No. 673. Persons Below Poverty Level—Number and Rate by State: 1998 to 2000 Average

[32,596 represents 32,596,000 Based on the Current Population Survey; see text, see above, and Appendix III. The CPS is designed to collect reliable data on income primarily at the national level and secondarily at the regional level. When the income data are tabulated by state, the estimates are considered less reliable and, therefore, particular caution should be used when trying to interpret the results; for additional detail, see source]

State	Number below poverty level (1,000)	Percent below poverty level	State	Number below poverty level (1,000)	Percent below poverty level

No. 676. Nonfinancial Assets Held by Families by Type of Asset: 1998

[Median value in thousands of dollars. Constant dollar figures are based on consumer price index for all urban consumers published by U.S. Bureau of Labor Statistics. Families include one-person units and, as used in this table, are comparable to the U.S. Census Bureau household concept. For definition of family, see text, Section 1, Population. Based on Survey of Consumer Finance; see Appendix III. For data on financial assets, see Table 1144. For definition of median, see Guide to Tabular Presentation]

## Prices

This section presents indexes of producer and consumer prices, actual prices for selected commodities, and energy prices. The primary sources of these data are monthly publications of the Department of Labor, Bureau of Labor Statistics (BLS), which include *Monthly Labor Review*, *Consumer Price Index, Detailed Report*, *Producer Price Indexes*, and *U.S. Import and Export Price Indexes*. The Department of Commerce, Bureau of Economic Analysis is the source for gross domestic product measures.

**Producer price index (PPI)**—This index, dating from 1890, is the oldest continuous statistical series published by BLS. It is designed to measure average changes in prices received by producers of all commodities, at all stages of processing, produced in the United States.

The index has undergone several revisions (see *Monthly Labor Review*, February 1962, April 1978, and August 1988). It is now based on approximately 10,000 individual products and groups of products along with about 100,000 quotations per month. Indexes for the net output of manufacturing and mining industries have been added in recent years. Prices used in constructing the index are collected from sellers and generally apply to the first significant large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price or the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value of commodities produced or processed in this country. Values are f.o.b. (free on board) production point and are exclusive of excise taxes. Effective with the release of data for January 1988, many important producer price indexes were changed to a new reference base year, 1982=100, from 1967=100. The reference year of the PPI shipment weights has been taken

primarily from the 1987 Census of Manufactures. For further detail regarding the PPI, see the BLS *Handbook of Methods*, Bulletin 2490 (April 1997), Chapter 16. The PPI Web page is <<http://stats.bls.gov/ppihome.htm>>.

**Consumer price indexes (CPI)**—The CPI is a measure of the average change in prices over time in a "market basket" of goods and services purchased either by urban wage earners and clerical workers or by all urban consumers. In 1919, BLS began to publish complete indexes at semiannual intervals, using a weighting structure based on data collected in the expenditure survey of wage-earner and clerical-worker families in 1917-19 (BLS Bulletin 357, 1924). The first major revision of the CPI occurred in 1940, with subsequent revisions in 1953, 1964, 1978, 1987, and 1998.

Beginning with the release of data for January 1988 in February 1988, most consumer price indexes shifted to a new reference base year. All indexes previously expressed on a base of 1967=100, or any other base through December 1981, have been rebased to 1982-84= 100. The expenditure weights are based upon data tabulated from the Consumer Expenditure Surveys for 1993, 1994, and 1995.

BLS publishes CPIs for two population groups: (1) a CPI for all urban consumers (CPI-U) which covers approximately 80 percent of the total population; and (2) a CPI for urban wage earners and clerical workers (CPI-W) which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers; the self-employed; short-term workers; the unemployed; and retirees and others not in the labor force.

The current CPI is based on prices of food, clothing, shelter, fuels, transportation fares, charges for doctors' and dentists' services, drugs, etc. purchased for

day-to-day living. Prices are collected in 87 areas across the country from over 50,000 housing units and 23,000 establishments. Area selection was based on the 1990 census. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected monthly in the three largest geographic areas and every other month in other areas.

In calculating the index, each item is assigned a weight to account for its relative importance in consumers' budgets. Price changes for the various items in each location are then averaged. Local data are then combined to obtain a U.S. city average. Separate indexes are also published for regions, area size-classes, cross-classifications of regions and size-classes, and for 26 local areas, usually consisting of the Metropolitan Statistical Area (MSA); see Appendix II. Area definitions are those established by the Office of Management and Budget in 1983. Definitions do not include revisions made since 1992. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period. For further detail regarding the CPI, see the BLS *Handbook of Methods*, Bulletin 2490, Chapter 17; the *Consumer Price Index*, and the CPI home page: <http://stats.bls.gov/cpihome.htm>. In January 1983, the method of measuring homeownership costs in the CPI-U was changed to a rental equivalence approach. This treatment calculates homeowner costs of shelter based on the implicit rent owners would pay to rent the homes they own. The rental equivalence approach was introduced into the CPI-W in 1985. The CPI-U was used to prepare the consumer price tables in this section.

**Other price indexes**—Chain-weighted price indexes, produced by the Bureau of Economic Analysis (BEA), are weighted averages of the detailed price indexes used in the deflation of the goods and services that make up the gross domestic product (GDP) and its major components. Growth rates are constructed for years and quarters using quantity weights for

the current and preceding year or quarter; these growth rates are used to move the index for the preceding period forward a year or quarter at a time. The gross domestic purchases chained price index measures the average price of goods and services purchased in the United States. It differs from the GDP chained price index, which measures of the average price of goods produced in the United States, by excluding net exports. All chain-weighted price indexes are expressed in terms of the reference year value 1996=100.

**Measures of inflation**—Inflation is defined as a time of generally rising prices for goods and factors of production. The Bureau of Labor Statistics samples prices of items in a representative market basket and publishes the result as the CPI. The media invariably announce the inflation rate as the percent change in the CPI from month to month. A much more meaningful indicator of inflation is the percent change from the same month of the prior year. The producer price index measures prices at the producer level only. The PPI shows the same general pattern of inflation as does the CPI but is more volatile. The PPI can be roughly viewed as a leading indicator. It often tends to foreshadow trends that later occur in the CPI.

Other measures of inflation include the gross domestic purchases chain-weighted price index, the index of industrial materials prices; the Dow Jones Commodity Spot Price Index; Futures Price Index; the Employment Cost Index, the Hourly Compensation Index, or the Unit Labor Cost Index as a measure of the change in cost of the labor factor-of production; and changes in long-term interest rates that are often used to measure changes in the cost of the capital factor of production.

**International price indexes**—The BLS International Price Program produces export and import price indexes for non-military goods traded between the United States and the rest of the world.

The export price index provides a measure of price change for all products sold by U.S. residents to foreign buyers. The import price index provides a measure of price change for goods purchased from

other countries by U.S. residents. The reference period for the indexes is 1995=100, unless otherwise indicated. The product universe for both the import and export indexes includes raw materials, agricultural products, semifinished manufactures, and finished manufactures, including both capital and consumer goods. Price data for these items are collected primarily by mail questionnaire. In nearly all cases, the data are collected directly from the exporter or importer, although in a few cases, prices are obtained from other sources.

To the extent possible, the data gathered refer to prices at the U.S. border for exports and at either the foreign border or the U.S. border for imports. For nearly all products, the prices refer to transactions completed during the first week of

the month. Survey respondents are asked to indicate all discounts, allowances, and rebates applicable to the reported prices, so that the price used in the calculation of the indexes is the actual price for which the product was bought or sold.

In addition to general indexes for U.S. exports and imports, indexes are also published for detailed product categories of exports and imports. These categories are defined according to the five-digit level of detail for the Bureau of Economic Analysis End-Use Classification, the three-digit level of detail for the Standard International Trade Classification (SITC), and the four-digit level of detail for the Harmonized System. Aggregate import indexes by country or region of origin are also available.

No. 680. Purchasing Power of the Dollar: 1950 to 2001

[Indexes: PPI, 1982=\$1.00; CPI, 1982-84=\$1.00. Producer prices prior to 1961, and consumer prices prior to 1964, exclude Alaska and Hawaii. Producer prices based on finished goods index. Obtained by dividing the average price index for the 1982=100, PPI; 1982-84=100, CPI base periods (100.0) by the price index for a given period and expressing the result in dollars and cents. Annual figures are based on average of monthly data]

No. 682. Consumer Price Indexes (CPI-U)—Selected Areas: 2001

[1982-84=100, except as indicated. Represents annual averages of monthly figures. Local area CPI indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Area definitions are those established by the Office of Management and Budget in 1983. For further detail see the U.S. Bureau of Labor Statistics Handbook of Methods, Bulletin 2285 Chapter 19 the Consumer Price Index, and Report 736, the CPI: 1987 Revision. See also text, this section]

# No. 684. Cost of Living Index—Selected Metropolitan Areas: Fourth Quarter 2001

[Measures relative price levels for consumer goods and services in participating areas for a mid-management standard of living. The nationwide average equals 100, and each index is read as a percent of the national average. The index does not measure inflation, but compares prices at a single point in time. Excludes taxes. Metropolitan areas as defined by the Office of Management and Budget. For definitions and components of MSAs, see source for details]

Metropolitan areas (MA)	Com- posite index (100%)	Grocery items (16%)	Housing (28%)	Utilities (8%)	Transpor- tation (10%)	Health care (5%)	Misc. goods and services (33%)
Anniston, AL MSA	94.5	94.4	92.9	96.6	86.8	87.8	98.9

# No. 687. Producer Price Indexes by Stage of Processing: 1990 to 2001

[1982=100, except as indicated]

Stage of processing	1990	1995	1996	1997	1998	1999	2000	2001
<b>Finished goods</b> . . . . .	119.2	127.9	131.3	131.8	130.7	133.0	138.0	140.7
<b>Finished consumer goods</b> . . . . .	118.2	125.6	129.5	130.2	128.9	132.0	138.2	141.5
<b>Finished consumer foods</b> . . . . .	124.4	129.0	133.6	134.5	134.3	135.1	137.2	141.3
Fresh fruits and melons . . . . .	118.1	85.8	100.8	99.4	90.5	103.6	91.4	97.2
Fresh and dry vegetables . . . . .	118.1	144.4	135.0	123.1	139.5	118.0	126.7	124.7
Eggs for fresh use (Dec. 1991=100) . . . . .	(NA)	86.3	105.1	97.1	90.1	77.9	84.9	81.8
Bakery products . . . . .	141.0	164.3	169.8	173.9	175.8	178.0	182.3	187.8
Milled rice . . . . .	102.5	113.1	129.4	127.3	124.9	121.3	101.2	87.5
Pasta products (June 1985=100) . . . . .	114.1	125.0	127.4	125.1	122.6	122.1	121.6	122.1
Beef and veal . . . . .	116.0	100.9	100.2	102.8	99.4	106.3	113.7	120.4
Pork . . . . .	119.8	101.5	120.9	123.1	96.6	96.0	113.4	119.9
Processed young chickens . . . . .	111.0	113.5	121.5	118.6	125.2	113.4	110.4	117.2
Processed turkeys . . . . .	107.6	104.9	105.5	101.0	95.2	94.8	98.7	99.0
Finfish and shellfish . . . . .	147.2	170.8	165.9	178.1	183.2	190.9	198.1	191.0
Dairy products . . . . .	117.2	119.7	130.4	128.1	138.2	139.2	133.7	145.3
Processed fruits and vegetables . . . . .	124.7	122.4	127.6	126.4	125.7	128.1	128.6	129.4
Confectionery and products . . . . .	140.0	160.7	166.9	168.3	168.7	170.4	170.6	171.3
Soft drinks . . . . .	122.3	133.1	134.0	133.2	134.8	137.9	144.1	148.1
Roasted coffee . . . . .	113.0	146.5	129.2	152.9	143.9	134.7	133.5	124.3
Shortening and cooking oils . . . . .	123.2	142.5	138.5	137.8	143.4	140.4	132.4	132.9
<b>Finished consumer goods excluding foods</b> . . . . .	115.3	124.0	127.6	128.2	126.4	130.5	138.4	141.4
Alcoholic beverages . . . . .	117.2	128.5	132.8	135.1	135.2	136.7	140.6	145.3
Women's apparel . . . . .	116.1	119.6	119.9	120.5	122.3	123.9	124.6	123.4
Men's and boy's apparel . . . . .	120.2	130.3	132.1	132.7	133.2	133.1	133.2	132.4
Girls', children's, and infants' apparel . . . . .	115.3	121.6	122.4	122.9	121.8	118.2	117.4	116.7
Textile house furnishings . . . . .	109.5	119.5	122.3	126.3	123.1	122.7	122.0	122.5
Footwear . . . . .	125.6	139.2	141.6	143.7	144.7	144.5	144.9	145.8
Residential electric power (Dec. 1990=100) . . . . .	(NA)	111.8	112.8	112.8	110.7	109.5	110.8	116.6
Residential gas (Dec. 1990=100) . . . . .	(NA)	104.4	110.4	116.5	114.0	114.3	135.5	158.3
Gasoline . . . . .	78.7	63.7	72.8	71.9	53.4	64.7	94.6	90.5
Fuel oil No. 2 . . . . .	73.3	56.6	69.5	64.8	48.1	56.1	93.5	84.1
Pharmaceutical preps, ethical (Prescription) . . . . .	200.8	257.0	265.4	273.5	322.9	335.0	344.4	(NA)
Pharmaceutical preps, proprietary (Overcounter) . . . . .	156.8	186.5	185.1	184.8	184.5	186.0	187.7	(NA)
Soaps and synthetic detergents . . . . .	117.7	122.9	125.2	126.4	126.1	126.3	128.2	130.6
Cosmetics and other toilet preparations . . . . .	121.6	129.0	130.2	130.6	132.9	135.4	137.4	138.6
Tires, tubes, and tread . . . . .	96.8	100.2	97.0	95.2	94.0	92.9	93.0	94.1
Sanitary papers and health products . . . . .	135.3	144.4	149.9	147.1	145.1	144.3	146.7	147.2
Newspaper circulation . . . . .	144.1	185.6	198.8	201.9	202.9	207.1	210.0	219.4
Periodical circulation . . . . .	150.3	176.6	180.6	188.1	193.8	196.9	198.9	200.9
Book publishing . . . . .	153.4	185.0	193.9	200.1	205.9	213.0	218.2	225.4
Household furniture . . . . .	125.1	141.8	144.5	146.2	148.4	150.5	152.7	154.9
Floor coverings . . . . .	119.0	123.7	126.6	128.0	128.3	127.2	129.6	130.1
Household appliances . . . . .	110.8	112.4	112.7	110.1	108.9	108.5	107.3	105.3
Home electronic equipment . . . . .	82.7	78.9	79.0	77.1	75.9	73.7	71.8	70.4
Household glassware . . . . .	132.5	153.2	157.3	161.3	162.7	163.9	166.0	169.6
Household flatware . . . . .	122.1	138.3	138.4	138.5	139.2	139.7	142.6	142.8
Lawn and garden equipment, except tractors . . . . .	123.0	130.4	132.3	132.2	131.7	132.0	132.0	132.7
Passenger cars . . . . .	118.3	134.1	135.4	133.6	131.9	131.3	132.8	132.1
Toys, games, and children's vehicles . . . . .	118.1	124.3	125.3	125.2	124.4	123.1	121.9	123.4
Sporting and athletic goods . . . . .	112.6	122.0	123.3	124.7	126.2	126.2	126.1	125.8
Tobacco products . . . . .	221.4	231.3	237.4	248.9	283.6	374.0	397.2	441.9
Mobile homes . . . . .	117.5	145.6	149.8	152.2	154.3	158.4	161.3	164.2
Jewelry, platinum, and karat gold . . . . .	122.8	127.8	129.4	129.2	128.1	127.1	127.2	128.5
Costume jewelry and novelties . . . . .	125.3	135.1	136.9	139.9	139.6	140.1	141.6	144.0
<b>Capital Equipment</b> . . . . .	122.9	136.7	138.3	138.2	137.6	137.6	138.8	139.7
Agricultural machinery and equipment . . . . .	121.7	142.9	146.8	149.0	150.4	152.1	153.7	155.7
Construction machinery and equipment . . . . .	121.6	136.7	139.8	142.2	145.2	147.2	148.6	149.1
Metal cutting machine tools . . . . .	129.8	148.0	152.6	156.0	159.9	160.7	161.9	158.8
Metal forming machine tools . . . . .	128.7	145.7	149.6	153.9	157.6	159.7	161.8	164.7
Tools, dies, jigs, fixtures, and industrial molds . . . . .	117.2	133.8	136.2	138.1	138.8	139.8	141.1	141.3
Pumps, compressors, and equipment . . . . .	119.2	139.4	143.5	146.5	149.0	151.7	154.1	157.5
Industrial material handling equipment . . . . .	115.0	125.3	127.4	129.7	131.3	132.9	134.7	136.9

See footnote at end of table.

No. 687. Producer Price Indexes by Stage of Processing: 1990 to 2001—Con.

[1982=100, except as indicated]

Stage of processing	1990	1995	1996	1997	1998	1999	2000	2001
Capital Equipment—Continued								
Electronic computers (Dec. 1990=100) . . . . .	(NA)	51.8	42.4	33.2	24.7	87.2	73.0	56.6
Textile machinery . . . . .	128.8	146.7	148.4	152.1	152.7	154.2	156.2	157.9
Paper industries machinery (June 1982=100) . . . . .	134.8	151.0	153.8	157.4	160.3	162.6	164.7	166.9
Printing trades machinery . . . . .	124.9	133.6	136.8	138.8	141.5	141.0	142.1	143.5
Transformers and power regulators . . . . .	120.9	128.9	129.7	129.5	131.0	132.6	135.8	134.3

Prepared paint . . . . .	124.8	142.1	147.2	152.1	155.0	157.4	160.8	164.5
Paint materials . . . . .	136.3	139.4	141.3	141.5	143.8	144.1	148.5	150.9
Medicinal and botanical chemicals . . . . .	102.2	128.3	128.6	133.4	135.0	142.2	146.2	141.2
Fats and oils, inedible . . . . .	88.1	126.9	133.3	132.3	116.9	88.4	70.1	77.5
Mixed fertilizers . . . . .	103.3	111.1	114.7	113.6	115.3	113.7	112.4	116.5
Nitrogenates . . . . .	92.3	129.4	130.5	132.3	108.2	94.6	118.2	142.9
Phosphates . . . . .	96.5	109.1	116.3	110.4	112.5	112.0	96.9	95.1
Other agricultural chemicals . . . . .	119.9	144.3	146.1	147.8	149.7	144.5	146.1	148.4
Plastic resins and materials . . . . .	124.1	143.5	133.1	137.3	125.6	125.8	141.6	134.9
Synthetic rubber . . . . .	111.9	126.3	122.2	119.3	117.2	113.9	119.1	122.9
Plastic construction products . . . . .	117.2	133.8	130.9	128.2	126.2	128.0	135.8	133.1
Unsupported plastic film, sheet, and shapes . . . . .	119.0	135.6	132.7	131.7	128.1	127.5	133.2	137.9
Plastic parts and components for manufacturing . . . . .	112.9	115.9	117.5	117.2	117.1	117.4	117.3	116.8
Softwood lumber . . . . .	123.8	178.5	189.5	206.5	182.4	196.0	178.6	170.0
Hardwood lumber . . . . .	131.0	167.0	163.9	174.1	178.7	177.3	185.9	181.1
Millwork . . . . .	130.4	163.8	166.6	170.9	171.1	174.7	176.4	179.1
Plywood . . . . .	114.2	165.3	156.4	159.3	157.6	176.4	157.6	154.1
Woodpile . . . . .	151.3	183.2	133.1	128.6	122.0	119.7	145.3	125.6
Paper . . . . .	128.8	159.0	149.4	143.9	146.0	141.8	149.8	150.7
Paperboard . . . . .	135.7	183.1	155.1	144.4	151.7	153.2	176.7	171.9
Paper boxes and containers . . . . .	129.9	163.8	153.9	144.7	154.7	158.0	172.6	175.2
Building paper and board . . . . .	112.2	144.9	137.2	129.6	132.8	141.6	138.8	128.9

See footnotes at end of table.

# No. 687. Producer Price Indexes by Stage of Processing: 1990 to 2001—Con.

[1982=100, except as indicated]

Stage of processing	1990	1995	1996	1997	1998	1999	2000	2001
<b>Intermediate materials less foods and feeds—Continued</b>								
Commercial printing (June 1982=100) . . . . .	128.0	144.5	148.3	148.7	152.1	152.2	155.2	157.6
Foundry and forge shop products . . . . .	117.2	129.3	132.6	134.1	135.0	135.1	136.5	137.0
Steel mill products . . . . .	112.1	120.1	115.6	116.4	113.9	105.3	108.4	101.3
Primary nonferrous metals . . . . .	133.4	146.8	126.2	126.2	106.7	101.5	113.6	105.4
Aluminum mill shapes . . . . .	127.9	160.4	144.8	147.5	142.1	138.1	149.0	148.5
Copper and brass mill shapes . . . . .	174.6	195.2	179.0	177.3	153.4	151.2	162.3	155.4
Nonferrous wire and cable . . . . .	142.6	151.5	147.5	148.1	140.9	135.6	143.7	140.6
Metal containers . . . . .	114.0	117.2	110.0	108.1	108.7	106.4	106.8	106.2
Hardware . . . . .	125.9	141.1	143.8	145.6	147.0	148.7	151.2	154.4
Plumbing fixtures and brass fittings . . . . .	144.3	166.0	171.1	174.5	175.1	176.7	180.4	180.7
Heating equipment . . . . .	131.6	147.5	151.2	152.4	153.2	154.0	155.6	157.1
Fabricated structural metal products . . . . .	121.8	135.1	137.8	140.3	142.5	143.3	144.9	144.6
Fabricated ferrous wire products (June 1982=100) . . . . .	114.6	125.7	126.8	128.0	130.1	130.6	130.0	129.8
Other miscellaneous metal products . . . . .	120.7	124.9	125.7	126.2	126.2	125.5	126.0	127.0
Mechanical power transmission equipment . . . . .	125.3	146.9	151.5	154.8	157.7	161.1	163.9	167.1
Air conditioning and refrigeration equipment . . . . .	122.1	130.2	132.7	132.6	134.6	135.5	135.3	136.0
Metal valves, excluding fluid power (Dec. 1982=100) . . . . .	125.3	145.3	149.8	153.3	156.6	160.2	162.1	164.6
Ball and roller bearings . . . . .	130.6	152.0	157.8	162.9	165.2	166.8	168.8	169.5
Wiring devices . . . . .	132.2	147.2	151.2	154.0	154.2	152.5	152.9	153.7
Motors, generators, motor generator sets . . . . .	132.9	143.9	145.6	144.7	145.8	145.9	146.2	146.9
Switchgear and switchboard equipment . . . . .	124.4	140.3	142.6	145.6	148.3	151.0	153.0	156.8
Electronic components and accessories . . . . .	118.4	113.6	108.9	104.0	100.1	98.2	97.1	93.9
Internal combustion engines . . . . .	120.2	135.6	138.8	140.1	140.7	143.0	143.8	143.9
Machine shop products . . . . .	124.3	131.3	133.6	135.2	136.3	136.8	138.0	140.2
Flat glass . . . . .	107.5	113.2	110.0	108.4	107.2	106.4	109.7	112.0
Cement . . . . .	103.7	128.1	134.0	139.4	145.7	150.6	150.1	150.2
Concrete products . . . . .	113.5	129.4	133.2	136.0	140.1	143.7	147.8	151.7
Asphalt felts and coatings . . . . .	97.1	100.0	100.0	99.9	99.6	99.2	104.1	107.5
Gypsum products . . . . .	105.2	154.5	154.0	170.8	177.2	208.0	201.4	156.1
Glass containers . . . . .	120.4	130.5	129.1	125.7	125.9	125.9	127.4	132.8
Motor vehicle parts . . . . .	111.2	116.0	116.2	115.4	114.6	114.0	113.6	113.1
Aircraft engines and engine parts (Dec. 1985=100) . . . . .	113.5	132.8	134.7	135.7	136.9	138.5	141.0	145.2
Aircraft parts and auxiliary equipment, n.e.c. (June 1985=100) . . . . .	117.7	135.7	139.3	141.3	142.6	143.7	145.7	147.8
Photographic supplies . . . . .	127.6	126.8	129.8	130.0	128.9	128.3	125.2	128.5
Medical/surgical/personal aid devices . . . . .	127.3	141.3	143.1	143.1	143.3	144.6	146.0	148.3
<b>Crude materials for further processing . . . . .</b>								
Crude foodstuffs and feedstuffs . . . . .	113.1	105.8	121.5	112.2	103.8	98.7	100.2	106.2
Wheat . . . . .	87.6	118.6	136.6	108.2	87.8	79.5	80.3	85.5
Corn . . . . .	100.9	109.0	158.5	110.1	91.7	78.2	76.4	78.8
Slaughter cattle . . . . .	122.5	99.5	95.8	97.9	92.5	97.6	104.1	108.4
Slaughter hogs . . . . .	94.1	70.2	88.6	87.0	52.2	53.8	72.7	73.4
Slaughter broilers/fryers . . . . .	119.5	129.1	148.0	137.2	151.8	134.5	127.6	138.4
Slaughter turkeys . . . . .	116.9	120.3	121.5	112.9	110.4	120.0	120.7	110.3
Fluid milk . . . . .	100.8	93.6	107.9	97.5	112.6	106.3	92.0	112.0
Soybeans . . . . .	100.8	102.2	127.9	131.0	103.4	80.1	83.4	78.6
Cane sugar, raw . . . . .	119.2	119.7	118.6	116.8	117.2	113.7	101.8	111.3
Crude nonfood materials . . . . .	101.5	96.8	104.5	106.4	88.3	94.3	130.4	127.3
Raw cotton . . . . .	118.2	156.2	130.0	116.5	111.0	87.4	95.2	67.2
Leaf tobacco . . . . .	95.8	102.5	105.1	(NA)	104.6	101.6	(NA)	105.2
Cattle hides . . . . .	217.8	209.9	186.5	196.1	153.3	141.9	169.4	(NA)
Coal . . . . .	97.5	95.0	94.5	96.3	93.1	90.7	87.9	96.2
Natural gas . . . . .	80.4	66.6	91.2	101.7	83.7	91.2	155.5	172.7
Crude petroleum . . . . .	71.0	51.1	62.2	57.5	35.7	50.3	85.2	69.6
Logs and timber . . . . .	142.8	220.4	206.8	214.4	208.2	202.0	196.4	182.7
Wastepaper . . . . .	138.9	371.1	141.6	163.3	146.0	183.6	282.5	148.6
Iron ore . . . . .	83.3	91.8	96.7	96.3	95.5	94.9	94.8	96.2
Iron and steel scrap . . . . .	166.0	202.7	191.1	188.9	164.9	139.2	142.1	119.8
Nonferrous metal ores (Dec. 1983=100) . . . . .	98.3	101.6	90.2	82.2	66.9	63.1	68.0	63.4
Copper base scrap . . . . .	181.3	193.5	166.3	157.7	116.3	108.2	123.7	114.8
Aluminum base scrap . . . . .	172.6	209.4	173.4	195.1	162.8	161.7	177.0	156.4
Construction sand, gravel, and crushed stone . . . . .	125.4	142.3	145.6	148.2	152.7	157.2	163.1	168.8

Potash, soda, and borate minerals . . . . .	1474	12/84	117.4	118.9	113.6	111.6	109.8
Chemicals and fertilizer mineral mining, n.e.c. . . . .	1479	12/89	92.7	93.4	95.0	90.1	85.8
Nonmetallic minerals (except fuels) services . . . . .	1481	06/85	104.7	104.7	106.5	107.2	109.2
Miscellaneous nonmetallic minerals . . . . .	1499	06/85	133.5	136.7	138.0	138.7	143.3
Meat packing plants . . . . .	2011	12/80	113.5	101.4	104.2	113.4	120.0
Sausage and other prepared meats . . . . .	2013	12/82	118.8	113.3	113.8	121.3	125.8
Poultry slaughtering and processing . . . . .	2015	12/81	124.7	127.1	119.8	118.3	121.5
Natural and processed cheese . . . . .	2022	06/81	115.7	126.1	124.3	117.8	129.8
Dry, condensed, and evaporated milk products . . . . .	2023	12/83	138.7	146.4	142.4	140.9	150.7
Ice cream and frozen desserts . . . . .	2024	06/83	135.1	142.6	150.0	150.4	157.1
Fluid milk . . . . .	2026	12/82	133.6	140.4	145.9	141.8	153.7
Canned specialties . . . . .	2032	12/82	163.0	165.6	168.6	171.5	173.9
Canned fruits, vegetables, preserves, jams, and jellies . . . . .	2033	06/81	137.7	136.9	138.2	139.1	142.2
Pickled fruits/veg./veg. sauces/seasonings/salad dressings . . . . .	2035	06/81	161.2	162.2	163.2	163.6	162.9
Frozen fruits and vegetables . . . . .	2037	06/81	139.2	138.6	141.8	141.0	140.0
Frozen specialties . . . . .	2038	12/82	136.8	137.0	137.4	136.1	139.0
Flour and other grain mill products . . . . .	2041	06/83	114.3	103.3	97.1	97.2	101.6
Cereal breakfast foods . . . . .	2043	12/83	168.2	161.4	159.5	159.6	161.6
Wet corn milling . . . . .	2046	06/85	123.6	107.1	101.3	102.6	112.6
Dog and cat food . . . . .	2047	12/85	132.1	132.3	132.2	131.3	134.7
Prepared animal feeds, n.e.c. . . . .	2048	12/80	112.2	95.2	86.7	89.0	92.2
Bread and other bakery products, except cookies and crackers . . . . .	2051	06/80	199.7	201.4	204.5	211.3	221.5
Cookies and crackers . . . . .	2052	06/83	167.0	170.3	171.0	172.0	173.4
Candy and other confectionery products, and chewing gum . . . . .	2064	06/83	146.2	146.8	149.4	150.9	152.2
Soybean oil mill products . . . . .	2075	12/79	103.2	86.7	68.0	69.1	67.6
Malt beverages . . . . .	2082	06/82	128.0	128.1	131.4	136.1	140.4
Bottled and canned soft drinks . . . . .	2086	06/81	140.5	142.4	145.7	152.0	156.6
Flavoring extracts and syrups, n.e.c. . . . .	2087	12/85	130.7	131.4	133.6	137.3	140.7
Fresh or frozen packaged fish . . . . .	2092	12/82	145.2	151.7	160.9	171.5	161.6
Coffee . . . . .	2095	06/81	161.8	153.3	145.8	144.3	136.4
Potato and corn chips, and similar snacks . . . . .	2096	06/91	109.4	111.1	112.7	116.7	121.8
Macaroni, spaghetti, and noodles . . . . .	2098	06/85	125.5	122.7	122.3	121.9	122.4
Food preparations, n.e.c. . . . .	2099	12/85	127.5	128.5	128.9	129.1	131.0
Cigarettes . . . . .	2111	12/82	223.3	260.4	356.7	379.2	425.8
Cigars . . . . .	2121	12/82	228.5	242.7	259.6	268.8	279.1
Cotton broadwoven fabric . . . . .	2211	12/80	118.5	117.4	114.1	110.6	111.7
Manmade fiber and silk broadwoven fabric . . . . .	2221	06/81	115.0	114.8	108.6	108.6	109.0
Narrow fabric mills . . . . .	2241	06/84	122.7	123.8	124.3	125.3	126.2

Miscellaneous publishing . . . . .	2741	06/84	181.1	187.8	194.5	201.3	209.9
Commercial printing, lithographic . . . . .	2752	06/82	149.8	153.3	153.2	156.0	158.1
Commercial printing, n.e.c. . . . .	2759	06/82	159.4	160.9	162.6	166.2	168.4
Manifold business forms . . . . .	2761	12/83	165.8	167.1	170.5	185.7	192.3
Industrial inorganic chemicals, n.e.c. . . . .	2819	12/82	135.5	132.3	129.2	132.7	142.2
Plastic materials and resins . . . . .	2821	12/80	153.9	139.5	142.8	164.3	160.5
Noncellulosic manmade fibers . . . . .	2824	06/81	107.7	106.6	98.9	101.5	102.8
Medicinal chemicals and botanical products (in bulk) . . . . .	2833	06/82	134.2	136.3	143.2	147.8	143.3
Pharmaceutical preparations . . . . .	2834	06/81	259.1	289.9	298.5	306.6	314.0
In vivo and In vitro diagnostics . . . . .	2835	03/80	167.4	177.8	184.5	189.9	191.9
Biological products, except diagnostics . . . . .	2836	06/91	112.3	115.8	126.1	127.5	137.4
Soap and other detergents . . . . .	2841	06/83	124.6	124.8	125.9	127.4	129.6
Specialty cleaning, polishing and sanitation preparations . . . . .	2842	06/83	130.8	132.6	135.1	138.1	139.9
Toilet preparations . . . . .	2844	03/80	168.9	171.7	174.8	177.7	179.3
Paints and Allied Products . . . . .	2851	06/83	152.1	154.9	157.3	160.5	163.9
Cyclic (coal tar) crudes and intermediates, organic dyes and pigments . . . . .	2865	12/82	115.2	109.3	110.1	124.3	114.3
Industrial organic chemicals, n.e.c. . . . .	2869	12/82	171.5	168.0	169.1	185.5	182.9
Agricultural chemicals, n.e.c. . . . .	2879	06/82	137.6	139.4	135.4	136.6	138.1
Adhesives and sealants . . . . .	2891	12/83	148.8	151.4	151.7	153.6	158.1
Chemicals and chemical preparations, n.e.c. . . . .	2899	06/85	133.2	134.3	134.8	135.8	137.9
Petroleum refining . . . . .	2911	06/85	83.1	62.3	73.6	111.6	103.1
Tires and inner tubes . . . . .	3011	06/81	103.4	102.2	100.4	100.4	101.6
Fabricated rubber products, n.e.c. . . . .	3069	06/83	132.1	132.4	132.2	133.1	134.6
Unsupported plastic film and sheet . . . . .	3081	06/93	108.3	103.8	103.2	109.0	113.7
Plastic bottles . . . . .	3085	06/93	107.1	105.5	106.1	110.4	111.3
Plastic foam products . . . . .	3086	06/93	109.7	108.6	108.6	110.1	110.2
Custom compounding of purchased plastic resins . . . . .	3087	06/93	106.7	107.4	104.2	111.1	113.7
Plastic products n.e.c. . . . .	3089	06/93	106.3	106.3	106.7	108.0	109.2
Products of purchased glass . . . . .	3231	06/83	127.1	127.5	128.4	131.6	133.6
Concrete products . . . . .	3272	12/79	151.6	156.7	161.0	166.4	172.2
Ready-mixed concrete . . . . .	3273	06/81	138.0	142.3	145.6	150.2	153.4
Blast furnaces and steel mills . . . . .	3312	06/82	114.2	111.4	102.0	104.1	96.9
Cold finishing of steel shapes - mfp. . . . .	3316	06/82	116.7	114.7	110.3	113.6	107.5
Steel pipe and tubes - mfp. . . . .	3317	06/82	131.8	132.7	127.1	132.1	129.5
Gray iron foundries . . . . .	3321	12/80	143.0	143.3	144.5	147.1	148.1
Primary copper . . . . .	3331	06/80	137.3	106.2	102.2	111.6	-
Secondary nonferrous metals . . . . .	3341	06/80	94.5	85.9	84.8	88.4	85.8
Rolling, drawing and extruding of copper . . . . .	3351	12/80	149.9	131.9	130.0	137.6	132.3
Aluminum sheet, plate, foil and welded tube products . . . . .	3353	06/81	152.9	145.5	139.5	150.4	148.0
Nonferrous wire drawing and insulating . . . . .	3357	12/82	154.5	148.1	143.7	153.2	149.3
Metal cans . . . . .	3411	06/81	110.4	110.2	107.8	108.1	108.0
Hardware, n.e.c. . . . .	3429	06/85	125.0	126.0	127.4	129.7	132.0
Fabricated structural metal . . . . .	3441	06/82	132.8	136.8	139.1	142.0	140.9
Metal doors, sash and trim . . . . .	3442	06/83	152.5	152.9	153.6	156.1	158.2
Fabricated plate work (boiler shops) . . . . .	3443	03/80	161.9	164.7	167.2	168.9	170.4
Sheet metal work . . . . .	3444	12/82	138.6	139.9	140.1	141.8	141.5
Bolts, nuts, screws, rivets, and washers . . . . .	3452	06/82	125.6	127.0	126.4	126.5	126.4
Automotive stampings . . . . .	3465	12/82	112.8	112.1	110.4	110.6	110.1
Metal stampings, n.e.c. . . . .	3469	06/84	128.5	128.9	128.6	128.7	129.9
Metal coating and allied services . . . . .	3479	12/84	119.4	119.1	118.8	119.1	122.6
Industrial valves . . . . .	3491	06/91	117.3	119.7	122.4	123.9	126.3
Fabricated metal products, n.e.c. . . . .	3499	06/85	129.9	131.8	131.8	133.0	133.8
Turbines and turbine generator sets . . . . .	3511	06/82	146.9	146.9	148.7	149.6	150.9
Internal combustion engines, n.e.c. . . . .	3519	12/82	135.7	136.2	138.1	139.0	140.1
Farm machinery and equipment . . . . .	3523	12/82	138.8	140.4	142.2	143.9	146.3
Lawn and garden equipment . . . . .	3524	12/82	126.0	124.9	124.5	124.6	125.1
Construction machinery . . . . .	3531	12/80	164.4	167.8	170.8	172.7	173.5
Special tools, dies, jigs, fixtures and industrial molds . . . . .	3544	06/81	144.1	144.9	145.8	147.0	146.8
Special industry machinery, n.e.c. . . . .	3559	12/81	163.3	166.0	168.2	169.4	169.8
Pumps and pumping equipment . . . . .	3561	12/83	150.4	153.3	156.2	158.6	162.3
General industrial machinery, n.e.c. . . . .	3569	12/84	149.5	151.3	153.8	156.8	159.2
Electronic computers . . . . .	3571	12/90	36.5	29.1	91.1	80.8	71.2

D Withheld to avoid disclosure of individual company data. NA Not available.

Source: U.S. Energy Information Administration, *Petroleum Marketing Monthly*.

## Section 15

# Business Enterprise

This section relates to the place and behavior of the business firm and to business initiative in the American economy. It includes data on the number, type, and size of businesses; financial data of domestic and multinational U.S. corporations; business investments, expenditures, and profits; and sales and inventories.

The principal sources of these data are the *Survey of Current Business*, published by the Bureau of Economic Analysis (BEA), the *Federal Reserve Bulletin*, issued by the Board of Governors of the Federal Reserve System, the annual *Statistics of Income (SOI)* reports of the Internal Revenue Service (IRS), and the Census Bureau's Economic Census, *County Business Patterns*, and *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations (QFR)*.

**Business firms**—A firm is generally defined as a business organization under a single management and may include one or more establishments. The terms firm, business, company, and enterprise are used interchangeably throughout this section. A firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole.

The IRS concept of a business firm relates primarily to the legal entity used for tax reporting purposes. A sole proprietorship is an unincorporated business owned by one person and may include large enterprises with many employees and hired managers and part-time operators. A partnership is an unincorporated business owned by two or more persons, each of whom has a financial interest in the business. A corporation is a business that is legally incorporated under state laws. While many corporations file consolidated tax returns, most corporate tax returns represent individual corporations, some

of which are affiliated through common ownership or control with other corporations filing separate returns.

**Economic census**—The economic census is the major source of facts about the structure and functioning of the nation's economy. It provides essential information for government, business, industry, and the general public. It furnishes an important part of the framework for such composite measures as the gross domestic product estimates, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions. The Census Bureau takes the economic census every 5 years, covering years ending in "2" and "7." The economic census forms an integrated program at 5-year intervals since 1967, and before that for 1963, 1958, and 1954. Prior to that time, the individual censuses were taken separately at varying intervals.

The economic census is collected on an establishment basis. A company operating at more than one location is required to file a separate report for each store, factory, shop, or other location. Each establishment is assigned a separate industry classification based on its primary activity and not that of its parent company. Establishments responding to the establishment survey are classified into industries on the basis of their principal product or activity (determined by annual sales volume) in accordance with the *North American Industry Classification System—United States, 1997 manual* (see below).

More detailed information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the Economic Censuses and Related Statistics*. More information on the methodology, procedures, and history of the censuses is

available in the *History of the 1997 Economic Census* found on the Census Bureau Web site at <<http://www.census.gov/prod/ec97/pol00-hec.pdf>>.

Data from the 1997 Economic Census were released through the Census Bureau's American FactFinder service, on CD-ROM, and in Adobe Acrobat PDF reports available on the Census Bureau Web site. For more information on these various media of release, see the following page on the Census Bureau Web site <<http://www.census.gov/epcd/www/econ97.html>>.

#### **North American Industry Classification System (NAICS)—**The 1997

Economic Census is the first census to present data based on the new NAICS. Previous census data were based on the Standard Industrial Classification (SIC) system. This new system of industrial classification was developed by experts on classification in government and private industry under the guidance of the

Office of Information and Regulatory Affairs, Office of Management and Budget.

There are 20 NAICS sectors, which are subdivided into 96 subsectors (three-digit codes), 313 industry groups (four-digit codes), and, as implemented in the United States, 1,170 industries (five- and six-digit codes). While many of the individual NAICS industries correspond directly to industries as defined under the SIC system, most of the higher level groupings do not.

Most of the 1997 Economic Census data are issued on a NAICS basis as seen in the industry and geographic series from the census. Other related census reports remain on an SIC basis due to use of administrative records and other methodological and data processing issues. Current survey data from the Census Bureau as well as other statistical agencies are converting over time to NAICS after benchmarking to the 1997 Economic Census where appropriate or implementation of data collection on a NAICS basis.

No. 699. Number of Returns, Receipts, and Net Income by Type of Business: 1980 to 1999

[8,932 represents 8,932,000. Covers active enterprises only. Figures are estimates based on sample of unaudited tax returns; see Appendix III. Minus sign (-) indicates net loss]

Item	Number of returns (1,000)			Business receipts <sup>2</sup> (bil. dol.)			Net income (less loss) <sup>3</sup> (bil. dol.)		
	Nonfarm propi- etor- ships <sup>1</sup>	Partnerships	Corporations	Nonfarm propi- etor- ships <sup>1</sup>	Partnerships	Corporations	Nonfarm propi- etor- ships <sup>1</sup>	Partnerships	Corporations
1980 . . . . .	8,932	1,380	2,711	411	286	6,172	55	8	239
1985 . . . . .	11,929	1,714	3,277	540	349	8,050	79	-9	240
1990 . . . . .	14,783	1,554	3,717	731	541	10,914	141	17	371
1991 . . . . .	15,181	1,515	3,803	713	539	10,963	142	21	345
1992 . . . . .	15,495	1,485	3,869	737	571	11,272	154	43	402
1993 . . . . .	15,848	1,468	3,965	757	627	11,814	156	67	498
1994 . . . . .	16,154	1,494	4,342	791	732	12,858	167	82	577
1995 . . . . .	16,424	1,581	4,474	807	854	13,969	169	107	714
1996 . . . . .	16,955	1,654	4,631	843	1,042	14,890	177	145	806
1997 . . . . .	17,176	1,759	4,710	870	1,297	15,890	187	168	915
1998 . . . . .	17,409	1,855	4,849	918	1,534	16,543	202	187	838
1999 . . . . .	17,576	1,937	4,936	969	1,829	18,009	208	228	929

<sup>1</sup> In 1980, represents individually owned businesses, including farms; thereafter, represents only nonfarm proprietors, i.e., business owners. <sup>2</sup> Excludes investment income except for partnerships and corporations in finance, insurance, and real estate before 1998. After 1997 finance and insurance, real estate, and management of companies included investment income for partnerships and corporations. Starting 1985, investment income no longer included for S corporations. <sup>3</sup> Net income (less loss) is defined differently by form of organization, basically as follows: (a) Proprietorships: Total taxable receipts less total business deductions, including cost of sales and operations, depletion, and certain capital expensing, excluding charitable contributions and owners' salaries; (b) Partnerships: Total taxable receipts (including investment income except capital gains) less deductions, including cost of sales and operations and certain payments to partners, excluding charitable contributions, oil and gas depletion, and certain capital expensing; (c) Corporations: Total taxable receipts (including investment income, capital gains, and income from foreign subsidiaries deemed received for tax purposes, except for S corporations beginning 1985) less business deductions, including cost of sales and operations, depletion, certain capital expensing, and officers' compensation excluding S corporation charitable contributions and investment expenses starting 1985; net income is before income tax.

# No. 715. Major Industries—Employer Firms, Employment, and Annual Payroll by Enterprise Size: 1999

[5,608 represents 5,608,000. A firm is an aggregation of all establishments owned by a parent company (within a geographic location and/or industry) with some annual payroll. A firm may be a single location or it can include multiple locations. Employment is measured in March and payroll is annual leading to some firms with zero employment. Numbers in parentheses represent North American Industry Classification System codes, see text, this section]

No. 716. Employer Firms, Establishments, Employment, and Annual Payroll by Enterprise Size: 1990 to 1999

[In thousands except as noted (5,074 represents 5,074,000). Firms are an aggregation of all establishments owned by a parent company. Establishments are locations with active payroll in any quarter. Employment is measured in March and payroll is annual leading to some enterprises with zero employment. This table illustrates the changing importance of enterprise sizes over time, not job growth as enterprises can grow or decline and change enterprise size cells over time]

Item	All industries—employment size of enterprise

No. 726. Mergers and Acquisitions—Summary: 1990 to 2001

[205.6 represents \$205,600,000,000. Covers transactions valued at \$5 million or more. Values based on transactions for which price data revealed. All activity includes mergers, acquisitions, acquisitions of partial interest that involve a 40 percent stake in the target or an investment of at least \$100 million, divestitures, and leveraged transactions that result in a change in ownership. Divestiture: sale of a business, division, or subsidiary by corporate owner to another party. Leveraged buyout: acquisition of a business in which buyers use mostly borrowed money to finance purchase price and incorporate debt into capital structure of business after change in ownership]

# No. 738. Business Cycle Expansions and Contractions—Months of Duration: 1919 to 2001

[A trough is the low point of a business cycle; a peak is the high point. Contraction, or recession, is the period from peak to subsequent trough; expansion is the period from trough to subsequent peak. Business cycle reference dates are determined by the National Bureau of Economic Research, Inc.]

Business cycle reference date				Contraction (trough from previous peak)	Expansion (trough to peak)	Length of cycle	
Trough		Peak				Trough from previous trough	Peak from previous peak
Month	Year	Month	Year				
March . . . . .	1919	January . . . . .	1920	17	10	251	117
July . . . . .	1921	May . . . . .	1923	18	22	28	40
July . . . . .	1924	October . . . . .	1926	14	27	36	41
November . . . . .	1927	August . . . . .	1929	13	21	40	34
March . . . . .	1933	May . . . . .	1937	43	50	64	93
June . . . . .	1938	February . . . . .	1945	13	80	63	93
October . . . . .	1945	November . . . . .	1948	8	37	88	45
October . . . . .	1949	July . . . . .	1953	11	45	48	56
May . . . . .	1954	August . . . . .	1957	10	39	55	49
April . . . . .	1958	April . . . . .	1960	8	24	47	32
February . . . . .	1961	December . . . . .	1969	10	106	34	116
November . . . . .	1970	November . . . . .	1973	11	36	117	47
March . . . . .	1975	January . . . . .	1980	16	58	52	74
July . . . . .	1980	July . . . . .	1981	6	12	64	18
November . . . . .	1982	July . . . . .	1990	16	92	28	108
March . . . . .	1991	March . . . . .	2001	8	120	100	128
Average, all cycles:							
1854 to 1991 (31 cycles).				18	35	53	353
1854 to 1919 (16 cycles).				22	27	48	449
1919 to 1945 (six cycles).				18	35	53	53
1945 to 1991 (nine cycles).				11	50	61	61
Average, peacetime cycles:							
1854 to 1991 (26 cycles).				19	29	48	548
1854 to 1919 (14 cycles).				22	24	46	647
1919 to 1945 (5 cycles).				20	26	46	45
1945 to 1991 (7 cycles).				11	43	53	53

<sup>1</sup> Previous peak: August 1918. <sup>2</sup> Previous trough: December 1914. <sup>3</sup> 30 cycles. <sup>4</sup> 15 cycles. <sup>5</sup> 25 cycles. <sup>6</sup> 13 cycles.

No. 740. Index of Manufacturing Capacity: 1980 to 2001

[1992 output=100. Annual figures are averages of monthly data. Capacity represents estimated quantity of output relative to output in 1992 which the current stock of plant and equipment in manufacturing industries was capable of producing. Primary processing manufacturing includes textile mill products, paper and products, industrial chemicals, synthetic materials, and fertilizers, petroleum products, rubber and plastics products, lumber and products, primary metals, fabricated metals, stone, clay and glass products, semiconductors and related electronic components, and motor vehicle parts. Advanced processing manufacturing includes foods, tobacco products, apparel products, printing and publishing, chemical products and other agricultural chemicals, leather and products, furniture and fixtures, industrial machinery and equipment, electrical machinery except semiconductors and related electronic components, transportation equipment except motor vehicle parts, instruments, and miscellaneous manufactures]

Relation of output to capacity (percent)					Relation of output to capacity (percent)

## No. 742. Manufacturing Corporations—Number, Assets, and Profits by Asset Size: 1990 to 2001

[Corporations and assets as of end of 4th quarter; profits for entire year (2,629,458 represents \$2,629,458,000,000). Through 2000 based on Standard Industrial Classification code; beginning 2001 based on North American Industry Classification System. For corporations above a certain asset value based on complete canvass. The asset value for complete canvass was raised in 1988 to \$50 million and in 1995 to \$250 million. Asset sizes less than these values are sampled, except as noted. For details regarding methodology, see source for first quarter, 1988. Minus sign (-) indicates loss]

Year	Unit	Asset-size class							
		Total	Under \$10 mil. <sup>1</sup>	\$10-\$25 mil.	\$25-\$50 mil.	\$50-\$100 mil.	\$100-\$250 mil.	\$250 mil.-\$1 bil.	\$1 bil. and over

2001	4,308	82	36	1,827	1,296	2,332	-70	-77	1,049	640	1,976	152	112	779	656

<sup>1</sup> Beginning 1998, profits before and after income taxes reflect inclusion of minority stockholders' interest in net income before and after income taxes. <sup>2</sup> Annual data are average debt for the year (using four end-of-quarter figures). <sup>3</sup> Data for 1992 (most significantly 1992:1 qtr.) reflect the early adoption of Financial Accounting Standards Board Statement 106 (Employer's Accounting for Post-Retirement Benefits Other Than Pensions) by a large number of companies during the fourth quarter of 1992. Data for 1993:1 qtr. also reflect adoption of Statement 106. Corporations must show the cumulative effect of a change in accounting principle in the first quarter of the year in which the change is adopted.

No. 749. U.S. Multinational Companies—Selected Characteristics: 1999

[Preliminary. In billions of dollars (11,399 represents \$11,399,000,000,000), except as indicated. Consists of nonbank U.S. parent companies and their nonbank foreign affiliates. U.S. parent comprises the domestic operations of a multinational and is a U.S. person that owns or controls directly or indirectly, 10 percent or more of the voting securities of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise. A U.S. person can be an incorporated business enterprise. A foreign affiliate is a foreign business enterprise owned or controlled by a U.S. parent company. MOFA=Majority-owned foreign affiliate]

No. 750. U.S. Multinational Companies—Gross Product: 1995 and 1999

[In millions of dollars (1,831,046 represents \$1,831,046,000,000). Gross product measures valued added by a firm. Consists of nonbank U.S. parent companies and their nonbank foreign affiliates. A U.S. parent comprises the domestic operations of a multinational and is a U.S. person that owns or controls 10 percent or more of the voting securities, or the equivalent, of a foreign business enterprise. A U.S. person can be an incorporated business enterprise. A majority-owned foreign affiliate is a foreign business enterprise in which a U.S. parent company owns or controls 50 percent or more of the voting securities. Based on Standard Industrial Classification code]

## Section 16

# Science and Technology

This section presents statistics on scientific, engineering, and technological resources, with emphasis on patterns of research and development (R&D) funding and on scientific, engineering, and technical personnel; education; and employment. Also included are statistics on space program outlays and accomplishments. Principal sources of these data are the National Science Foundation (NSF) and the National Aeronautics and Space Administration (NASA).

NSF gathers data chiefly through recurring surveys. Current NSF publications containing data on funds for research and development and on scientific and engineering personnel include detailed statistical tables; issue briefs; and annual, biennial, triennial, and special reports. Titles or the areas of coverage of these reports include the following: *Science and Engineering Indicators*; *National Patterns of R&D Resources*; *Women, Minorities, and Persons with Disabilities in Science and Engineering*—science and technology data presented in chart and tabular form in a pocket-sized publication—*Federal Funds for Research and Development*; *Federal R&D Funding by Budget Function*; *Federal Support to Universities, Colleges, and Selected Nonprofit Institutions*; *Research and Development in Industry*; R&D expenditures and graduate enrollment and support in academic science and engineering; and characteristics of doctoral scientists and engineers and of recent graduates in the United States. Statistical surveys in these areas pose problems of concept and definition and the data should therefore be regarded as broad estimates rather than precise, quantitative statements. See sources for methodological and technical details.

The National Science Board's biennial *Science and Engineering Indicators* contains data and analysis of international and domestic science and technology, including measures of inputs and outputs.

The *Budget of the United States Government*, published by the U.S. Office of Management and Budget, contains summary financial data on federal R&D programs.

**Research and development outlays**—NSF defines research as “systematic study directed toward fuller scientific knowledge of the subject studied” and development as “the systematic use of scientific knowledge directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes.”

National coverage of R&D expenditures is developed primarily from periodic surveys in four principal economic sectors: (1) *Government*, made up primarily of federal executive agencies; (2) *industry*, consisting of manufacturing and nonmanufacturing firms and the federally funded research and development centers (FFRDCs) they administer; (3) *universities and colleges*, composed of universities, colleges, and their affiliated institutions, agricultural experiment stations, and associated schools of agriculture and of medicine, and FFRDCs administered by educational institutions; and (4) *other nonprofit institutions*, consisting of such organizations as private philanthropic foundations, nonprofit research institutes, voluntary health agencies, and FFRDCs administered by nonprofit organizations.

The R&D funds reported consist of current operating costs, including planning and administration costs, except as otherwise noted. They exclude funds for routine testing, mapping and surveying, collection of general-purpose data, dissemination of scientific information, and training of scientific personnel.

**Scientists, engineers, and technicians**—Scientists and engineers are defined as persons engaged in scientific and engineering work at a level requiring a knowledge of sciences equivalent at least to that acquired through completion

of a 4-year college course. Technicians are defined as persons engaged in technical work at a level requiring knowledge acquired through a technical institute,

junior college, or other type of training less extensive than 4-year college training. Craftsmen and skilled workers are excluded.

No. 774. U.S. Commercial Space Industry Revenue by Type: 1996 to 2001

[In billions of dollars (19.6 represents \$19,600,000,000). For calendar years]

Industry	1996	1997	1998	1999	2000	2001, est.
Revenue, total	19.6	26.7	30.5	31.9	36.9	36.5
Satellite manufacturing <sup>1</sup>	7.3	10.3	11.8	10.0	8.9	5.5
Launch industry <sup>2</sup>	3.2	3.6	3.5	3.5	4.1	1.7
Satellite services <sup>2</sup>	4.8	6.3	7.4	9.8	11.8	15.9
Ground equipment manufacturing <sup>3</sup>	4.3	6.5	7.8	8.6	12.1	13.4

See footnotes for corresponding objects in Table 775.

No. 775. Worldwide Commercial Space Industry Revenue by Type: 1996 to 2001

In billions of dollars (44.8 represents \$44,800,000,000). For calendar years]

Industry	1996	1997	1998	1999	2000	2001, est.
Total	44.8	57.5	63.8	68.0	82.6	85.1
Satellite manufacturing <sup>1</sup>	12.4	15.9	18.5	15.8	17.2	14.1
Launch industry	6.9	7.9	7.0	6.6	8.5	5.0
Satellite services <sup>2</sup>	15.8	21.2	24.4	29.7	39.2	46.4
Ground equipment manufacturing <sup>3</sup>	9.7	12.5	13.9	16.0	17.7	19.6

<sup>1</sup> Includes revenues from the construction and sale of satellites to both commercial and government. <sup>2</sup> Includes revenues derived from transponder leasing and subscription/retail services such as direct-to-home television and satellite mobile and data communications. <sup>3</sup> Includes revenues from the manufacture of gateways and satellite control stations, satellite news-gathering trucks, very small aperture terminals, direct-to-home television equipment and mobile satellite phones.

## Section 17

# Agriculture

---

This section presents statistics on farms and farm operators; land use; farm income, expenditures, and debt; farm output, productivity, and marketings; foreign trade in agricultural products; specific crops; and livestock, poultry, and their products.

The principal sources are the reports issued by the National Agricultural Statistics Service (NASS) and the Economic Research Service (ERS) of the U.S. Department of Agriculture. The information from the 1997 Census of Agriculture is available in printed form in the Volume 1, Geographic Area Series; in electronic format on CD-ROM; and on the Internet site <<http://www.nass.usda.gov/census/>>. The Department of Agriculture publishes annually *Agricultural Statistics*, a general reference book on agricultural production, supplies, consumption, facilities, costs, and returns. The ERS publishes data on farm assets, debt, and income on the Internet site <<http://www.ers.usda.gov/briefing/farmincome/>>. Sources of current data on agricultural exports and imports include *Foreign Agricultural Trade of the United States*, published by the ERS, and the reports of the U.S. Census Bureau, particularly *U.S. Imports of Merchandise on CD-ROM*, and *U.S. Exports of Merchandise on CD-ROM*.

The 45 field offices of the NASS collect data on crops, livestock and products, agricultural prices, farm employment, and other related subjects mainly through sample surveys. Information is obtained on some 75 crops and 50 livestock items as well as scores of items pertaining to agricultural production and marketing. State estimates and supporting information are sent to the Agricultural Statistics Board of NASS which reviews the estimates and issues reports containing state and national data. Among these reports are annual summaries such as *Crop Production*, *Crop Values*, *Agricultural Prices*, and *Livestock Production, Disposition and*

*Income*. For more information about concepts and methods underlying USDA's statistical series, see *Major Statistical Series of the U.S. Department of Agriculture* (Agricultural Handbook No. 671), a 12-volume set of publications.

**Farms and farmland**—The definitions of a farm have varied through time. Since 1850, when minimum criteria defining a farm for census purposes first were established, the farm definition has changed nine times. The current definition, first used for the 1974 census, is any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year.

Acreage designated as "land in farms" consists primarily of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator's total operation. Land in farms includes acres set aside under annual commodity acreage programs as well as acres in the Conservation Reserve and Wetlands Reserve Programs for places meeting the farm definition. Land in farms is an operating unit concept and includes land owned and operated as well as land rented from others. All grazing land, except land used under government permits on a per-head basis, was included as "land in farms" provided it was part of a farm or ranch.

Since 1945, an evaluation of census coverage has been conducted for each census of agriculture to provide estimates of the completeness of census farm counts. According to coverage evaluation results, the past five censuses of agriculture included an average of 92 percent of U.S. farms and 98 percent of agriculture production. The 1997 coverage evaluation program was designed to measure four components of error in the census farm

counts. These components include undercount due to farms not on the mail list; overcount due to farms duplicated or enumerated more than once; undercount due to farms incorrectly classified as non-farms; and overcount due to nonfarms incorrectly classified as farms. The first component, mail list undercount, is by far the largest component of coverage error. The percentage of farms missed in the census varies considerably by state. In general, farms not on the mail list tended to be small in acreage, production, and sales of agricultural products. For more explanation about mail list compilation and census coverage, see Appendixes A and C, *1997 Census of Agriculture*, Volume 1, reports.

**Farm income**—The final agricultural sector output comprises cash receipts from farm marketings of crops and livestock, federal government payments made directly to farmers for farm-related activities, rental value of farm homes, value of farm products consumed in farm homes, and other farm-related income such as machine hire and custom work. Farm marketings represent quantities of agricultural products sold by farmers multiplied by prices received per unit of production at the local market. Information on prices received for farm products is generally obtained by the NASS Agricultural Statistics Board from surveys of firms (such as grain elevators, packers, and processors) purchasing agricultural commodities directly from producers. In some cases, the price information is obtained directly from the producers.

**Crops**—Estimates of crop acreage and production by the NASS are based on current sample survey data obtained from

individual producers and objective yield counts, reports of carlot shipments, market records, personal field observations by field statisticians, and reports from other sources. Prices received by farmers are marketing year averages. These averages are based on U.S. monthly prices weighted by monthly marketings during specific periods. U.S. monthly prices are state average prices weighted by marketings during the month. Marketing year average prices do not include allowances for outstanding loans, government purchases, deficiency payments or disaster payments.

All state prices are based on individual state marketing years, while U.S. marketing year averages are based on standard marketing years for each crop. For a listing of the crop marketing years and the participating states in the monthly program, see *Crop Values*. Value of production is computed by multiplying state prices by each state's production. The U.S. value of production is the sum of state values for all states. Value of production figures shown in Tables 813-816, 820, and 821 should not be confused with cash receipts from farm marketings which relate to sales during a calendar year, irrespective of the year of production.

**Livestock**—Annual inventory numbers of livestock and estimates of livestock, dairy, and poultry production prepared by the Department of Agriculture are based on information from farmers and ranchers obtained by probability survey sampling methods.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Department of Agriculture data, see Appendix III.

No. 781. Farms—Number and Acreage by Size of Farm: 1987 to 1997

No. 793. Farm Income—Cash Receipts From Farm Marketings: 1995 to 2000

[In millions of dollars (188,049 represents \$188,049,000,000). Represents gross receipts from commercial market sales as well as net Commodity Credit Corporation loans. The source estimates and publishes individual cash receipt values only for major commodities and major producing states. The U.S. receipts for individual commodities, computed as the sum of the reported states, may understate the value of sales for some commodities. The degree of underestimation in some of the minor commodities can be substantial]

No. 799. Value of Selected Commodities Produced Under Contracts: 2000

[66,394 represents \$66,394,000,000. Marketing contracts refer to verbal or written agreements between a buyer and a grower that set a price and determine an outlet for a specified quantity of a commodity before harvest or before the farmer markets the commodity. Production contracts involve paying the farmer a fee for providing management, labor, facilities, and equipment, while assigning ownership of the product to the contractor. Survey based estimates (see source) exclude Alaska and Hawaii and do not represent official U.S. Dept. of Agriculture estimates of farm sector activity]

Commodity	Value of production under contract (mil. dol.)	Percent of total production <sup>1</sup>	Commodity	Value of production under contract (mil. dol.)	Percent of total production <sup>1</sup>

No. 806. Imports' Share of Food Consumption by Commodity: 1980 to 2000

[In percent. Import share is the total quantity imported divided by the quantity available for domestic human food consumption. Calculated from supply and utilization balance sheets. A portion of the imports of some commodities is exported plus, some is diverted to such nonfood uses as feed, seed, alcohol and fuel production, and industrial uses. These can overstate the importance of imports]

## No. 811. Percent of Corn, Soybean, and Cotton Acreage Planted With Genetically Modified Seed: 2000 and 2002

[In percent. Based on the June Agricultural Survey. Randomly selected farmers across the United States were asked if they planted corn, soybeans, or upland cotton seed that, through biotechnology, is resistant to herbicides, insects, or both. The states published individually below represent 81 percent of all corn planted acres, 89 percent of all soybean planted acres, and 81 percent of all upland cotton planted acres. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). The acreage estimates are subject to sampling variability because all operations planting biotech varieties are not included in the sample]

NA Not available. <sup>1</sup> Except as noted, marketing year average price. U.S. prices are computed by weighting U.S. monthly prices by estimated monthly marketings and do not include an allowance for outstanding loans and government purchases and payments. <sup>2</sup> Comprises production, imports, and beginning stocks. <sup>3</sup> Includes feed, residual, and other domestic uses not shown separately. <sup>4</sup> Prices are for hay sold baled. <sup>5</sup> Season average prices received by farmers. U.S. prices are computed by weighting state prices by estimated sales. <sup>6</sup> State production figures, which conform with annual ginning enumeration with allowance for cross-state ginnings, rounded to thousands and added for U.S. totals. <sup>7</sup> Bales of 480 pounds, net weight. <sup>8</sup> Stock estimates based on Census Bureau data which results in an unaccounted difference between supply and use estimates and changes in ending stocks.

2001, prel.	13,290	4,739	424	832	585	2,177	111	8,552

<sup>1</sup> Includes all floriculture and nursery crops except cut Christmas trees, seeds, and food crops grown under cover. <sup>2</sup> Includes commercial growers with less than \$100,000 in floriculture crop sales in 36 major states (since 1992), not shown separately. Data for 1990 and 1991 include 29 crops in 28 states; 1992-93 includes 29 crops in 36 states; 1994 to date includes 40 crops in 36 states. <sup>3</sup> Based on wholesale value of sales; since 1992, includes only commercial growers with \$100,000 or more in floriculture sales; 36 major states. <sup>4</sup> Includes nursery crops, such as annuals and perennials, bulbs, sod, nursery stock, and other products grown in nurseries and greenhouses. Excludes cut Christmas trees.

## Section 18

# Natural Resources

This section presents data on the area, ownership, production, trade, reserves, and disposition of natural resources. Natural resources is defined here as including forestry, fisheries, and mining and mineral products.

**Forestry**—Presents data on the area, ownership, and timber resource of commercial timberland; forestry statistics covering the National Forests and Forest Service cooperative programs; product data for lumber, pulpwood, woodpulp, paper and paperboard, and similar data.

The principal sources of data relating to forests and forest products are *Forest Resources of the United States, 1991*; *Timber Demand and Technology Assessment, 2001*; *U.S. Timber Production, Trade, Consumption, and Price Statistics*; *Land Areas of the National Forest System*, issued annually by the Forest Service of the Department of Agriculture; *Agricultural Statistics* issued by the Department of Agriculture; and reports of the annual survey of manufactures, see Table 851) and the annual *Current Industrial Reports*, issued by the Census Bureau on the Internet and in print in the annual *Manufacturing Profiles*. Additional information is published in the monthly *Survey of Current Business* of the Bureau of Economic Analysis, and the annual *Wood Pulp and Fiber Statistics* and *The Statistics of Paper, Paperboard, and Wood Pulp* of the American Forest and Paper Association, Washington, DC.

The completeness and reliability of statistics on forests and forest products vary considerably. The data for forest land area and stand volumes are much more reliable for areas which have been recently surveyed than for those for which only estimates are available. In general, more data are available for lumber and other manufactured products such as particle board and softwood panels, etc., than for the primary forest products such as poles and piling and fuelwood.

**Fisheries**—The principal source of data relating to fisheries is *Fisheries of the United States*, issued annually by the National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA). The NMFS collects and disseminates data on commercial landings of fish and shellfish. Annual reports include quantity and value of commercial landings of fish and shellfish disposition of landings and number and kinds of fishing vessels and fishing gear. Reports for the fish-processing industry include annual output for the wholesaling and fish processing establishments, annual and seasonal employment. The principal source for these data is the annual *Fisheries of the United States*.

**Mining and mineral products**—Presents data relating to mineral industries and their products, general summary measures of production and employment, and more detailed data on production, prices, imports and exports, consumption, and distribution for specific industries and products. Data on mining and mineral products may also be found in Sections 19, 21, and 28 of this *Abstract*; data on mining employment may be found in Section 12.

Mining comprises the extraction of minerals occurring naturally (coal, ores, crude petroleum, natural gas) and quarrying, well operation, milling, refining and processing, and other preparation customarily done at the mine or well site or as a part of extraction activity. (Mineral preparation plants are usually operated together with mines or quarries.) Exploration for minerals is included as is the development of mineral properties.

The principal governmental sources of these data are the *Minerals Yearbook* and *Mineral Commodity Summaries*, published by the U.S. Geological Survey, Department of the Interior, and various monthly and annual publications of the Energy Information Administration, Department of

Energy. See text, Section 19, for a list of Department of Energy publications. In addition, the Census Bureau conducts a census of mineral industries every 5 years (for 1997 results, see Tables 864 and 865).

Nongovernment sources include the *Annual Statistical Report* of the American Iron and Steel Institute, Washington, DC; *Metals Week* and the monthly *Engineering and Mining Journal*, issued by the McGraw-Hill Publishing Co., New York, NY; *The Iron Age*, issued weekly by the Chilton Co., Philadelphia, PA; and the *Joint Association Survey of the U.S. Oil and Gas Industry*, conducted jointly by the American Petroleum Institute, Independent Petroleum Association of America, and Mid-Continent Oil and Gas Association.

Mineral statistics, with principal emphasis on commodity detail, have been collected by the U.S. Geological Survey and the former Bureau of Mines since 1880. Current data in U.S. Geological Survey publications include quantity and value of non-fuel minerals produced, sold or used by producers, or shipped; quantity of minerals stocked; crude materials treated and prepared minerals recovered; and consumption of mineral raw materials.

Censuses of mineral industries have been conducted by the Census Bureau at various intervals since 1840. Beginning with the 1967 census, legislation provides for a census to be conducted every 5 years for years ending in "2" and "7." The most recent results, published for 1997, are based on the North American Industry Classification System (NAICS). The censuses provide, for the various types of mineral establishments, information on operating costs, capital expenditures, labor, equipment, and energy requirements in relation to their value of shipments and other receipts. Commodity statistics on many manufactured mineral products are also collected by the Census Bureau at monthly, quarterly, or annual intervals and issued in its *Current Industrial Reports* series.

In general, figures shown in the individual commodity tables include data for outlying areas and may therefore not agree with summary tables. Except for crude petroleum and refined products, the export and import figures include foreign trade passing through the customs districts of United States and Puerto Rico but exclude shipments between U.S. territories and the customs districts.

No. 832. Gross Domestic Product of Natural Resource-Related Industries in Current and Real (1996) Dollars by Industry: 1990 to 2000

In billions of dollars (5,803.2 represents 5,803,200,000,000). Data are based on the 1987 SIC. Data include nonfactor charges (capital consumption allowances, indirect business taxes, etc.) as well as factor charges against gross product, corporate profits and capital consumption allowances have been shifted from a company to an establishment basis.

Industry	Current dollars				Chained (1996) dollars

<sup>1</sup> Timberland is forest land that is producing or is capable of crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Areas qualifying as timberland have the capability of producing in excess of 20 cubic feet per acre per year of industrial wood in natural stands. Currently inaccessible and inoperable areas are included. <sup>2</sup> Includes Indian lands. <sup>3</sup> Sawtimber is timber suitable for sawing into lumber. Live trees of commercial species containing at least one 12-foot sawlog or two noncontiguous 8-foot logs, and meeting regional specifications for freedom from defect. Softwood trees must be at least 9.0-inches diameter, and hardwood trees must be at least 11.0-inches diameter at 4 1/2 feet above ground. International 1/4-inch rule. <sup>4</sup> Live trees of commercial species meeting specified standards of quality or vigor. Cull trees are excluded. Includes only trees 5.0-inches diameter or larger at 4 1/2 feet above ground.

No. 850. Mining Industries—Employees, Payroll, and Shipments: 1997

[The mining sector comprises establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals and gases, such as natural gas. The term mining is used in the broad sense to include quarrying, well operations, beneficiating (e.g., crushing, screening, washing, and flotation), and other preparation customarily performed at the mine site, or as a part of mining activity]

No. 851. Mining Summary by State: 1997

[The mining sector comprises establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals and gases, such as natural gas. The term mining is used in the broad sense to include quarrying, well operations, beneficiating (e.g., crushing, screening, washing, and flotation), and other preparation customarily performed at the mine site, or as a part of mining activity]

Iron ore (gross weight)	Mil. metric tons	57	61	58	63	60
Lead (recoverable content)	1,000 metric tons	484	394	520	468	420
Magnesium metal	1,000 metric tons	139	142	(D)	(D)	(D)
Manganiferous ore (gross weight)	1,000 metric ton	(D)	(D)	-	-	(NA)
Mercury	Metric tons	562	(D)	(NA)	(NA)	-
Molybdenum (concentrate)	1,000 metric tons	62	61	43	41	38
Nickel	1,000 metric tons	-	2	-	-	-
Palladium metal	Kilograms	5,930	5,260	9,800	10,300	12,000
Platinum metal	Kilograms	1,810	1,590	2,920	3,110	3,600
Silicon (silicon content)	1,000 metric tons	418	396	423	367	301
Silver (recoverable content)	Metric tons	2,120	1,560	1,950	1,860	1,800
Titanium concentrate: Ilmenite (gross weight)	1,000 metric tons	(D)	(D)	(D)	(NA)	(NA)
Tungsten ore and concentrate	Metric tons	(D)	(D)	-	-	(NA)
Zinc (recoverable content)	1,000 metric tons	515	614	843	829	830

- Represents zero. D Withheld to avoid disclosing individual company data. NA Not available. <sup>1</sup> 42 gal. bbl. <sup>2</sup> Beginning 1995, includes apatite. <sup>3</sup> Refined. <sup>4</sup> Excludes abrasive stone, bituminous limestone and sandstone, and ground soapstone, all included elsewhere in table. Includes calcareous marl and slate. <sup>5</sup> Includes Puerto Rico. <sup>6</sup> Represents shipments; includes byproduct ores. <sup>7</sup> 5 to 35 percent manganiferous ore. <sup>8</sup> Covers mercury recovered as a by product of gold ores only. <sup>9</sup> Content of ore and concentrate.

No. 856. Nonfuel Mineral Commodities—Summary: 2001

[Preliminary estimates. Average price in dollars per metric tons except as noted]

Mineral	Mineral disposition				Average price per unit (dollars)	Employment (number)
	Unit	Production	Exports	Net import reliance <sup>1</sup> (percent)	Consumption, apparent	
Aluminum . . . . .	1,000 metric tons.	2,600	1,500	35	6,000	<sup>2</sup> 70.00
Antimony (contained) . . . . .	Metric tons . . . . .	<sup>3</sup> 300	1,500	86	49,800	<sup>4</sup> 65.00
Asbestos . . . . .	1,000 metric tons.	5	16	100	(NA)	206.00
Barite . . . . .	1,000 metric tons.	400	40	87	2,960	<sup>5</sup> 25.00
Bauxite and alumina . . . . .	1,000 metric tons.	(NA)	(NA)	100	3,200	<sup>6</sup> 24.00
Beryllium (contained) . . . . .	Metric tons . . . . .	180	40	39	295	<sup>7</sup> 338.00
Bismuth (contained) . . . . .	Metric tons . . . . .	-	600	95	2,200	<sup>8</sup> 3.80
Boron (B <sub>2</sub> O <sub>3</sub> content) . . . . .	1,000 metric tons.	650	100	( <sup>9</sup> )	482	<sup>4</sup> 7376.00
Bromine (contained) . . . . .	1,000 metric tons.	204	20	5	214	<sup>8</sup> 67.00
Cadmium (contained) . . . . .	Metric tons . . . . .	<sup>3</sup> 1,400	280	3	1,440	<sup>2</sup> <sup>10</sup> 0.15
Cement . . . . .	1,000 metric tons.	89,600	738	21	114,000	<sup>4</sup> 79.00
Chromium . . . . .	1,000 metric tons.	<sup>11</sup> 120	60	78	540	<sup>4</sup> 12(NA)
Clays . . . . .	1,000 metric tons.	40,600	5,130	( <sup>5</sup> )	35,500	(NA)
Cobalt (contained) . . . . .	Metric tons . . . . .	<sup>11</sup> 2,500	3,000	78	11,200	<sup>2</sup> 10.70
Copper (Mine, contained) . . . . .	1,000 metric tons.	1,340	670	31	2,770	<sup>14</sup> 10
Diamond (industrial) . . . . .	Million carats . . . . .	418	91	83	626	<sup>14</sup> 0.31
Diatomite . . . . .	1,000 metric tons.	735	131	( <sup>9</sup> )	604	<sup>4</sup> 256.00
Feldspar . . . . .	1,000 metric tons.	780	5	( <sup>9</sup> )	782	<sup>4</sup> 54.00
Fluorspar . . . . .	1,000 metric tons.	(NA)	21	100	636	0.00
Garnet (industrial) . . . . .	Metric tons . . . . .	52,500	10,000	20	59,600	<sup>4</sup> 50-2,000
Germanium (contained) . . . . .	Kilograms . . . . .	20,000	(NA)	(NA)	(NA)	(NA)
Gold (contained) . . . . .	Metric tons . . . . .	350	580	( <sup>5</sup> )	(NA)	<sup>17</sup> 280.00
Gypsum (crude) . . . . .	1,000 metric tons.	18,800	198	25	33,200	<sup>4</sup> 8.46
Iodine . . . . .	Metric tons . . . . .	1,700	1,000	72	6,000	<sup>8</sup> <sup>21</sup> 14.28
Iron ore (usable) . . . . .	Million metric tons.	63	6	15	71	<sup>4</sup> 225.00
Iron and steel slag (metal) . . . . .	1,000 metric tons.	18,000	20	8	19,000	<sup>4</sup> 8.60
Lead (contained) . . . . .	1,000 metric tons.	420	100	20	1,650	<sup>2</sup> 44.00
Lime . . . . .	1,000 metric tons.	18,700	90	(Z)	18,800	76.00
Magnesium compounds. . . . .	1,000 metric tons.	360	50	( <sup>5</sup> )	590	(NA)
Magnesium metal. . . . .	1,000 metric tons.	(D)	20	44	120	1.25
Mercury . . . . .	Metric tons . . . . .	<sup>11</sup> (NA)	50	(NA)	(NA)	<sup>26</sup> 140.00
Mica, scrap and flake . . . . .	1,000 metric tons.	95	10	19	118	<sup>4</sup> 140.00
Molybdenum (contained) . . . . .	Metric tons . . . . .	38,300	32,300	( <sup>5</sup> )	22,300	<sup>8</sup> 5.20
Nickel (contained) . . . . .	Metric tons . . . . .	-	9,040	56	128,000	<sup>2</sup> <sup>27</sup> 2.69
Nitrogen (fixed)-ammonia. . . . .	1,000 metric tons.	9,500	670	29	13,500	<sup>4</sup> 28150.00
Peat . . . . .	1,000 metric tons.	812	25	50	1,620	<sup>4</sup> 23.00
Perlite . . . . .	1,000 metric tons.	650	39	18	796	<sup>4</sup> 31.55
Phosphate rock . . . . .	1,000 metric tons.	34,200	50	2	(NA)	<sup>4</sup> 25.00
Platinum-group metals. . . . .	Kilograms . . . . .	(NA)	(NA)	(NA)	(NA)	<sup>17</sup> 29(NA)
Potash (K <sub>2</sub> O equivalent) . . . . .	1,000 metric tons.	1,200	410	80	5,400	<sup>4</sup> 30155.00
Pumice and pumicite. . . . .	1,000 metric tons.	687	25	35	1,050	<sup>4</sup> 24.53
Salt . . . . .	1,000 metric tons.	45,100	900	17	54,200	<sup>4</sup> 31117.00
Silicon (contained) . . . . .	1,000 metric tons.	301	25	42	518	(NA)
Silver (contained) . . . . .	Metric tons . . . . .	1,800	470	44	5,800	<sup>17</sup> 5.00
Sodium carbonate (soda ash) . . . . .	1,000 metric tons.	10,300	4,100	( <sup>5</sup> )	6,200	<sup>33</sup> 105.00
Sodium sulfate. . . . .	1,000 metric tons.	510	220	( <sup>5</sup> )	330	<sup>34</sup> 114.00
Stone (crushed) . . . . .	Million metric tons.	1,620	4	1	1,631	<sup>4</sup> 5.53
Sulfur (all forms) . . . . .	1,000 metric tons.	9,200	840	12	10,400	<sup>4</sup> 3518.00
Talc . . . . .	1,000 metric tons.	914	136	1	925	<sup>4</sup> 118.00
Thallium (contained) . . . . .	Kilograms . . . . .	-	(NA)	100	(NA)	<sup>8</sup> 1,295.00
Tin (contained) . . . . .	Metric tons . . . . .	<sup>11</sup> 15,500	6,800	88	56,900	<sup>2</sup> 219.00
Titanium dioxide. . . . .	1,000 metric tons.	1,340	432	( <sup>5</sup> )	1,100	<sup>2</sup> 361.00
Tungsten (contained) . . . . .	Metric tons . . . . .	-	5,140	59	14,000	<sup>37</sup> 64.00
Vermiculite . . . . .	1,000 metric tons.	150	5	27	205	114.00
Zinc (contained) . . . . .	1,000 metric tons.	830	532	60	1,500	<sup>2</sup> 0.45
Zirconium (Z <sub>02</sub> ) content . . . . .	Metric tons . . . . .	(D)	41,180	(D)	(NA)	<sup>4</sup> 39350

- Represents or rounds to zero. <sup>3</sup> D Withheld to avoid disclosure. NA Not available. <sup>1</sup> Calculated as a percent of apparent consumption. <sup>2</sup> Dollars per pound. <sup>3</sup> Refinery production. <sup>4</sup> Dollars per metric ton. <sup>5</sup> Net exporter. <sup>6</sup> Metal, vacuum-cast ingot. <sup>7</sup> Granulated pentahydrate borax in bulk, f.o.b. mine. <sup>8</sup> Dollars per kilogram. <sup>9</sup> Bulk, purified bromine. <sup>10</sup> 1- to 5-short ton lots. <sup>11</sup> Secondary production. <sup>12</sup> Turkish, chromite price. <sup>13</sup> Columbite price. <sup>14</sup> Value of imports, dollars per carat. <sup>15</sup> Reported consumption. <sup>16</sup> Zone refined. <sup>17</sup> Dollars per troy ounce. <sup>18</sup> Price of flake imports. <sup>19</sup> Includes employment at calcining plants. <sup>20</sup> 99.97% indium. <sup>21</sup> C.i.f. value, crude, per kilogram. <sup>22</sup> Price of eastern Canadian ore. <sup>23</sup> Delivered, No. 1 Heavy Melting composite price. <sup>24</sup> Year-end price. <sup>25</sup> 46%-48% Mn metallurgical ore, per unit contained Mn, c.i.f. U.S. ports. <sup>26</sup> Dollars per 76-pound flask. <sup>27</sup> London Metal Exchange cash price. <sup>28</sup> F.o.b. gulf coast. <sup>29</sup> Dealer price of platinum. <sup>30</sup> Price of K2O, muriate. <sup>31</sup> Vacuum and open pan, bulk, pellets and packaged, f.o.b. mine and plant. <sup>32</sup> Ferrosilicon, 50% Si. <sup>33</sup> Quoted year-end price, dense, bulk, f.o.b. Green River, WY, dollars per short ton. <sup>34</sup> Quoted price, bulk, f.o.b. works, East, dollars per short ton. <sup>35</sup> Elemental sulfur, f.o.b. mine and/or plant. <sup>36</sup> Rutile, list, year-end. <sup>37</sup> Dollars per unit W03 (7.93 kilograms of contained tungsten per unit). <sup>38</sup> All forms. <sup>39</sup> Price for imported zircon, f.o.b. U.S. east coast.

No. 865. Crude Oil, Natural Gas, and Natural Gas Liquids—Reserves by State: 1990 and 2000

[26,254 mil. bbl. represents 26,254,000,000 bbl. As of December 31. Proved reserves are estimated quantities of the mineral, which geological and engineering data demonstrate with reasonable certainty, to be recoverable in future years from known reservoirs under existing economic and operating conditions. Indicated reserves of crude oil are quantities other than proved reserves, which may become economically recoverable from existing productive reservoirs through the application of improved recovery techniques using current technology. Based on a sample of operators of oil and gas wells]

Area	1990				2000

No. 871. Coal and Coke—Summary: 1980 to 2000

[830 short tons represents 830,000,000 short tons. Includes coal consumed at mines. Demonstrated coal reserve base for United States on Jan. 1, 1997, was an estimated 508 billion tons. Recoverability varies between 40 and 90 percent for individual deposits; 50 percent or more of overall U.S. coal reserve base is believed to be recoverable]

No. 873. Demonstrated Coal Reserves by Type of Coal and Major Producing State: 2001

[In millions of short tons. As of January 1. The demonstrated reserve base represents the sum of coal in both measured and indicated resource categories of reliability. Measured resources of coal are estimates that have a high degree of geologic assurance from sample analyses and measurements from closely spaced and geological well known sample sites. Indicated resources are estimates based partly from sample and analyses and measurements and partly from reasonable geologic projections. For more information on the classification of coal resources and related terminology, see report cited below]

State	Type of coal					Method of mining	
	Total reserves	Anthracite	Bituminous	Sub-bituminous	Lignite	Under ground	Surface

## Section 19

# Energy and Utilities

This section presents statistics on fuel resources, energy production and consumption, electric energy, hydroelectric power, nuclear power, solar energy, wood energy, and the electric and gas utility industries. The principal sources are the U.S. Department of Energy's Energy Information Administration (EIA), the Edison Electric Institute, Washington, DC, and the American Gas Association, Arlington, VA. The Department of Energy was created in October 1977 and assumed and centralized the responsibilities of all or part of several agencies including the Federal Power Commission (FPC), the U.S. Bureau of Mines, the Federal Energy Administration, and the U.S. Energy Research and Development Administration. For additional data on transportation, see Section 23; on fuels, see Section 18; and on energy-related housing characteristics, see Section 20.

The EIA, in its *Annual Energy Review*, provides statistics and trend data on energy supply, demand, and prices. Information is included on petroleum and natural gas, coal, electricity, hydroelectric power, nuclear power, solar, wood, and geothermal energy. Among its annual reports are *Annual Energy Review*, *Electric Power Annual*, *Natural Gas Annual*, *Petroleum Supply Annual*, *State Energy Data Report*, *State Energy Price and Expenditure Report*, *Financial Statistics of Selected Electric Utilities*, *Performance Profiles of Major Energy Producers*, *Annual Energy Outlook*, and *International Energy Annual*. These various publications contain state, national, and international data on production of electricity, net summer capability of generating plants, fuels used in energy production, energy sales and consumption, and hydroelectric power. The EIA also issues the *Monthly Energy Review*, which presents current supply, disposition, and price data and monthly publications on petroleum, coal, natural

gas, and electric power. Data on residential energy consumption, expenditures, and conservation activities are available from EIA's Residential Energy Consumption Survey and are published every 4 years.

The Edison Electric Institute's monthly bulletin and annual *Statistical Year Book of the Electric Utility Industry for the Year* contain data on the distribution of electric energy by public utilities; information on the electric power supply, expansion of electric generating facilities, and the manufacture of heavy electric power equipment is presented in the annual *Year-End Summary of the Electric Power Situation in the United States*. The American Gas Association, in its monthly and quarterly bulletins and its yearbook, *Gas Facts*, presents data on gas utilities and financial and operating statistics.

**Btu conversion factors**—Various energy sources are converted from original units to the thermal equivalent using British thermal units (Btu). A Btu is the amount of energy required to raise the temperature of 1 pound of water 1 degree Fahrenheit (F) at or near 39.2 degrees F. Factors are calculated annually from the latest final annual data available; some are revised as a result. The following list provides conversion factors used in 2001 for production and consumption, in that order, for various fuels: Petroleum, 5.800 and 5.326 mil. Btu per barrel; total coal, 21.072 and 20.753 mil. Btu per short ton; and natural gas (dry), 1,025 Btu per cubic foot for both. The factors for the production of nuclear power and geothermal power were 10,623 and 21,017 Btu per kilowatt-hour, respectively. The fossil fuel steam-electric power plant generation factor of 10,346 Btu per kilowatt-hour was used for hydroelectric power generation and for wood and waste, wind, photovoltaic, and solar thermal energy consumed at electric utilities.

No. 879. Energy Consumption by End-Use Sector: 1970 to 2000

[There exists a discontinuity in the series between 1989 and 1990 due to the expanded coverage of nonelectric utility use of renewable energy beginning 1990. Btu=British thermal units. For Btu conversion factors, see source]

Year	Total con- sumption <sup>1</sup> (quad. Btu)	Residential and commercial (quad. Btu)	Industrial <sup>1</sup> (quad. Btu)	Transpor- tation (quad. Btu)	Percent of total		
					Residential and commercial	Industrial <sup>1</sup>	Transpor- tation
1970	67.86	22.13	29.63	16.10	32.6	43.7	23.7
1975	72.04	24.35	29.45	18.25	33.8	40.9	25.3
1980	78.44	26.55	32.19	19.70	33.9	41.0	25.1
1985	76.78	27.64	29.07	20.07	36.0	37.9	26.1
1990	84.34	29.22	32.42	22.54	34.6	38.4	26.7
1992	85.51	29.55	33.20	22.47	34.6	38.8	26.3
1993	87.30	30.62	33.46	22.89	35.1	38.3	26.2
1994	89.21	30.76	34.54	23.52	34.5	38.7	26.4
1995	90.94	31.61	34.95	23.97	34.8	38.4	26.4
1996	93.93	33.04	35.94	24.52	35.2	38.3	26.1
1997	94.34	32.96	36.16	24.82	34.9	38.3	26.3
1998 <sup>2</sup>	94.61	32.82	35.86	25.39	34.7	37.9	26.8
1999 <sup>2</sup>	96.87	35.83	37.96	26.31	37.0	39.2	27.2
2000	98.50	37.39	38.76	26.64	38.0	39.4	27.0

<sup>1</sup> Includes some fossil-fuel consumption at nonutilities. <sup>2</sup> There is a discontinuity in this time series between 1998 and 1999; beginning in 1999, nonutility consumption of fossil fuels is included in electric power sector consumption and the calculation for electrical system energy losses.

No. 884. Manufacturing Energy Consumption for all Purposes by Type of Fuel and Major Industry Group: 1998

[In trillions of Btu (23,783 represents 23,783,000,000,000). Estimates represented consumption of energy for all purposes (First Use) represents unduplicated demand for energy by manufacturers. "First Use" is all energy produced off-site, all energy produced onsite, either directly from captive mines and wells or as byproducts from nonenergy materials such as sawdust from furniture production, hydrogen from electrolysis of brine, nut shells from peanut processing.] Based on the Manufacturing Energy Consumption Survey and subject to sampling variability]

- Represents or rounds to zero. D Withheld to avoid disclosing data for individual establishments. S Withheld because Relative Standard Error is greater than 50 percent. X Not applicable. Z Less than 0.5 trillion Btu. North American Industrial Classification System: see text, Section 15. Business Enterprise. <sup>2</sup> Net electricity is obtained by aggregating purchases, transfers in, and generation from noncombustible renewable resources minus quantities sold and transferred out. Excludes electricity inputs from onsite cogeneration or generation from combustible fuels because that energy has already been included as generating fuel (for example, coal). <sup>3</sup> Includes Nos. 1, 2, and 4 fuel oils and Nos. 1, 2, and 4 diesel fuels. <sup>4</sup> Includes natural gas obtained from utilities, transmission pipelines, and any other supplier such as brokers and producers. <sup>5</sup> Liquid petroleum gas and natural gas liquids. <sup>6</sup> Includes net steam, and other energy that respondents indicated was used to produce heat and power or as feedstock/raw material inputs.

No. 893. Electric Utility Industry—Capability, Peak Load, and Capacity Margin: 1980 to 2000

[Excludes Alaska and Hawaii. Capability represents the maximum kilowatt output with all power sources available and with hydraulic equipment under actual water conditions, allowing for maintenance, emergency outages, and system operating requirements. Capacity margin is the difference between capability and peak load]

Year	Capability at the time of—				Noncoincident peak load		Capacity margin			
	Summer peak load (1,000 kW)		Winter peak load (1,000 kW)				Summer		Winter

Percent of total electric utility generation . . . . .	11.0	15.5	19.1	19.1	19.7	20.1	19.6	18.0	18.6	19.7	19.8	20.3
Capacity factor <sup>3</sup> . . . . .	56.3	58.0	66.0	70.5	73.8	77.4	76.2	71.1	78.2	85.3	88.1	89.3

<sup>1</sup> As of year-end. <sup>2</sup> Net summer capability is the peak steady hourly output that generating equipment is expected to supply to system load, exclusive of auxiliary and other power plant, as demonstrated by test at the time of summer peak demand. <sup>3</sup> Weighted average of monthly capacity factors. Monthly factors are derived by dividing actual monthly generation by the maximum possible generation for the month (hours in month times net maximum dependable capacity).

**No. 899. Nonutility Electric Power Producers—Summary by Type of Fuel:  
1990 to 1999**

[A nonutility power producer may be a corporation, person, agency, authority, or other legal entity or instrumentality that owns electric generating capacity and is not an electric utility. Nonutility power producers include qualifying cogenerators, qualifying small power producers, and other nonutility generators (including independent power producers) without a designated franchised service area, and which do not file forms listed in the Code of Federal Regulations, Title 18, Part 141]

- Represents zero. <sup>1</sup> A public water system that supplies water to the same population year-round. <sup>2</sup> A public water system that regularly supplies water to at least 25 of the same people at least 6 months per year, but not year-round. Some examples are schools, factories, and office buildings which have their own water systems. <sup>3</sup> A public water system that provides water in a place such as a gas station or campground where people do not remain for long periods of time.

## Section 20

# Construction and Housing

This section presents data on the construction industry and on various indicators of its activity and costs; on housing units and their characteristics and occupants; and on the characteristics and vacancy rates for commercial buildings. This edition contains data from the 2001 American Housing Survey.

The principal source of these data is the U.S. Census Bureau, which issues a variety of current publications. Construction statistics compiled by the Census Bureau appear in its *New Residential Construction* and *New Residential Sales* press releases and Web sites <<http://www.census.gov/const/www/>>. Statistics on expenditures by owners of residential properties are issued quarterly and annually in *Expenditures for Residential Upkeep and Improvements*. *Value of New Construction Put in Place* presents data on all types of construction and includes monthly composite cost indexes. Reports of the censuses of construction industries (see below) are also issued on various topics.

Other Census Bureau publications include the *Current Housing Reports* series, which comprises the quarterly *Housing Vacancies*, the quarterly *Market Absorption of Apartments*, the biennial *American Housing Survey* (formerly *Annual Housing Survey*), and reports of the censuses of housing and of construction industries. *Construction Review*, published quarterly by the International Trade Administration, U.S. Department of Commerce, contains many of the census series and other construction statistics series from the federal government and private agencies.

Other sources include the monthly *Dodge Construction Potentials* of F. W. Dodge Division, McGraw-Hill Information Systems Company, New York, NY, which presents national and state data on construction contracts; the National Association of Home Builders with state-level data on housing starts; the NATIONAL ASSOCIATION OF REALTORS®, which presents data

on existing home sales; the Society of Industrial and Office Realtors and Oncor International on commercial office and industrial space; the Bureau of Economic Analysis, which presents data on residential capital and gross housing product; and the U.S. Energy Information Administration, which provides data on commercial buildings through its periodic sample surveys.

**Censuses and surveys**—Censuses of the construction industry were first conducted by the Census Bureau for 1929, 1935, and 1939; beginning in 1967, a census has been taken every 5 years (through 1997, for years ending in “2” and “7”). The latest complete reports are for 1997. The 1997 census results are part of the 1997 Economic Census. See Table 910. See also text, Section 15, Business Enterprise.

The construction sector of the economic census, covers all employer establishments primarily engaged in (1) building construction by general contractors or operative builders; (2) heavy (nonbuilding) construction by general contractors; and (3) construction by special trade contractors. The 1997 census was conducted in accordance with the 1997 *North American Industry Classification System* (NAICS); the 1992 census was conducted in accordance with the 1987 *Standard Industrial Classification* (SIC). This sector now includes construction management and land subdividers and developers, not included previously. See text, Section 15, Business Enterprise, for general information on the SIC and NAICS.

From 1850 through 1930, the Census Bureau collected some housing data as part of its censuses of population and agriculture. Beginning in 1940, separate censuses of housing have been taken at 10-year intervals. For the 1970 and 1980 censuses, data on year-round housing

units were collected and issued on occupancy and structural characteristics, plumbing facilities, value, and rent; for 1990 such characteristics were presented for all housing units.

The American Housing Survey (*Current Housing Reports* Series H-150 and H-170), which began in 1973, provided an annual and ongoing series of data on selected housing and demographic characteristics until 1983. In 1984, the name of the survey was changed from the Annual Housing Survey. Currently, national data are collected every other year, and data for selected metropolitan areas are collected on a rotating basis. All samples represent a cross section of the housing stock in their respective areas. Estimates are subject to both sampling and nonsampling errors; caution should therefore be used in making comparisons between years.

Data on residential mortgages were collected continuously from 1890 to 1970,

except 1930, as part of the decennial census by the Census Bureau. Since 1973, mortgage status data, limited to single family homes on less than 10 acres with no business on the property, have been presented in the American Housing Survey. Data on mortgage activity are covered in Section 25, Banking and Finance.

**Housing units**—In general, a housing unit is a house, an apartment, a group of rooms or a single room occupied or intended for occupancy as separate living quarters; that is, the occupants live separately from any other individual in the building, and there is direct access from the outside or through a common hall. Transient accommodations, barracks for workers, and institutional-type quarters are not counted as housing units.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

# No. 911. Construction Materials—Producer Price Indexes: 1990 to 2001

[1982=100, except as noted. Data for 2001 are preliminary. For discussion of producer price indexes, see text, Section 14, Prices. This index, more formally known as the special commodity grouping index for construction materials, covers materials incorporated as integral part of a building or normally installed during construction and not readily removable. Excludes consumer durables such as kitchen ranges, refrigerators, etc. This index is not the same as the stage-of-processing index of intermediate materials and components for construction]

<sup>1</sup> Weighted average of the various indexes used to deflate the Construction Put in Place series. In calculating the index, the weights (i.e., the composition of current dollar estimates in 1996 by category) are held constant.  
<sup>2</sup> Derived ratio of total current to constant dollar Construction Put in Place (multiplied by 100).  
<sup>3</sup> Excludes value of site.  
<sup>4</sup> Based on average contract unit bid prices for composite mile (involving specific average amounts of excavation, paving, reinforcing steel, structural steel, and structural concrete).  
<sup>5</sup> Derived from the four quarterly indexes which are weighted averages of costs of labor, materials, and equipment for the construction of dams and reclamation projects.  
<sup>6</sup> Based on firm's cost experience with respect to labor rates, materials prices, competitive conditions, efficiency of plant and management, and productivity.  
<sup>7</sup> Building construction index computed on the basis of a hypothetical unit of construction requiring 6 bbl. of portland cement, 1,088 M bd. ft. of 2" x 4" lumber, 2,500 lb. of structural steel, and 68 38 hours of skilled labor. General construction index based on same materials components combined with 200 hours of common labor.  
<sup>8</sup> Based on data covering public utility construction costs in six geographic regions. Covers skilled and common labor.  
<sup>9</sup> As derived by U.S. Census Bureau. Covers steam generation plants only.  
<sup>10</sup> As derived by U.S. Census Bureau. Reflects costs for structures and improvements at water pumping and treatment plants.  
<sup>11</sup> Computed by the Census Bureau by averaging the weighted component indexes published for six geographic regions.

No. 913. Value of New Construction Put in Place: 1964 to 2001

[In millions of dollars (75,097 represents \$75,097,000,000). Represents value of construction put in place during year; differs from building permit and construction contract data in timing and coverage. Includes installed cost of normal building service equipment and selected types of industrial production equipment (largely site fabricated). Excludes cost of shipbuilding, land, and most types of machinery and equipment. For methodology, see Appendix III]

# No. 915. Value of Private Nonresidential Construction Put in Place: 1993 to 2001

[In millions of dollars (110,996 represents \$110,996,000,000). Represents value of construction put in place during year; differs from building permit and construction contract data in timing and coverage. Data are not directly comparable to Tables 913 and 914 due to a new classification system which bases project types on their end usage instead of building/nonbuilding and ownership types. See Appendix III]

No. 933. Vacancy Rates for Housing Units—Characteristics: 1990 to 2001

[In percent. Rate is relationship between vacant housing for rent or for sale and the total rental and homeowner supply, which comprises occupied units, units rented or sold and awaiting occupancy, and vacant units available for rent or sale. Based on the Current Population/ Housing Vacancy Survey; see source for details. For composition of regions, see map, inside front cover]

No. 951. Commercial Office Space—Overview for Selected Market Areas: 2001

[As of mid-October. (3,928,797 represents 3,928,797,000). For the 76 market areas with the highest vacancy rates in 2001. Data based on responses from individuals knowledgeable in the local markets]

Market area	Inventory (1,000 sq. ft.)	Vacant space (1,000 sq. ft.)	Vacancy rate (percent)	Construction (1,000 sq. ft.)	Net absorption <sup>1</sup> (1,000 sq. ft.)
United States, all market areas <sup>2</sup>	3,928,797	479,982	12.2	132,513	105,342
Akron	5,724	781	13.6	30	305
Albuquerque	11,744	1,306	11.1	81	111

## Section 21

# Manufactures

This section presents summary data for manufacturing as a whole and more detailed information for major industry groups and selected products. The types of measures shown at the different levels include data for establishments, employment and wages, plant and equipment expenditures, value and quantity of production and shipments, value added by manufacture, inventories, and various indicators of financial status.

The principal sources of these data are U.S. Census Bureau reports of the censuses of manufactures conducted every 5 years, the *Annual Survey of Manufactures*, and *Current Industrial Reports*. Reports on current activities of industries or current movements of individual commodities are compiled by such government agencies as the Bureau of Labor Statistics; the Economic Research Service of the Department of Agriculture; the International Trade Administration; and by private research or trade associations such as The Conference Board, Inc., the American Iron and Steel Institute, the Electronic Industries Association, and several others.

Data on financial aspects of manufacturing industries are collected by the Bureau of Economic Analysis (BEA) and the U.S. Census Bureau. Industry aggregates in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, and types and amounts of security issues are published for leading manufacturing corporations registered with the Securities and Exchange Commission. The BEA issues data on capital in manufacturing industries and capacity utilization rates in manufacturing. See also Section 15, Business Enterprise.

Several private trade associations provide industry coverage for certain sections of the economy. They include the Aluminum Association (Table 976), American Iron

and Steel Institute (Tables 977-979), Consumer Electronics Association (Tables 987 and 988), and the Aerospace Industries Association (Tables 995-997). Machine tool consumption data (Table 980) is produced jointly by the Association for Manufacturing Technology and American Machine Tool Distributors Association.

**Censuses and annual surveys**—The first census of manufactures covered the year 1809. Between 1809 and 1963, a census was conducted at periodic intervals. Since 1967, it has been taken every 5 years (for years ending in "2" and "7"). Results from the 1997 census are presented in this section utilizing the new NAICS (North American Industry Classification System). For additional information see text, Section 15, Business Enterprise, and the Census Bureau Web site at <<http://www.census.gov/epcd/www/NAICS.html>>. Census data either direct reports or estimates from administrative records, are obtained for every manufacturing plant with one paid employee or more.

The *Annual Survey of Manufactures* (ASM), conducted for the first time in 1949, collects data for the years between censuses for the more general measure of manufacturing activity covered in detail by the censuses. The annual survey data are estimates derived from a scientifically selected sample of establishments. The 1999 annual survey is based on a sample of about 55,000 establishments of an approximate total of 230,000. These establishments represent all manufacturing establishments of multiunit companies and all single-establishment manufacturing companies mailed schedules in the 1997 Census of Manufactures. For the current panel of the ASM sample, all establishments of companies with 1997 shipments in manufacturing in excess of \$500 million were included in the survey with certainty. For the remaining portion of the mail survey, the establishment was

defined as the sampling unit. For this portion, all establishments with 250 employees or more and establishments with a very large value of shipments also were included. Therefore, of the 58,000 establishments included in the ASM panel, approximately 33,000 are selected with certainty. These establishments account for approximately 80 percent of total value of shipments in the 1992 census. Smaller establishments in the remaining portion of the mail survey were selected by sample.

### **Establishments and classification—**

The censuses of manufactures for 1947 through 1992 cover operating manufacturing establishments as defined in the *Standard Industrial Classification Manual* (SIC), issued by the U.S. Office of Management and Budget (see text, Section 12). The Manual is also used for classifying establishments in the annual surveys. The comparability of manufactures data over time is affected by changes in the official definitions of industries as presented in the Manual. It is important to note, therefore, that the 1987 edition of the Manual was used for the 1987 and 1992 censuses; and the 1972 edition of the Manual and the 1977 Supplement were used for the 1972 through 1982 censuses.

The Manual defines an industry as a number of establishments producing a single product or a closely related group of products. In the manual, an establishment is classified in a particular industry if its production of a product or product group exceeds in value added its production of any other product group. While some establishments produce only the products of the industry in which they are classified, few within an industry specialize to

that extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect both the primary and secondary activities of the establishments in that industry. For this reason, care should be exercised in relating such statistics to the total shipments figures of products primary to the industry.

Most tables in this section use the new way of organizing economic statistics called the North American Industry Classification System (NAICS). For more information on this system, see *North American Industry Classification System (NAICS) - United States, 1997*.

**Establishment**—Establishment signifies a single physical plant site or factory. It is not necessarily identical to the business unit or company, which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a separate report for each location. An establishment engaged in distinctly different lines of activity and maintaining separate payroll and inventory records is also required to submit separate reports.

**Durable goods**—Items with a normal life expectancy of 3 years or more. Automobiles, furniture, household appliances, and mobile homes are common examples.

**Nondurable goods**—Items which generally last for only a short time (3 years or less). Food, beverages, clothing, shoes, and gasoline are common examples.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

# No. 954. Gross Domestic Product in Manufacturing in Current and Real (1996) Dollars by Industry: 1990 to 2000

[In billions of dollars (5,803.2 represents 5,803,200,000,000). Data are based on the 1987 Standard Industrial Classification (SIC). Data include nonfactor charges (capital consumption allowances, indirect business taxes, etc.) as well as factor charges against gross product; corporate profits and capital consumption allowances have been shifted from a company to an establishment basis]

<sup>1</sup> North American Industry Classification System, 1997; see Text, Section 15, Business. <sup>2</sup> Includes employment and payroll at administrative offices and auxiliary units. All employees represents the average of production workers plus all other employees for the payroll period ended nearest the 12th of March. Production workers represents the average of the employment for the payroll periods ended nearest the 12th of March, May, August, and November. <sup>3</sup> Adjusted value added; takes into account (a) value added by merchandising operations (that is, difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) net change in finished goods and work-in-process inventories between beginning and end of year. <sup>4</sup> Includes extensive and unmeasurable duplication from shipments between establishments in the same industry classification.

No. 959. Manufacturers' E-Commerce Shipments by Industry: 1999 and 2000

[In millions of dollars (4,031.882 represents \$4,031,882,000,000), except percent. Based on the Annual Survey of Manufacturers: subject to sampling variability. E-commerce is the value of goods and services sold over computer-mediated networks (open or proprietary). Online purchases are the cost of materials purchased over computer-mediated networks]

No. 971. Broadwoven and Knit Fabrics—Shipments and Foreign Trade: 2000

[3,717,511 represents 3,717,511,000. Fabric blends as shown in the report are reported based on the chief weight of the fiber; whereas, fabrics blends as shown for imports are based on the chief value of the fiber. Apparent consumption represents new domestic supply and is derived by subtracting exports for the total manufacturers' shipments plus imports]

Product description	Manufacturers' shipments (quantity)	Imports for consumption		Percent imports to manufacturers' shipments	Exports of domestic merchandise		Percent exports to manufacturers' shipments
		Quantity	Value <sup>1</sup> (\$1,000)		Quantity	Value (\$1,000)

## No. 973. Inorganic Chemicals and Fertilizers—Production: 1995 to 2000

[In thousands of short or metric tons (17,402 represents 17,402,000)]

Product description	Unit	1995	1996	1997	1998	1999	2000
<b>INORGANIC FERTILIZERS</b>							
Ammonia, synthetic anhydrous	1,000 sh. tons	17,402	17,923	17,891	18,475	17,337	16,806
Ammonium nitrate, original solution	1,000 sh. tons	8,489	8,498	8,604	9,079	7,630	7,498
Ammonium sulfate	1,000 sh. tons	2,647	2,662	2,711	2,787	2,875	2,868
Urea (100%)	1,000 sh. tons	8,117	8,548	8,190	8,865	8,907	7,621
Nitric acid (100%)	1,000 sh. tons	8,839	9,205	9,433	9,285	8,945	8,479
Phosphoric acid (100% P <sub>2</sub> O <sub>5</sub> )	1,000 sh. tons	13,134	13,210	13,159	13,891	13,708	13,143
Sulfuric acid, gross (100%)	1,000 sh. tons	47,519	47,770	47,929	48,513	44,756	44,032
Superphosphates and other fertilizer materials (100% P <sub>2</sub> O <sub>5</sub> )	1,000 sh. tons	10,364	10,547	10,473	10,260	9,133	8,921
<b>INORGANIC CHEMICALS</b>							
Chlorine gas	1,000 metric tons	12,395	12,460	12,922	11,650	12,114	11,912
Sodium hydroxide, total liquid	1,000 metric tons	11,408	11,563	11,972	11,896	11,974	10,449
Potassium hydroxide liquid	1,000 metric tons	(D)	500	533	450	430	489
Finished sodium bicarbonate	1,000 metric tons	520	502	522	493	505	487
Titanium dioxide, composite and pure	1,000 metric tons	1,382	1,352	1,477	1,323	1,355	1,404
Boric acid	1,000 metric tons	(D)	(D)	(D)	(D)	(NA)	(NA)
Hydrochloric acid	1,000 metric tons	3,904	4,116	4,411	4,226	4,191	4,280
Hydrofluoric acid	1,000 metric tons	(D)	(D)	(D)	(D)	(NA)	(NA)
Aluminum oxide	1,000 metric tons	4,764	4,734	5,072	4,537	4,016	(D)
Aluminum sulfate (commercial)	1,000 metric tons	1,144	1,197	1,161	1,058	1,052	990
Sodium metal	1,000 metric tons	(D)	(D)	(D)	(D)	(NA)	(NA)
Sodium chlorate	1,000 metric tons	617	662	626	707	742	852
Sodium phosphate tribasic	1,000 metric tons	21	20	(D)	19	27	(NA)
Sodium phosphate tripoly	1,000 metric tons	(D)	(D)	(D)	205	(D)	(D)
Sodium silicates	1,000 metric tons	1,203	1,105	1,214	1,097	992	1,034
Sodium metasilicates	1,000 metric tons	93	87	83	70	63	66
Sodium sulfate	1,000 metric tons	(D)	(D)	(D)	571	599	(NA)
Calcium carbide	1,000 metric tons	(D)	(D)	(D)	(D)	(NA)	(NA)
Calcium phosphorus	1,000 metric tons	1,567	1,507	1,486	1,798	1,808	(NA)
Carbon activated	1,000 metric tons	156	170	173	150	151	161
Hydrogen peroxide	1,000 metric tons	355	343	369	324	342	(S)
Phosphorus, elemental	1,000 metric tons	(D)	(D)	(D)	(D)	(NA)	(NA)
Phosphorous, oxychloride and trichloride	1,000 metric tons	226	242	298	(D)	163	(D)

D Withheld to avoid disclosing data for individual companies. NA Not available. <sup>1</sup> Other than metasilicates. <sup>2</sup> Granular and pulverized.

## No. 977. Iron and Steel Industry—Summary: 1990 to 2001

[95.5 represents 95,500,000 tons. For financial data, the universe in 1992 consists of the companies that produced 68 percent of the total reported raw steel production. The financial data represent the operations of the steel segment of the companies. Minus sign (-) indicates net loss]

Item	Unit	1990	1995	1996	1997	1998	1999	2000	2001, prel.
Steel mill products, apparent supply . . .	Mil. tons <sup>1</sup>	95.5	109.6	117.5	124.6	131.6	127.9	131.9	116.9
Net shipments . . .	Mil. tons	85.0	97.5	100.9	105.9	102.4	106.2	109.1	99.4
Exports . . .	Mil. tons <sup>1</sup>	4.3	7.1	5.0	6.0	5.5	5.4	6.5	6.1
Imports . . .	Mil. tons <sup>1</sup>	17.2	24.4	29.2	31.2	41.5	31.2	29.4	30.1

## No. 979. Steel Products—Net Shipments by Market Classes: 1990 to 2000

[In thousands of short tons (84,981 represents 84,981,000). Comprises carbon, alloy, and stainless steel]

Market class	1990	1995	1996	1997	1998	1999	2000
Total <sup>1</sup> . . .	84,981	97,494	100,878	105,858	102,420	106,201	109,050
Automotive . . .	11,100	14,622	14,665	15,251	15,842	16,771	16,063
Steel service centers, distributors . . .	21,111	23,751	27,124	27,800	27,751	28,089	30,108
Construction, incl. maintenance <sup>2</sup> . . .	9,245	14,892	15,561	15,885	15,289	18,428	20,290
Containers, packaging, shipping . . .	4,474	4,139	4,101	4,163	3,829	3,842	3,708
Machinery, industrial equipment, tools . . .	2,388	2,310	2,410	2,355	2,147	1,722	1,784
Steel for converting and processing . . .	9,441	10,440	10,245	11,263	9,975	11,309	12,708
Rail transportation . . .	1,080	1,373	1,400	1,410	1,657	1,031	1,307
Contractors' products . . .	2,870	( <sup>2</sup> )	( <sup>2</sup> )	( <sup>2</sup> )	( <sup>2</sup> )	( <sup>2</sup> )	( <sup>2</sup> )
Oil and gas industries . . .	1,892	2,643	3,254	3,811	2,649	2,151	2,885
Electrical equipment . . .	2,453	2,397	2,401	2,434	2,255	2,267	2,055
Appliances, utensils, and cutlery . . .	1,540	1,589	1,713	1,635	1,729	1,789	1,907

<sup>1</sup> Includes nonclassified shipments and other classes not shown separately. <sup>2</sup> Beginning 1994, contractors' products included with construction.

<sup>1</sup> North American Industrial Classification System, 1997; see Text, Section 15, Business Enterprise. <sup>2</sup> Includes employment and payroll at administrative offices and auxiliary units. All employees represents the average of production workers plus all other employees for the payroll period ended nearest the 12th of March. Production workers represents the average of the employment for the payroll periods ended nearest the 12th of March, May, August, and November. <sup>3</sup> Includes extensive and unmeasurable duplication from shipments between establishments in the same industry classification.

D Withheld to avoid disclosing data for individual companies. <sup>1</sup> Includes combination refrigerator-freezers. <sup>2</sup> Product code 33522210000 and 3352222000 are combined to avoid disclosing data for individual companies.

Source: U.S. Census Bureau, 1990, *Current Industrial Reports, Series MA36F*; thereafter Series MA335F. See also <<http://www.census.gov/ftp/pub/industry/11/ma335f01.pdf>> (issued August 2002).

## Section 22

# Domestic Trade

This section presents statistics relating to the distributive trades, specifically wholesale trade and retail trade. Data shown for the trades are classified by kind of business and cover sales or receipts, establishments, employees, payrolls, and other items. The principal sources of these data are from the Census Bureau and include the *1997 Economic Census* reports, annual survey reports, and the *County Business Patterns* program. These data are supplemented by several tables from trade associations such as the National Automobile Dealers Association (Table 1009). Several notable research groups are also represented such as Claritas (Table 1006), National Research Bureau and the International Council of Shopping Centers (Tables 1023 and 1024), Jupiter Media Matrix (Table 1018), and Forrester Research, Inc. (Table 1017).

Data on retail and wholesale trade appear in several other sections. For instance, labor force employment and earnings data (Table 603) appear in Section 12, Labor Force, Employment, and Earnings; gross domestic product of the industry (Table 632) appear in the Section 13, Income, Expenditures, and Wealth; financial data (several tables) from the quarterly *Statistics of Income Bulletin*, published by the Internal Revenue Service, appear in Section 15, Business Enterprise.

**Censuses**—Censuses of retail trade and wholesale trade have been taken at various intervals since 1929. Beginning with the 1967 census, legislation provides for a census of each area to be conducted every 5 years (for years ending in “2” and “7”). For more information on these censuses, see the *History of the 1997 Economic Census* found at <<http://www.census.gov/prod/ec97/pol00-hec.pdf>>. The industries covered in the censuses and surveys of business are those classified in 13 sectors defined in the *North American Industry Classification System*, called NAICS (see below). *Retail trade* refers to places of business primarily

engaged in retailing merchandise generally in small quantities to the general public; and *wholesale trade*, to establishments primarily engaged in selling goods to other businesses and normally operate from a warehouse or office that have little or no display of merchandise. All Census Bureau tables in this section are utilizing the new NAICS codes, which replaced the Standard Industrial Classification (SIC) system. NAICS makes substantial structural improvements and identifies over 350 new industries. At the same time, it causes breaks in time series far more profound than any prior revision of the previously used SIC system. For information on this system and how it affects the comparability of retail and wholesale statistics historically, see text, Section 15, Business Enterprise, and especially the Census Bureau Web site at <<http://www.census.gov/epcd/www/naics.html>>. In general, the 1997 Economic Census has two series of publications and documents for these two sectors subject series with reports on such as commodity line sales and establishment and firm sizes and geographic reports with individual reports for each state. For information on these series, see the Census Bureau Web site at <<http://www.census.gov/epcd/www/97EC42.htm>> and <<http://www.census.gov/epcd/www/97EC44.htm>>.

**Current surveys**—Current sample surveys conducted by the Census Bureau cover various aspects of the retail and wholesale trade. Its *Monthly Retail Trade and Food Services* contains monthly estimates of sales, inventories, and inventory/sales ratios, purchases, and accounts receivable for the United States, by kind of business. Annual figures on sales, year-end inventories, and inventory/sales ratios, by kind of business, appear in the *Annual Benchmark Report for Retail Trade and Food Services*. Statistics from the Bureau's monthly wholesale trade survey include national estimates of merchant wholesalers' sales, inventories, and inventory/sales ratios by

major summary groups “durable and non-durable,” and selected kinds of business. Merchant wholesalers are those wholesalers who take title to the goods they sell (e.g., jobbers, exporters, importers, industrial distributors). These data, based on reports submitted by a sample of firms, appear in the *Monthly Wholesale Trade Report*. Annual figures on sales, inventory/sales ratios, year-end inventories, and purchases appear in the *Annual Benchmark Report for Wholesale Trade*. The reports just mentioned may appear in print in some cases, but principally are available as documents on the Census Bureau Web site at <<http://www.census.gov/econ/www/retmenu.html>>.

**E-commerce**—Electronic commerce (or e-commerce) are sales of goods and services over the Internet and extranet, electronic data interchange (EDI), or other online systems. Payment may or may not be made online. This edition has several

tables on e-commerce sales such as Tables 1020 to 1022 in this section, 959 in Section 21, Manufactures, and 1247 in Section 27, Accommodation, Food Services, and Other Services. Also, there are several private sources for similar data such as Forrester Research Inc., Cambridge MA; BizRate.com, Los Angeles, CA; and Jupiter Media Matrix, New York, NY. These sources show estimated and projected online retail sales by key categories from business to consumers or to other businesses. Their methods of collecting the data vary widely between the sources and consequently these estimates of this activity vary also. Users of these estimates may want to contact the sources for descriptions of their methodology.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

No. 999. Wholesale and Retail Trade—Establishments, Employees, and Payroll by State: 1999 and 2000

[5,972 represents 5,972,000. Covers establishments with payroll. Employees are for the week including March 12. Excludes most government employees, railroad employees, and self-employed persons. Kind-of-business classification based on North American Industry Classification System (NAICS); see text, Section 15, Business Enterprise. For statement on methodology, see Appendix III]

State	Wholesale establishments (NAICS 42)						Retail establishments (NAICS 44, 45)

# No. 1023. Shopping Centers—Number, Gross Leasable Area, and Retail Sales by Gross Leasable Area: 1990 to 2001

[4,390 represents 4,390,000,000. As of December 31. A shopping center is a group of architecturally unified commercial establishments built on a site that is planned, developed, owned, and managed as an operating unit related in its location, size, and type of shops to the trade area that the unit serves. The unit provides on-site parking in definite relationship to the types and total size of the stores. The data base attempts to include all centers with three or more stores. Estimates are based on a sample of data available on shopping center properties; for details, contact source]

Year	Gross leasable area (sq. ft.)						
	Total	Less than 100,001	100,001-200,000	200,001-400,000	400,001-800,000	800,001-1,000,000	More than 1 million
<b>NUMBER</b>

## Section 23

# Transportation

This section presents data on civil air transportation, both passenger and cargo, and on water transportation, including inland waterways, oceanborne commerce, the merchant marine, cargo, and vessel tonnages.

This section also presents statistics on revenues, passenger and freight traffic volume, and employment in various revenue-producing modes of the transportation industry, including motor vehicles, trains, and pipelines. Data are also presented on highway mileage and finances, motor vehicle travel, accidents, and registrations; and characteristics of public transit, railroads, and pipelines.

Principal sources of air and water transportation data are the annual *National Transportation Statistics*, issued by the U.S. Bureau of Transportation Statistics; the *Annual Report* issued by the Air Transport Association of America, Washington, DC; and the annual *Waterborne Commerce of the United States* issued by the Corps of Engineers of the Department of the Army. In addition, the U.S. Census Bureau in its commodity transportation survey (part of the census of transportation, taken every 5 years through 1997, for years ending in "2" and "7") provides data on the type, weight, and value of commodities shipped by manufacturing establishments in the United States, by means of transportation, origin, and destination. The latest complete reports for 1997 are part of the 1997 Economic Census. See text, Section 15, Business Enterprise, for a discussion of the 1997 Economic Census.

Additional sources of data on water transportation include *Merchant Fleets of the World*, issued periodically by the U.S. Maritime Administration; *The Bulletin*, issued monthly by the American Bureau of Shipping, New York, NY; and the annual *World Fleet Statistics*.

The principal compiler of data on public roads and on operation of motor vehicles is the U.S. Department of Transportation's (DOT) Federal Highway Administration (FHWA). These data appear in FHWA's annual *Highway Statistics* and other publications.

The U.S. National Highway Traffic Safety Administration issues data on traffic accident deaths and death rates in two annual reports: the *Fact Book* and the *Fatal Accident Reporting System Annual Report*. DOT's Federal Railroad Administration presents data on accidents involving railroads in its annual *Accident/Incident Bulletin*, and the *Rail-Highway Crossing Accident/Incident and Inventory Bulletin*.

The data for the truck transportation component of the 1997 Economic Census are presented in the *Truck Inventory and Use Survey*.

Data are also presented in many nongovernment publications. Among them are the weekly and annual *Cars of Revenue Freight Loaded* and the annual *Yearbook of Railroad Facts*, both published by the Association of American Railroads, Washington, DC; *Transit Fact Book*, containing electric railway and motorbus statistics, published annually by the American Public Transit Association, Washington, DC.; *Accident Facts*, issued by the National Safety Council, Chicago, IL; and *Transportation in America*, issued by the Eno Foundation for Transportation, Westport, Connecticut.

**Civil aviation**—Federal promotion and regulation of civil aviation have been carried out by the FAA and the Civil Aeronautics Board (CAB). The CAB promoted and regulated the civil air transportation industry within the United States and between the United States and foreign countries. The Board granted licenses to provide air transportation service, approved or disapproved proposed rates and fares, and approved or disapproved

proposed agreements and corporate relationships involving air carriers. In December 1984, the CAB ceased to exist as an agency. Some of its functions were transferred to the Department of Transportation (DOT), as outlined below. The responsibility for investigation of aviation accidents resides with the National Transportation Safety Board.

The Office of the Secretary, DOT aviation activities include: negotiation of international air transportation rights, selection of U.S. air carriers to serve capacity controlled international markets, oversight of international rates and fares, maintenance of essential air service to small communities, and consumer affairs. DOT's Bureau of Transportation Statistics (BTS) handles aviation information functions formerly assigned to CAB. Prior to BTS, the Research and Special Programs Administration handled these functions.

The principal activities of the FAA include: the promotion of air safety; controlling the use of navigable airspace; prescribing regulations dealing with the competency of airmen, airworthiness of aircraft and air traffic control; operation of air route traffic control centers, airport traffic control towers, and flight service stations; the design, construction, maintenance, and inspection of navigation, traffic control, and communications equipment; and the development of general aviation.

The CAB published monthly and quarterly financial and traffic statistical data for the certificated route air carriers. BTS continues these publications, including both certificated and noncertificated (commuter) air carriers. The FAA publishes annually data on the use of airway facilities; data related to the location of airmen, aircraft, and airports; the volume of activity in the field of nonair carrier (general aviation) flying; and aircraft production and registration.

General aviation comprises all civil flying (including such commercial operations as small demand air taxis, agriculture application, powerline patrol, etc.) but excludes certificated route air carriers, supplemental operators, large-aircraft commercial operators, and commuter airlines.

**Air carriers and service**—The CAB previously issued "certificates of public convenience and necessity" under Section 401 of the Federal Aviation Act of 1958 for scheduled and nonscheduled (charter) passenger services and cargo services. It also issued certificates under Section 418 of the Act to cargo air carriers for domestic all-cargo service only. The DOT Office of the Secretary now issues the certificates under a "fit, willing, and able" test of air carrier operations. Carriers operating only a 60-seat-or-less aircraft are given exemption authority to carry passengers, cargo, and mail in scheduled and nonscheduled service under Part 298 of the DOT (formerly CAB) regulations. Exemption authority carriers who offer scheduled passenger service to an essential air service point must meet the "fit, willing, and able" test.

**Vessel shipments, entrances, and clearances**—Shipments by dry cargo vessels comprise shipments on all types of watercraft, except tanker vessels; shipments by tanker vessels comprise all types of cargo, liquid and dry, carried by tanker vessels.

A vessel is reported as entered only at the first port which it enters in the United States, whether or not cargo is unloaded at that port. A vessel is reported as cleared only at the last port at which clearance is made to a foreign port, whether or not it takes on cargo. Army and Navy vessels entering or clearing without commercial cargo are not included in the figures.

**Units of measurement**—Cargo (or freight) tonnage and shipping weight both represent the gross weight of the cargo including the weight of containers, wrappings, crates, etc. However, shipping weight excludes lift and cargo vans and similar substantial outer containers. Other tonnage figures generally refer to stowing capacity of vessels, 100 cubic feet being called 1 ton. Gross tonnage comprises the space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers, or crew, with certain minor exceptions. Net or registered tonnage is the gross tonnage less the spaces occupied by the propelling machinery,

fuel, crew quarters, master's cabin, and navigation spaces. Substantially, it represents space available for cargo and passengers. The net tonnage capacity of a ship may bear little relation to weight of cargo. Deadweight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is, therefore, the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety.

**Federal-aid highway systems**—The Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 eliminated the historical Federal-Aid Highway Systems and created the National Highway System (NHS) and other federal-aid highway categories. The final NHS was approved by Congress in December of 1995 under the National Highway System Designation Act.

**Functional systems**—Roads and streets are assigned to groups according to the character of service intended. The functional systems are (1) arterial highways that generally handle the long trips, (2) collector facilities that collect and disperse traffic between the arterials and the lower systems, and (3) local roads and streets that primarily serve direct access to residential areas, farms, and other local areas.

**Regulatory bodies**—The ICC, created by the U.S. Congress to regulate transportation in interstate commerce, has jurisdiction over railroads, trucking companies, bus lines, freight forwarders, water carriers, coal slurry pipelines, and transportation brokers. The Federal Energy Regulatory Commission is responsible for setting rates and charges for transportation and sale of natural gas and for establishing rates or charges for transportation.

**Motor carriers**—For 1960-73, Class I for-hire motor carriers of freight were classified by the ICC as those with \$1 million or more of gross annual operating revenue; 1974-79, the class minimum was \$3 million. Effective January 1, 1980, Class I carriers are those with \$5 million or more in revenue. For 1960-68, Class I motor carriers of passengers were classified by the

ICC as those with \$200,000 or more of gross annual operating revenue; for 1969-76, as those with revenues of \$1 million or more; and since 1977, as those with \$3 million or more. Effective January 1, 1988, Class I motor carriers of passengers are those with \$5 million or more in operating revenues; Class II less than \$5 million in operating revenues.

**Railroads**—Railroad companies reporting to the ICC are divided into specific groups as follows: (1) Regular line-haul (interstate) railroads (and their nonoperating subsidiaries), (2) switching and terminal railroads, (3) private railroads prior to 1964 (identified by ICC as "circular" because they reported on brief circulars), and (4) unofficial railroads, so designated when their reports are received too late for tabulation. For the most part, the last three groups are not included in the statistics shown here.

For years prior to 1978, Class I railroads were those with annual revenues of \$1 million or more for 1950-55; \$3 million or more for 1956-64; \$5 million or more for 1965-75; and \$10 million or more for 1976-77. In 1978, the classification became Class I, those having more than \$50 million gross annual operating revenue; Class II, from \$10 million to \$50 million+; and Class III, less than \$10 million. Effective January 1, 1982, the ICC adopted a procedure to adjust the threshold for inflation by restating current revenues in constant 1978 dollars. In 1988, the criteria for Class I and Class II railroads were \$92.0 million and \$18.4 million, respectively. Also effective January 1, 1982, the ICC adopted a Carrier Classification Index Survey Form for carriers not filing annual report Form R-1 with the commission. Class II and Class III railroads are currently exempted from filing any financial report with the Commission. The form is used for reclassifying carriers.

The Surface Transportation Board (STB) was established pursuant to the ICC Termination Act of 1995, Pub. L. No. 104-88, 109 Stat. 803 (1995) (ICCTA), to assume certain of the regulatory functions that had been administered by the Interstate Commerce Commission. The Board has broad economic regulatory oversight of railroads, addressing such matters as rate

reasonableness, car service and interchange, mergers and line acquisitions, line construction, and line abandonments. 49 U.S.C. 10101-11908. Other ICC regulatory functions were either eliminated or transferred to the Federal Highway Administration or the Bureau of Transportation Statistics within DOT.

Class I Railroads are regulated by the STB and subject to the Uniform System of Accounts and required to file annual and periodic reports. Railroads are classified based on their annual operating revenues. The class to which a carrier belongs is determined by comparing its adjusted operating revenues for 3 consecutive years to the following scale: Class I, \$250 million or more, Class II \$20 million to \$250 million, and Class III \$0 to 20 million.

**Postal Service**—The Postal Service provides mail processing and delivery services within the United States. The Postal Reorganization Act of 1970 created the Postal Service, effective July 1971, as an independent establishment of the Federal Executive Branch.

Revenue and cost analysis describes the Postal Service's system of attributing revenues and costs to classes of mail and service. This system draws primarily upon probability sampling techniques to develop estimates of revenues, volumes, and weights, as well as costs by class of mail and special service. The costs attributed to classes of mail and special services are primarily incremental costs which vary in response to changes in volume; they account for roughly 60 percent of the total costs of the Postal Service. The balance represents "institutional costs." Statistics on revenues, volume of mail, and distribution of expenditures are presented in the Postal Service's annual report, *Cost and Revenue Analysis*, and its *Annual Report of the Postmaster General* and its annual *Comprehensive Statement on Postal Operations*.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

No. 1028.Transportation-Related Components of U.S. Gross Domestic Product: 1980 to 2000

[In billions dollars (349.4 represents \$349,400,000,000), except percent]

Item	1980	1985	1990	1995	2000

## No. 1030. Volume of Domestic Intercity Freight and Passenger Traffic by Type of Transport: 1980 to 1999

[Freight traffic in bil. ton-miles (2,487 represents 2,487,000,000,000); passenger traffic in bil. passenger-miles. A ton-mile is the movement of 1 ton (2,000 pounds) of freight for the distance of 1 mile. A passenger-mile is the movement of one passenger for the distance of 1 mile. Comprises public and private traffic, both revenue and nonrevenue. ICC = Interstate Commerce Commission]

NA Not available. <sup>1</sup> Data on deaths are from U.S. National Highway Traffic Safety Administration and are based on 30 day definition. Includes only police reported crashes. For more detail, see Table 1077. <sup>2</sup> Accidents which result in damages to railroad property. Grade crossing accidents are also included when classified as a train accident. Deaths exclude fatalities in railroad-highway grade crossing accidents. <sup>3</sup> Includes scheduled and nonscheduled (charter) air carriers. Represents serious injuries. <sup>4</sup> All scheduled service. Represents serious injuries. <sup>5</sup> All nonscheduled service. Represents serious injuries. <sup>6</sup> Accidents resulting in death; injury or requiring medical treatment beyond first aid; damages exceeding \$500; or a person's disappearance. <sup>7</sup> Beginning 1990, pipeline accidents/incidents are credited to year of occurrence; 1980 data are credited to the year filed. <sup>8</sup> Covers accidents involving commercial vessels which must be reported to U.S. Coast Guard if there is property damage exceeding \$25,000; material damage affecting the seaworthiness or efficiency of a vessel; stranding or grounding; loss of life; or injury causing a person's incapacity for more than 3 days. <sup>9</sup> Reporting criteria and source of data changed between 1989 and 1990; these data from 1990 to present are not comparable to earlier years. <sup>10</sup> Accidents, deaths, and injuries involving hazardous materials cover all types of transport.

## No. 1042. On-Time Flight Arrivals and Departures at Major U.S. Airports: 2001

[In percent. Quarterly, based on gate arrival and departure times for domestic scheduled operations of U.S. major airlines. All U.S. airlines with 1 percent or more of total U.S. domestic scheduled airline passenger revenues are required to report on-time data. A flight is considered on time if it operated less than 15 minutes after the scheduled time shown in the carrier's computerized reservation system. Cancelled and diverted flights are considered late. See source for data on individual airlines]

No. 1044. Commuter/Regional Airline Operations—Summary: 1980 to 2000

[Calendar year data (14.8 represents 14,800,000). Commuter/regional airlines operate primarily aircraft of predominately 75 passengers or less and 18,000 pounds of payload capacity serving short haul and small community markets. Represents operations within all North America by U.S. Regional Carriers. Averages are means. For definition of mean, see Guide to Tabular Presentation]

Item	Unit	1980	1985	1990	1995	1997	1998	1999	2000
Passenger carriers operating . . . . .	Number.	214	179	150	124	104	97	97	94
Passengers enplaned . . . . .	Millions	14.8	126.0	42.1	57.2	66.3	71.1	78.1	84.6
Average passengers enplaned per carrier . . . . .	1,000	69.2	152.4	277.5	461.4	637.5	733.0	804.7	830.4
Revenue passenger miles (RPM) . . . . .	Billions	1.92	14.41	7.61	12.75	15.30	17.42	20.81	25.27
Average RPMs per carrier . . . . .	Millions	8.97	124.64	50.75	102.80	147.09	179.64	214.49	268.83
Airports served . . . . .	Number.	732	854	811	780	766	773	734	729
Average trip length . . . . .	Miles.	129	173	183	223	231	245	267	299
Passenger aircraft operated . . . . .	Number.	1,339	1,745	1,917	2,138	2,104	2,150	2,187	2,271
Average seating capacity (seats). . . . .	Number.	13.9	19.2	22.1	24.6	25.9	27.7	29.8	31.8
Fleet flying hours . . . . .	1,000	1,740	2,854	3,447	4,659	4,695	4,631	5,058	5,363
Average annual utilization per aircraft. . . . .	Hours	1,299	1,635	1,798	2,179	2,231	2,154	2,313	2,368

<sup>1</sup> Adjusted to exclude a merger in 1986. <sup>2</sup> Prior to 1995, utilization results reflected airborne rather than block hours. Data inclusive of carriers which may have operated during only part of calendar year 1996.

**No. 1046. Federal Expenditures for Civil Functions of the Corps of Engineers, United States Army: 1970 to 1999**

[In millions of dollars (1,128 represents \$1,128,000,000). For fiscal years ending in year shown, see text, Section 8, State and Local Government Finances and Employment. These expenditures represent the work of the Corps of Engineers to plan, design, construct, operate, and maintain civil works projects and activities, particularly in the management and improvement of rivers, harbors, and waterways for navigation, flood control, and multiple purposes. The amounts listed below do not include the expenditure of funds contributed, advanced, or reimbursed by other government agencies or local interests. Includes Puerto Rico and outlying areas]

<sup>1</sup> Bridges are structurally deficient if they have been restricted to light vehicles, require immediate rehabilitation to remain open, or are closed. <sup>2</sup> Bridges are functionally obsolete if they have deck geometry, load carrying capacity, clearance or approach roadway alignment that no longer meet the criteria for the system of which the bridge is a part.

No. 1065. State Motor Vehicle Registrations, 1980 to 2000, and Licensed Drivers and Motorcycle Registrations by State: 2000

[In thousands (155,796 represents 155,796,000). Motor vehicle registrations cover publicly, privately, and commercially owned vehicles. For uniformity, data have been adjusted to a calendar-year basis as registration years in states differ; figures represent net numbers where possible, excluding re-registrations and nonresident registrations. See also Table 1062]

State	Motor vehicle registrations <sup>1</sup>								2000	
	2000							Auto- mobiles (incl. taxi)	Motor- cycle registra- tion (incl. official) <sup>2</sup>	Licensed drivers

No. 1068. National Personal Transportation Survey (NPTS)—Summary of Travel Trends: 1969 to 1995

[87,284 represents 87,284,000,000. Data obtained by collecting information on all trips taken by the respondent on a specific day (known as travel day), combined with longer trips taken over a 2-week period (known as travel period). For compatibility with previous survey data, all data are based only on trips taken during travel day. Be aware that terminology changes from survey to survey. See source for details. 1995 data not comparable with previous years]

No. 1071. Fatal Motor Vehicle Accidents—National Summary: 1990 to 2000

[Based on data from the Fatal Accident Reporting System (FARS). FARS gathers data on accidents that result in loss of human life. FARS is operated and maintained by National Highway Traffic Safety Administration's (NHTSA) National Center for Statistics and Analysis (NCSA). FARS data are gathered on motor vehicle accidents that occurred on a roadway customarily open to the public, resulting in the death of a person within 30 days of the accident. Collection of these data depend on the use of police, hospital, medical examiner/coroner, and Emergency Medical Services reports; State vehicle registration, driver licensing, and highway department files; and vital statistics documents and death certificates. See source for further detail]

<sup>1</sup> See text, this section, for definition of Class I. <sup>2</sup> Average midmonth count. <sup>3</sup> Represents the aggregate length of roadway of all line-haul railroads. Excludes yard tracks, sidings, and parallel lines. (Includes estimate for class II and III railroads). <sup>4</sup> Includes multiple main tracks, yard tracks, and sidings owned by both line-haul and switching and terminal. (Includes estimate for class II and III railroads). <sup>5</sup> Includes cars owned by all railroads, private car companies, and shippers. <sup>6</sup> Class I railroads only. <sup>7</sup> Includes State income taxes. <sup>8</sup> Includes payroll, income, and other taxes. <sup>9</sup> Revenue and nonrevenue freight. <sup>10</sup> Source: Federal Railroad Admin., *Accident Bulletin*, annual. Includes highway grade crossing casualties.

Source: Except as noted, Association of American Railroads, Washington, DC, *Railroad Facts, Statistics of Railroads of Class I*, annual, and *Analysis of Class I Railroads*, annual.

# No. 1090. Railroads, Class I-Cars of Revenue Freight Loaded, 1970 to 2001, and by Commodity Group, 2000 and 2001

[In thousands (27,160 represents 27,160,000). Figures are 52-week totals]

Year	Car-loads <sup>1</sup>	Commodity group	Carloads		Commodity group	Carloads	
			2000 <sup>3</sup>	2001, <sup>3</sup> prel.		2000 <sup>3</sup>	2001, <sup>3</sup> prel.
1970	27,160	Coal	6,620	6,978	Metals and products	661	593
1980	22,598	Metallic ores	301	228	Stone, clay, and glass products	500	483
1990	16,177	Chemicals, allied products	1,485	1,405	Crushed stone, gravel, sand	841	879
1993	15,911	Grain	1,119	1,117	Nonmetallic minerals	419	360
1994	16,763	Motor vehicles and equipment	1,282	1,200	Waste and scrap materials	466	434
1995	16,763	Pulp, paper, allied products	469	427	Lumber, wood products	275	267
1996 <sup>2</sup>	16,521	Primary forest products	246	213	Coke	200	193
1997 <sup>2</sup>	16,568	Food and kindred products	428	444	Petroleum products	296	294
1998 <sup>2</sup>	16,914	Grain mill products	451	468	All other carloads	298	296
1999 <sup>2</sup>	16,407						
2000 <sup>3</sup>	16,354						
2001 <sup>3</sup>	16,280						

<sup>1</sup> Beginning 1990 excludes intermodal. <sup>2</sup> Excludes 2 Class I railroads. <sup>3</sup> Excludes 3 Class I railroads.

## Information and Communications

This section presents statistics on the various information and communications media: publishing, including newspapers, periodicals, books, and software; motion pictures, sound recordings, broadcasting, and telecommunications; and information services, such as libraries. Statistics on computer use and Internet access are also included. Data on the usage, finances, and operations of the Postal Service previously shown in this section are now presented in Section 23, Transportation.

**Information industry**—The U.S. Census Bureau's *Service Annual Survey, Information Services Sector*, provides estimates of operating revenue of taxable firms and revenues and expenses of firms exempt from federal taxes for industries in the information sector of the economy. Similar estimates were previously issued in the *Annual Survey of Communications Services*. Data beginning 1998 are based on the North American Industry Classification System (NAICS) and the information sector is a newly created economic sector. It comprises establishments engaged in the following processes: (a) producing and distributing information and cultural products, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data. It includes establishments previously classified in the Standard Industrial Classification (SIC) in manufacturing (publishing); transportation, communications, and utilities (telecommunications and broadcasting); and services (software publishing, motion picture production, data processing, online information services, and libraries).

This new sector is comprised of industries which existed previously, were revised from previous industry definitions, or are completely new industries. Among those which existed previously are newspaper publishers, motion picture and video production, and online information services.

Revised industries include book publishers and libraries and archives. Newly created industries include database and directory publishers, record production, music publishers, sound recording studios, cable networks, wired telecommunications carriers, paging, and satellite telecommunications. The following URL contains detailed information about NAICS and provides a comparison of the SIC and NAICS <<http://www.census.gov/epcd/www/naics.html>>. See also the text in Section 15, Business Enterprise.

The 1997 Economic Census was the first economic census to cover the new information sector of the economy. The census, conducted every 5-years, for the years ending "2" and "7," provides information on the number of establishments, receipts, payroll, and paid employees for the United States and various geographic levels.

The Federal Communications Commission (FCC), established in 1934, regulates wire and radio communications. Only the largest carriers and holding companies file annual financial reports which are publicly available. The FCC has jurisdiction over interstate and foreign communication services but not over intrastate or local services. The gross operating revenues of the telephone carriers reporting publicly available data annually to the FCC, however, are estimated to cover about 90 percent of the revenues of all U.S. telephone companies. Data are not comparable with Census Bureau *Annual Survey* because of coverage and different accounting practices for those telephone companies which report to the FCC.

Reports filed by the broadcasting industry cover all radio and television stations operating in the United States. The private radio services represent the largest and most diverse group of licensees regulated by the FCC. These services provide voice, data communications, point-to-point, and point-to-multipoint radio communications

for fixed and mobile communicators. Major users of these services are small businesses, the aviation industry, the maritime trades, the land transportation industry, the manufacturing industry, state and local public safety and governmental authorities, emergency medical service providers, amateur radio operators, and personal radio operations (CB and the General Mobile Radio Service). The FCC also licenses entities as private and common carriers. Private and common carriers provide fixed and land mobile communications service on a for-profit basis. Principal sources of wire, radio, and television data are the FCC's *Annual Report* and its annual *Statistics of Communications Common Carriers*.

Statistics on publishing are available from the Census Bureau, as well as from various private agencies. Editor & Publisher Co., New York, NY, presents annual data on the number and circulation of daily and Sunday newspapers in its *International Year Book*. Data on book production

and prices are available from Information Today, Medford, NJ. The Book Industry Study Group, New York, NY, collects data on books sold and domestic consumer expenditures. Book purchasing data are from Ipsos, NPD, Inc., Rosemont, IL. Data on academic and public libraries are collected by the U.S. National Center for Education Statistics. Public library data are also gathered by Information Today, Medford, NJ, and the National Commission on Libraries and Information Science, Washington, DC.

**Advertising**—Data on advertising previously shown in this section are now presented in Section 27, Accommodation, Food Services, and Other Services.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

## No. 1096. Information Industries—Establishments, Receipts, Payroll, and Employees by Kind of Business (NAICS Basis): 1997

## No. 1123. Telecommunications—Estimated Revenue and Expenses: 1999 and 2000

[In millions of dollars (\$18,097 represents \$318,097,000,000), except percent. For taxable and tax-exempt employer firms. Except for NAICS 51332, wireless telecommunications carriers (except satellite), estimates have been adjusted to the results of the 1997 Economic Census. Based on the North American Industry Classification System; see text, this section, and Section 15, Business Enterprise. Minus sign (-) indicates decrease. See Table 1124 for wireless telecommunications carriers, NAICS 51332]

Item	Telecommunications (NAICS 5133)			Wired telecommunications carriers (NAICS 51331)

NA Not available. <sup>1</sup> Gross operating revenues, gross plant, and total assets of reporting carriers estimated at more than 90 percent of total industry. New accounting rules became effective in 1990; prior years may not be directly comparable on a one-to-one basis. Includes Virgin Islands, and prior to 1994, Puerto Rico. <sup>2</sup> The reporting threshold for carriers is \$100 million in annual operating revenue. <sup>3</sup> Excludes taxes. <sup>4</sup> After tax deductions. <sup>5</sup> Based on surveys conducted by FCC. <sup>6</sup> Beginning 1994, data are for all U.S. points, and include calls to and from Alaska, Hawaii, Puerto Rico, Guam, the U.S. Virgin Islands, and offshore U.S. points. Beginning 1994, carriers first started reporting traffic to and from Canada and Mexico. Data for Canada and Mexico in prior years are staff estimates.

# No. 1127. Cellular Telephone Industry: 1990 to 2001

[Calendar year data, except as noted (5,283 represents 5,283,000). Based on a survey mailed to all cellular, personal communications services, and enhanced special mobile radio (ESMR) systems. For 2001 data, the universe was 2,587 systems and the response rate was 87 percent. The number of operational systems beginning 2000 differs from that reported for previous periods as a result of the consolidated operation of ESMR systems in a broader service area instead of by a city-to-city basis]

Item	Unit	1990	1995	1996	1997	1998	1999	2000	2001
Systems	Number	751	1,627	1,740	2,228	3,073	3,518	2,440	2,587
Subscribers	1,000	5,283	33,786	44,043	55,312	69,209	86,047	109,478	128,375

Average monthly bill <sup>3</sup>	Dollars	80.90	51.00	47.70	42.78	39.43	41.24	45.27	47.37
Average length of call <sup>3</sup>	Minutes	2.20	2.15	2.32	2.31	2.39	2.38	2.56	2.74

<sup>1</sup> The basic geographic unit of a wireless PCS or cellular system. A city or county is divided into smaller "cells," each of which is equipped with a low-powered radio transmitter/receiver. The cells can vary in size depending upon terrain, capacity demands, etc. By controlling the transmission power, the radio frequencies assigned to one cell can be limited to the boundaries of that cell. When a wireless PCS or cellular phone moves from one cell toward another, a computer at the Switching Office monitors the movement and at the proper time, transfers or hands off the phone call to the new cell and another radio frequency. <sup>2</sup> Service revenue generated by subscribers' calls outside of their system areas. <sup>3</sup> As of December 31.

No. 1130. Libraries—Number by Type:1980 to 2000

Type	1980	1985	1990	2000	Type	1980	1985	1990	2000
Total <sup>1</sup> . . . . .	31,564	32,323	34,613	37,024	Junior college . . .	1,191	1,188	1,233	1,283
United States . . .	28,638	29,843	30,761	32,914	Colleges, universities . . .	3,400	3,846	3,360	3,494
Public . . . . .	8,717	8,849	9,060	9,480	Departmental . . .	1,489	1,824	1,454	1,454
Public branches . . .	5,936	6,330	5,833	6,957	Law, medicine, religious . . .	269	531	501	418
Special <sup>2</sup> . . . . .	7,649	7,530	9,051	9,948	Government . . . . .	1,260	1,574	1,735	1,411
Medicine . . . . .	1,674	1,667	1,861	1,955	Armed Forces . . . .	485	526	489	341
Religious . . . . .	913	839	946	1,015	Outlying areas . . .	113	114	110	(NA)
Law <sup>3</sup> . . . . .	417	435	647	1,172					
Academic . . . . .	4,591	5,034	4,593	4,777					

NA Not available. <sup>1</sup> Includes Canadian libraries, and libraries in regions administered by the United States, not shown separately. Data are exclusive of elementary and secondary school libraries. Law libraries with fewer than 10,000 volumes are included only if they specialize in a particular field. <sup>2</sup> Includes other types of special libraries, not shown separately. Increase between 1985 and 1990 is due mainly to revised criteria for identifying special libraries and improved methods of counting. <sup>3</sup> Increase in 2000 due to increased effort in identifying special libraries.

## Banking, Finance, and Insurance

This section presents data on the nation's finances, various types of financial institutions, money and credit, securities, insurance, and real estate. The primary sources of these data are publications of several departments of the federal government, especially the Treasury Department, and independent agencies such as the Federal Deposit Insurance Corporation, the Federal Reserve System, and the Securities and Exchange Commission. National data on insurance are available primarily from private organizations, such as the American Council of Life Insurers.

**Flow of funds**—The flow of funds accounts of the Federal Reserve System bring together statistics on all of the major forms of financial instruments to present an economy-wide view of asset and liability relationships. In flow form, the accounts relate borrowing and lending to one another and to the nonfinancial activities that generate income and production. Each claim outstanding is included simultaneously as an asset of the lender and as a liability of the debtor. The accounts also indicate the balance between asset totals and liability totals over the economy as a whole. Several publications of the Board of Governors of the Federal Reserve System contain information on the flow of funds accounts: Summary data on flows and outstandings, in the *Federal Reserve Bulletin*, and *Flow of Funds Accounts of the United States* (quarterly); and concepts and organization of the accounts, in *Guide to the Flow of Funds Accounts* (2000). Data are also available at the Boards Web site <<http://www.federalreserve.gov/releases/>>.

**Banking system**—Banks in this country are organized under the laws of both the states and the federal government and are regulated by several bank supervisory agencies. National banks are supervised by the Comptroller of the Currency. *Reports of Condition* have been collected

from national banks since 1863. Summaries of these reports are published in the Comptroller's *Annual Report*, which also presents data on the structure of the national banking system.

The Federal Reserve System was established in 1913 to exercise central banking functions, some of which are shared with the U.S. Treasury. It includes national banks and such state banks that voluntarily join the system. Statements of state bank members are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the system. Balance sheet data for member banks and other commercial banks are published quarterly in the *Federal Reserve Bulletin*. The Federal Deposit Insurance Corporation (FDIC), established in 1933, insures each depositor up to \$100,000. Major item balance sheet and income data for all commercial banks are published in the *FDIC Quarterly Banking Profile*. This publication is also available on the Internet at the following address: <<http://www.fdic.gov>>. Balance sheet and income data for individual institutions are also available at this site in the Institution Directory (ID) system.

The FDIC is the primary federal regulator of state-chartered banks that are not members of the Federal Reserve System and of most savings banks insured by the Bank Insurance Fund (BIF). The agency also has certain backup supervisory authority, for safety and soundness purposes, over state-chartered banks that are members of the Federal Reserve System, national banks, and savings associations.

**Savings institutions**—Savings institutions are primarily involved in credit extension in the form of mortgage loans. Statistics on savings institutions are collected by the U.S. Office of Thrift Supervision and the FDIC. The Financial Institutions Reform, Recovery, and Enforcement

Act of 1989 (FIRREA) authorized the establishment of the Resolution Trust Corporation (RTC) which was responsible for the disposal of assets from failed savings institutions. FIRREA gave the FDIC the job of managing the federal deposit insurance fund for savings institutions (SAIF= Savings Association Insurance Fund). Major balance sheet and income data for all insured savings institutions are published in the *FDIC Quarterly Banking Profile*.

**Credit unions**—Federally chartered credit unions are under the supervision of the National Credit Union Administration. State-chartered credit unions are supervised by the respective state supervisory authorities. The administration publishes comprehensive program and statistical information on all federal and federally insured state credit unions in the *Annual Report of the National Credit Union Administration*. Deposit insurance (up to \$100,000 per account) is provided to members of all federal and those state credit unions that are federally-insured by the National Credit Union Share Insurance Fund which was established in 1970. Deposit insurance for state chartered credit unions is also available in some states under private or state-administered insurance programs.

**Other credit agencies**—Insurance companies, finance companies dealing primarily in installment sales financing, and personal loan companies represent important sources of funds for the credit market. Statistics on loans, investments, cash, etc., of life insurance companies are published principally by the American Council of Life Insurers in its *Life Insurers Fact Book*. Consumer credit data are published currently in the *Federal Reserve Bulletin*.

Government corporations and credit agencies make available credit of specified types or to specified groups of private borrowers, either by lending directly

or by insuring or guaranteeing loans made by private lending institutions. Data on operations of government credit agencies, along with other government corporations, are available in reports of individual agencies; data on their debt outstanding are published in the *Federal Reserve Bulletin*.

**Currency**—Currency, including coin and paper money, represents about 46 percent of all media of exchange in the United States, with most payments made by check. All currency is now issued by the Federal Reserve Banks.

**Securities**—The Securities and Exchange Commission (SEC) was established in 1934 to protect the interests of the public and investors against malpractices in the securities and financial markets and to provide the fullest possible disclosure of information regarding securities to the investing public. Statistical data are published in the *SEC Annual Report*.

**Insurance**—Insuring companies, which are regulated by the various states or the District of Columbia, are classified as either life or property. Both life and property insurance companies may underwrite health insurance. Insuring companies, other than those classified as life, are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital or surplus.

There are a number of published sources for statistics on the various classes of insurance—life, health, fire, marine, and casualty. Organizations representing certain classes of insurers publish reports for these classes. The American Council of Life Insurers publishes statistics on life insurance purchases, ownership, benefit payments, and assets in its *Life Insurers Fact Book*.

No. 1137. Gross Domestic Product in Finance, Insurance, and Real Estate in Current and Real (1996) Dollars: 1990 to 2000

[In billions of dollars, except percent (1,010.3 represents \$1,010,300,000,000). For definition of gross domestic product, see text, Section 13, Income, Expenditures, and Wealth. Based on 1987 Standard Industrial Classification; see text, Section 15, Business Enterprise]

No. 1154. Claims of U.S. Banking Organizations on Foreign Counterparties by Type of Claim: 2001

[In millions of dollars (881,938 represents \$881,938,000,000). As of December. Adjusted cross-border claims are those booked outside the foreign counterparty's home country, usually at a U.S. bank's head office in the United States, and are adjusted for any guarantees. Cross-border claims are usually denominated in U.S. dollars. Local claims on foreign counterparties are those booked in the local offices of the reporting bank, that is, offices located in the country of the counterparty. These claims are usually, but not always, booked in local currency. Revaluation gains stem from the value of foreign exchange and derivatives contracts. U.S. banking organizations continually determine the market value of these contracts - "revaluing" them - to see if a positive or negative value results (based on movements in market factors or other variables)]

Country	Adjusted				Country	Adjusted			
	Total claims	cross-border claims	Local claims	Revaluation gains		Total claims	cross-border claims	Local claims	Revaluation gains

No. 1155. Retail Fees and Services of Depository Institutions: 2000 and 2001

[In dollars, except as noted. As of June. For most services, fees are reported in terms of (1) the proportion of those institutions offering a service that charge for the service and (2) the average fee charged by the institutions that charge for the service. Based on a random sample of depository institutions belonging to the Bank Insurance Fund, whose members are predominantly commercial banks, or the Savings Association Insurance Fund, whose members are predominantly savings and loans associations]

Type of account or service	2000	2001	Type of account or service	2000	2001
NONINTEREST CHECKING ACCOUNT			AUTOMATED TELLER MACHINES (ATMs)		
Percent offering	95.4	96.7	Percent offering	88.8	90.9
Single-balance, single-fee account: <sup>1</sup>			Annual fee:		
Percent offering	37.4	29.6	Percent charging	13.1	10.7
Monthly fee (low balance)	7.19	7.12	Average	10.79	10.35
Minimum balance to avoid fee	485	527	Fees for customer withdrawals on us: <sup>4</sup>		
Fee-only account: <sup>2</sup>			Percent charging	6.2	3.6
Percent offering	40.2	37.7	Average	0.71	0.81
Monthly fee	5.16	4.74	Fees for customer withdrawals on others: <sup>4</sup>		
NOW ACCOUNTS <sup>3</sup>			Percent charging	72.7	78.5
Percent offering	94.4	96.2	Average	1.16	1.17
Single-fee account: <sup>1</sup>			Surcharge: <sup>5</sup>		
Percent offering	47.0	49.5	Percent charging	75.4	88.5
Monthly fee (low balance)	8.49	8.15	Average	1.26	1.32
Minimum balance to avoid fee	1,029	1,132			

<sup>1</sup> A monthly fee for balances below the minimum, no monthly fee for balances above the minimum, and no other charges.  
<sup>2</sup> A monthly fee, no minimum balance to eliminate the fee, and a charge per check in some cases. <sup>3</sup> NOW (negotiable order of withdrawal) accounts are checking accounts that pay interest and often have fee structures that differ from those of noninterest checking accounts. <sup>4</sup> An institution's "customer" is one who has an account at the institution. A customer's ATM transactions in which the machine used is that of the customer's institution are called "on us"; a customer's transactions in which the machine used is that of another institution are called "on others." <sup>5</sup> An ATM surcharge is a fee imposed by the ATM's institution, typically on every transaction by the machine's noncustomer users.

- Represents or rounds to zero. <sup>1</sup> Excludes consumer check repayments and prepayments involving other payment systems as well as all commercial and government checks. <sup>2</sup> Official checks include cashier's checks, teller checks, and certified checks purchased from financial institutions. Excludes those purchased by businesses. <sup>3</sup> Credit cards include general purpose cards usable at all kinds of merchants and proprietary cards usable only at selected outlets. Includes some purchases on personal cards for government, commercial, and business-related spending. Cash advances are excluded. <sup>4</sup> Debit cards include general purpose cards carrying the Visa or MasterCard brand, electronic funds transfer (EFT) brands of regional EFT systems, proprietary commercial cards issued by private firms to drivers in the long-haul trucking and business aviation industry, and proprietary consumer cards issued by supermarkets. Cash withdrawals at ATMs and cash back over the counter are excluded. <sup>5</sup> Stored value cards are used primarily for gift certificates and telephone calls. <sup>6</sup> Electronic benefits transfer cards are replacements for paper script food stamps. <sup>7</sup> Preauthorized payments are handled electronically "end-to-end" through an automated clearing house. <sup>8</sup> Remote payments are made using a telephone or a computer and include point-of-sale check conversions and utility-bill payments made at ATMs, self-service clerk-assisted electronic banking machines kiosks and clerk-assisted machines at supermarkets.

## No. 1174. New Security Issues of Corporations by Type of Offering: 1990 to 2001

[In billions of dollars (339.1 represents \$339,100,000,000). Represents gross proceeds of issues maturing in more than one year. Figures are the principal amount or the number of units multiplied by the offering price. Excludes secondary offerings, employee stock plans, investment companies other than closed-end, intracorporate transactions, equities sold abroad, and Yankee bonds. Stock data include equity investments made by limited partnerships]

No. 1175. Purchases and Sales by U.S. Investors of Foreign Bonds and Stocks, 1990 to 2001, and by Selected Country, 2001

[In billions of dollars (31.2 represents \$31,200,000,000). Covers transactions in all types of long-term foreign securities as reported by banks, brokers, and other entities in the United States. Data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. Includes transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. Data by country show the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The term "foreigner" covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries and other affiliates abroad of U.S. banks and businesses; the central governments, central banks, and other official institutions of foreign countries; and international and regional organizations. "Foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners. Minus sign (-) indicates net sales by U.S. investors or a net inflow of capital into the United States]

<sup>1</sup> Based on the HO-4 renters insurance policy for tenants. Includes broad named-peril coverage for the personal property of tenants. <sup>2</sup> Based on the HO-3 homeowner package policy for owner-occupied dwellings, 1-4 family units. Provides "all risks" coverage (except those specifically excluded in the policy) on buildings, broad named-peril coverage on personal property, and is the most common package written. <sup>3</sup> The Texas Insurance Commissioner promulgates residential policy forms which are similar but not identical to the standard forms. Insurers can use State-promulgated or standard forms.

## Arts, Entertainment, and Recreation

This section presents data on the arts, entertainment, and recreation economic sector of the economy, and personal recreational activities, the arts and humanities, and domestic and foreign travel.

**Arts, Entertainment, and Recreation Industry**—The U.S. Census Bureau's *Service Annual Survey, Arts, Entertainment, and Recreation Sector*, provides estimates of operation revenue of taxable firms and revenues and expenses of firms exempt from federal taxes for industries in this sector of the economy. Data beginning 1998 are based on the North American Industry Classification System (NAICS). Most establishments were previously classified in the Standard Industrial Classification (SIC) in services, some in retail trade.

This new sector is comprised of industries which existed previously, were revised from previous industry definitions, or are completely new industries. Among those which existed previously are amusement and theme parks. Revised industries include museums. New industries include theater companies and dinner theaters. The following URL contains detailed information about NAICS and provides a comparison of the SIC and NAICS <<http://www.census.gov/epcd/www/naics.html>>. See also the text in Section 15, Business Enterprise.

The 1997 Economic Census was the first economic census to cover the new Information Sector of the economy. The Census, conducted every 5-years, for the years ending "2" and "7," provides information on the number of establishments, receipts, payroll and paid employees for the U.S. and various geographic levels.

### Recreation and leisure activities—

Data on the participation in various recreation and leisure time activities are based on several sample surveys. Data on participation in fishing, hunting, and other forms of wildlife-associated recreation are

published periodically by the U.S. Department of Interior, Fish and Wildlife Service. The most recent data are from the 2001 survey. Data on participation in various sports recreation activities are published by the National Sporting Goods Association. Mediamark, Inc. also conducts periodic surveys on sports and leisure activities, as well as other topics.

**Parks and recreation**—The Department of the Interior has responsibility for administering the national parks. The National Park Service publishes information on visits to national park areas in its annual report, *National Park Statistical Abstract. The National Parks: Index (year)* is a biannual report which contains brief descriptions, with acreages, of each area administered by the service, plus certain "related" areas. The annual *Federal Recreation Fee Report* summarizes the prior year's recreation fee receipts and recreation visitation statistics for seven federal land managing agencies. Statistics for state parks are compiled by the National Association of State Park Directors which issues its *Annual Information Exchange*.

**Travel**—Statistics on arrivals to the United States are reported by the International Trade Administration (ITA). Statistics on departures from the United States include the Department of Transportation's *International Air Travel Statistics* and other sources. Data on domestic travel, business receipts and employment of the travel industry, and travel expenditures are published by the U.S. Travel Data Center, which is the research department of the Travel Industry Association and the national nonprofit center for travel and tourism research located in Washington, DC. Other data on household transportation characteristics are in Section 23, Transportation.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

# No. 1208. Arts, Entertainment, and Recreation—Establishments, Receipts, Payroll, and Employees by Kind of Business (NAICS Basis): 1997

X Not applicable. <sup>1</sup> Includes other funds, shown separately. Excludes administrative funds. Gifts are included in 1980; excluded thereafter. <sup>2</sup> Represents federal funds obligated only upon receipt or certification by Endowment of matching nonfederal gifts. <sup>3</sup> Includes obligations for new grants, supplemental awards on previous years' grants, and program contracts. <sup>4</sup> Beginning with 1997 data, the grantmaking structure changed from discipline-based categories to thematic ones. <sup>5</sup> Program designed to stimulate new sources and higher levels of giving to institutions for the purpose of guaranteeing long-term stability and financial independence. Program usually requires a match of at least 3 private dollars to each federal dollar. Funds for challenge grants are not allocated by program area because they are awarded on a grant-by-grant basis.

Acquisition, net . . . . .	21	32	27	98	61	95	44	222

<sup>1</sup> Financial data are those associated with the National Park System. Certain other functions of the National Park Service (principally the activities absorbed from the former Heritage Conservation and Recreation Service in 1981) are excluded.  
<sup>2</sup> Includes funds carried over from prior years. <sup>3</sup> For calendar year. Includes other areas, not shown separately. <sup>4</sup> For 1990, combined data for North Cascades National Park and two adjacent National Recreation Areas are included in National Parks total. <sup>5</sup> Includes military areas. <sup>6</sup> Federal land only, as of Dec. 31. Federal land acreages, in addition to National Park Service administered lands, also include lands within national park system area boundaries but under the administration of other agencies. Year-to-year changes in the federal lands figures include changes in the acreages of these other lands and hence often differ from "net acquisition."  
Source: U.S. National Park Service, Visits, *National Park Statistical Abstract*, annual; and unpublished data. Other data are unpublished.

No. 1235. State Parks and Recreation Areas by State: 2001

[For year ending June 30 (13,030 represents 13,030,000). Data are shown as reported by state park directors. In some states, park agency has under its control forests, fish and wildlife areas, and/or other areas. In other states, agency is responsible for state parks only]

## Accommodation, Food Services, and Other Services

This section presents statistics relating to services other than those covered in the previous few sections (22 to 26) on domestic trade, transportation, communications, financial services, and recreation services. Data shown for the services are classified by kind of business and cover sales or receipts, establishments, employees, payrolls, and other items. The principal sources of these data are from the Census Bureau and include the *1997 Economic Census* reports, annual surveys, and the *County Business Patterns* program. These data are supplemented by data from several sources such as the National Restaurant Association on food and drink sales (Table 1250), the American Hotel & Motel Association on lodging (Table 1248), and McCann-Erickson, Inc. and Publishers Information Bureau on advertising (Tables 1253 and 1254, respectively).

Data on these services also appear in several other sections. For instance, labor force employment and earnings data (Table 603) appear in Section 12, Labor Force; gross domestic product of the industry (Table 632) appear in Section 13, Income, Expenditures, and Wealth; and financial data (several tables) from the quarterly *Statistics of Income Bulletin*, published by the Internal Revenue Service, appear in Section 15, Business Enterprise.

**Censuses**—Limited coverage of the services industries started in 1933. Beginning with the 1967 census, legislation provides for a census of each area to be conducted every 5 years (for years ending in “2” and “7”). For more information on the most current census, see the *History of the 1997 Economic Census* found at <<http://www.census.gov/prod/ec97/pol00-hec.pdf>>. The industries covered in the censuses and surveys of business are those classified in 13 sectors defined in the *North American Industry Classification System*, called NAICS (see below). All Census Bureau tables in this section are

utilizing the new NAICS codes, which replaced the Standard Industrial Classification (SIC) system. NAICS makes substantial structural improvements and identifies over 350 new industries. At the same time, it causes breaks in time series far more profound than any prior revision of the previously used SIC system. For information on this system and how it affects the comparability of statistics historically, see text, Section 15, Business Enterprise, and especially the Census Web site at <<http://www.census.gov/epcd/www/naics.html>>.

The *Accommodation and Food Services sector* (NAICS sector 72) comprises establishments providing customers with lodging and/or prepared meals, snacks, and beverages for immediate consumption. The *Other Services (Except Public Administration) sector* (NAICS sector 81) covers establishments with payroll engaged in providing services not specifically provided for elsewhere in the NAICS. Establishments in this sector are primarily engaged in activities such as repair and maintenance of equipment and machinery, personal and laundry services, and religious, grantmaking, civic, professional, and similar organizations. Establishments providing death care services, pet care services, photofinishing services, temporary parking services, and dating services are also included. Private households that employ workers on or about the premises in activities primarily concerned with the operation of the household are included in this sector but are not included in the scope of the census. In general, the 1997 Economic Census has two series of publications and documents for these two sectors: 1) subject series with reports on such as commodity line sales and establishment and firm sizes and 2) geographic reports with individual reports for each state. For information on these series, see the Census Web site at <<http://www.census.gov/epcd/www/97EC72.htm>> and <<http://www.census.gov/epcd/www/97EC81.htm>>.

**Current surveys**—The Service Annual Survey provides annual estimates of nationwide receipts for selected personal, business, leasing and repair, amusement and entertainment, social and health, and other professional service industries in the United States. For selected accommodation, social, health, and other professional service industries, separate estimates are developed for receipts of taxable firms and revenue and expenses for firms and organizations exempt from federal income taxes. Several service sectors from this survey are covered in other sections of this publication. The estimates for tax exempt firms in these industries

are derived from a sample of employer firms only. Estimates obtained from annual and monthly surveys are based on sample data and are not expected to agree exactly with results that would be obtained from a complete census of all establishments. Data include estimates for sampling units not reporting.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

## Foreign Commerce and Aid

This section presents data on the flow of goods, services, and capital between the United States and other countries; changes in official reserve assets of the United States; international investments; and foreign assistance programs.

The Bureau of Economic Analysis publishes current figures on U.S. international transactions and the U.S. international investment position in its monthly *Survey of Current Business*. Statistics for the foreign aid programs are presented by the Agency for International Development (AID) in its annual *U.S. Overseas Loans and Grants and Assistance from International Organizations* and by the Department of Agriculture in its *Foreign Agricultural Trade of the United States*.

The principal source of merchandise import and export data is the U.S. Census Bureau. Current data are presented monthly in *U.S. International Trade in Goods and Services* report Series FT 900. The *Guide to Foreign Trade Statistics* found on the Census Bureau Web site at <<http://www.census.gov/foreign-trade/guide/index.html>> lists the Bureau's monthly and annual products and services in this field. In addition, the International Trade Administration and the Bureau of Economic Analysis present summary as well as selected commodity and country data for U.S. foreign trade in the *U.S. Foreign Trade Highlights* and the *Survey of Current Business*, respectively. The merchandise trade data in the latter source include balance of payments adjustments to the Census Bureau data. The Treasury Department's *Monthly Treasury Statement of Receipts and Outlays of the United States Government* contains information on import duties.

**International accounts**—The international transactions tables (Nos. 1262 to 1263) show, for given time periods, the transfer of goods, services, grants, and financial assets and liabilities between the United States and the rest of the world.

The international investment position table (No. 1265) presents, for specific dates, the value of U.S. investments abroad and of foreign investments in the United States. The movement of foreign and U.S. capital as presented in the balance of payments is not the only factor affecting the total value of foreign investments. Among the other factors are changes in the valuation of assets or liabilities, including changes in prices of securities, defaults, expropriations, and write-offs.

Direct investment abroad means the ownership or control, directly or indirectly, by one person of 10 percent or more of the voting securities of an incorporated business enterprise or an equivalent interest in an unincorporated business enterprise. Direct investment position is the value of U.S. parents' claims on the equity of and receivables due from foreign affiliates, less foreign affiliates' receivables due from their U.S. parents. Income consists of parents' shares in the earnings of their affiliates' plus net interest received by parents' on intercompany accounts, less withholding taxes on dividends and interest.

**Foreign aid**—Foreign assistance is divided into three major categories—grants (military supplies and services and other grants), credits, and other assistance (through net accumulation of foreign currency claims from the sale of agricultural commodities). *Grants* are transfers for which no payment is expected (other than a limited percentage of the foreign currency "counterpart" funds generated by the grant), or which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective. *Credits* are loan disbursements or transfers under other agreements which give rise to specific obligations to repay, over a period of years, usually with interest. All known returns to the U.S. government stemming from grants and credits (reverse grants,

returns of grants, and payments of principal) are taken into account in net grants and net credits, but no allowance is made for interest or commissions. *Other assistance* represents the transfer of U.S. farm products in exchange for foreign currencies (plus, since enactment of Public Law 87-128, currency claims from principal and interest collected on credits extended under the farm products program), less the government's disbursements of the currencies as grants, credits, or for purchases. The net acquisition of currencies represents net transfers of resources to foreign countries under the agricultural programs, in addition to those classified as grants or credits.

The basic instrument for extending military aid to friendly nations has been the Mutual Defense Assistance Program authorized by the Congress in 1949. Prior to 1952, economic and technical aid was authorized in the Foreign Assistance Act of 1948, the 1950 Act for International Development, and other legislation which set up programs for specific countries. In 1952, these economic, technical, and military aid programs were combined under the Mutual Security Act, which in turn was followed by the Foreign Assistance Act passed in 1961. Appropriations to provide military assistance were also made in the Department of Defense Appropriation Act (rather than the Foreign Assistance Appropriation Act) beginning in 1966 for certain countries in Southeast Asia and in other legislation concerning program for specific countries (such as Israel). Figures on activity under the Foreign Assistance Act as reported in the *Foreign Grants and Credits* series differ from data published by AID or its immediate predecessors, due largely to differences in reporting, timing, and treatment of particular items.

**Exports**—The Census Bureau compiles export data primarily from Shipper's Export Declarations required to be filed with customs officials for shipments leaving the United States. They include U.S. exports under mutual security programs and exclude shipments to U.S. Armed Forces for their own use.

The value reported in the export statistics is generally equivalent to a free alongside ship (f.a.s.) value at the U.S. port of

export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. This value, as defined, excludes the cost of loading merchandise aboard the exporting carrier and also excludes freight, insurance, and any other charges or transportation and other costs beyond the U.S. port of exportation. The country of destination is defined as the country of ultimate destination or country where the merchandise is to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. When ultimate destination is not known, the shipment is statistically credited to the last country to which the shipper knows the merchandise will be shipped in the same form as exported.

Effective January 1990, the United States began substituting Canadian import statistics for U.S. exports to Canada. As a result of the data exchange between the United States and Canada, the United States has adopted the Canadian import exemption level for its export statistics based on shipments to Canada.

Data are estimated for shipments valued under \$2,501 to all countries, except Canada, using factors based on the ratios of low-valued shipments to individual country totals.

Prior to 1989, exports were based on Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. These statistics were retabulated and published using Schedule E, Standard International Trade Classification, Revision 2. Beginning in 1989, Schedule B classifications were based on the Harmonized System and made to coincide with the Standard International Trade Classification, Revision 3. This revision will affect the comparability of most export series beginning with the 1989 data for commodities.

**Imports**—The Census Bureau compiles import data from various customs forms required to be filed with customs officials. Data on import values are presented on two valuations bases in this section: The c.i.f. (cost, insurance, and freight) and the

customs import value (as appraised by the U.S. Customs Service in accordance with legal requirements of the Tariff Act of 1930, as amended). This latter valuation, primarily used for collection of import duties, frequently does not reflect the actual transaction value. Country of origin is defined as country where the merchandise was grown, mined, or manufactured. If country of origin is unknown, country of shipment is reported.

Imports are classified either as "General imports" or "Imports for consumption." *General imports* are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise. *Imports for consumption* are a combination of entries for immediate consumption, withdrawals from warehouses for consumption, and entries of merchandise into U.S. customs territory from U.S. Foreign Trade Zones, thus generally reflecting the total of the commodities entered into U.S. consumption channels.

Prior to 1989, imports were based on the Tariff Schedule of the United States Annotated. The statistics were retabulated and

published using Schedule A, Standard International Trade Classification, Revision 2. Beginning in 1989, the statistics are based on the Harmonized Tariff Schedule of the United States, which coincides with the Standard International Trade Classification, Revision 3. This revision will affect the comparability of most import series beginning with the 1989 data.

**Area coverage**—Except as noted, the geographic area covered by the export and import trade statistics is the United States Customs area (includes the 50 states, the District of Columbia, and Puerto Rico), the U.S. Virgin Islands (effective January 1981), and U.S. Foreign Trade Zones (effective July 1982). Data for selected tables and total values for 1980 have been revised to reflect the U.S. Virgin Islands' trade with foreign countries, where possible.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

- Represents or rounds to zero. <sup>1</sup> Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis. <sup>2</sup> Includes some goods: "Mainly military equipment included in 'Transfers under U.S. military agency sales contracts'; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies included in 'Direct defense expenditures' under 'Imports', and fuels purchased by airline and steamship operators included in 'Other transportation' under 'Exports' and 'Imports'." <sup>3</sup> Includes transfers of goods and services under U.S. military grant programs to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. Imports include U.S. parents' payments to foreign residents to the U.S. government. <sup>4</sup> Break in series. See Technical Notes in the June 1989, 1992, 1993, 1995, and July 1996-99 issues of the Survey. <sup>5</sup> These items are presented on a gross basis. Exports exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. <sup>6</sup> The "other" transfers component includes taxes paid by U.S. private residents to foreign parents. Imports include U.S. parents' payments to foreign residents to the U.S. government. <sup>7</sup> At the present time, all U.S. Treasury-owned gold is held in the United States. <sup>8</sup> Includes sales of foreign obligations to foreigners. <sup>9</sup> Conceptually, "Balance on current account" is equal to "net foreign investment" in the national income and product accounts (NIPAs). However, the foreign transactions account in the NIPAs (a) includes adjustments to the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except life insurance carriers and private noninsured pension plans.

No. 1270. U.S. Businesses Acquired or Established by Foreign Direct Investors— Investment Outlays by Industry of U.S. Business Enterprise and Country of Ultimate Beneficial Owner: 1990 to 2000

[In millions of dollars (65,932 represents \$65,932,000,000). Foreign direct investment is the ownership or control directly or indirectly, by one foreign individual branch, partnership, association, trust, corporation, or government of 10 percent or more of the voting securities of a U.S. business enterprise or an equivalent interest in an unincorporated one. Data represent number and full cost of acquisitions of existing U.S. business enterprises, including business segments or operating units of existing U.S. business enterprises and establishments of new enterprises. Investments may be made by the foreign direct investor itself, or indirectly by an existing U.S. affiliate of the foreign direct investor. Covers investments in U.S. business enterprises with assets of over \$1 million, or ownership of 200 acres of U.S. land. These industry data are now on a North American Industry Classification System (NAICS) basis and not comparable to previous data, which were based on the Standard Industrial Classification system]

# No. 1272. U.S. Direct Investment Position Abroad on a Historical-Cost Basis by Country: 1990 to 2000

[In millions of dollars (430,521 represents 430,521,000,000). U.S. direct investment abroad is the ownership or control by one U.S. person of 10 percent or more of the voting securities of an incorporated foreign business enterprise or an equivalent interest in a unincorporated foreign business enterprise. Negative position can occur when a U.S. parent company's liabilities to the foreign affiliate are greater than its equity in, and loans to the foreign affiliate]

- Represents zero or rounds to zero. X Not applicable. Z Less than \$500,000. <sup>1</sup> In 1992, some successor countries assumed portions of outstanding credits of the former Yugoslavia (assignment of the remaining portions is pending). Subsequent negative totals reflect payments to the United States on these assumed credits which were greater than the extension of new credits and grants to these countries. <sup>2</sup> Includes European Atomic Energy Community, European Coal and Steel Community, European Payments Union, European Productivity Agency, North Atlantic Treaty Organization, and Organization for European Economic Cooperation. <sup>3</sup> In recent years, significant amounts of foreign assistance has been reported on a regional, inter-regional, and worldwide basis. Country totals in this table may understate actual assistance to many countries. <sup>4</sup> Foreign assistance to Iraq in 1994-96 was direct humanitarian assistance to ethnic minorities of Northern Iraq after the conflict in the Persian Gulf. <sup>5</sup> United Nations Relief and Works Agency for Palestine refugees. <sup>6</sup> Excludes transactions with Commonwealth of the Northern Mariana Islands after October 1986; includes transactions with Federated States of Micronesia, Republic of the Marshall Islands, and Republic of Palau. <sup>7</sup> Includes transfer of Panama Canal to the Republic of Panama on December 1999. <sup>8</sup> Includes Andean Development Corporation, Caribbean Development Bank, Central American Bank for Economic Integration, Eastern Caribbean Central Bank, Inter-American Institute of Agricultural Science, Organizations of American States, and Pan American Health Organization.

No. 1274. U.S. Foreign Economic and Military Aid Programs: 1980 to 2000

[In millions of dollars (9,695 represents \$9,695,000,000). For years ending September 30. Economic aid shown here represents U.S. economic aid—not just aid under the Foreign Assistance Act. Major components in recent years include AID, Food for Peace, Peace Corps, and paid-in subscriptions to international financial institutions, such as IBRD, and IDB. Annual figures are gross unadjusted program figures]

Year and region	Total economic and military aid	Economic aid			Military aid

<sup>1</sup> Includes nonmonetary gold, military grant aid, special category shipments, trade between the U.S. Virgin Islands and foreign countries and undocumented exports to Canada. Adjustments were also made for carryover. Import values are based on transaction prices whenever possible (f.a.s. for 1974-1979 and Customs value thereafter). Import data before 1974 do not exist on a transaction price valuation basis. <sup>2</sup> Manufactured goods include commodity Sections 5-9 under Schedules A and E for 1970-1982 and SITC Rev. 3 for 1983-forward. Manufactures include undocumented exports to Canada, nonmonetary gold (excluding gold ore, scrap, and base bullion), and special category shipments. <sup>3</sup> Data for 1970-1980 exclude trade between the U.S. Virgin Islands and foreign countries. Census data concordances link the 1980-92 trade figures into time series that are as consistent as possible. Data for 1970-79 are not linked and are from published sources. Import values are f.a.s. for 1974-1979 and Customs value thereafter; these values are based on transaction prices while maintaining a data series as consistent as possible over time. Import data before 1974 do not exist on a transaction price valuation basis. 1991 Imports include revisions for passenger cars, trucks, petroleum and petroleum products not included elsewhere. <sup>4</sup> Agricultural products for 1983-forward utilize the latest census definition that excludes manufactured goods that were previously classified as manufactured agricultural products. <sup>5</sup> Mineral fuels include commodity Section 3 under SITC Rev. 1 for 1970-1976, SITC Rev. 2 for 1977-1982 and SITC Rev. 3 for 1983-forward.

Z Less than \$50 million. <sup>1</sup> Totals shown for exports reflect the value of estimated parcel post and Special Category shipments, and beginning 1990, adjustments for undocumented exports to Canada which are not distributed by customs district. The value of bituminous coal exported through Norfolk, VA; Charleston, SC; and Mobile, AL is reflected in the total but not distributed by district. <sup>2</sup> Excludes exports of bituminous coal, which are included in the "Total" line.

No. 1285. United States Total and Aerospace Foreign Trade: 1980 to 2001

[In millions of dollars (245,262 represents \$245,262,000,000), except percent. Data are reported as exports of domestic merchandise, including Department of Defense shipments and undocumented exports to Canada, f.a.s. (free alongside ship) basis, and imports for consumption, customs value basis. Minus sign (-) indicates deficit]

## Section 29

# Outlying Areas

This section presents summary economic and social statistics for Puerto Rico, Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands. Primary sources are the decennial censuses of population and housing and the censuses of agriculture, business, manufactures, and construction (taken every 5 years) conducted by the U.S. Census Bureau; the annual *Vital Statistics of the United States*, issued by the National Center for Health Statistics; and the annual *Income and Product* of the Puerto Rico Planning Board, San Juan.

**Jurisdiction**—The United States gained jurisdiction over these areas as follows: The islands of *Puerto Rico* and *Guam*, surrendered by Spain to the United States in October 1898, were ceded to the United States by the Treaty of Paris, ratified in 1899. Puerto Rico became a commonwealth on July 25, 1952, thereby achieving a high degree of local autonomy under its own constitution. The *Virgin Islands*, comprising 50 islands and cays, was purchased by the United States from Denmark in 1917. *American Samoa*, a group of seven islands, was acquired by the United States in accordance with a convention among the United States, Great Britain, and Germany, ratified in 1900 (Swains Island was annexed in 1925). By an agreement approved by the Security Council and the United States, the Northern Mariana Islands, previously under Japanese mandate, was administered by the United States between 1947 and 1986 under the United Nations trusteeship system. The Northern Mariana Islands became a commonwealth in 1986.

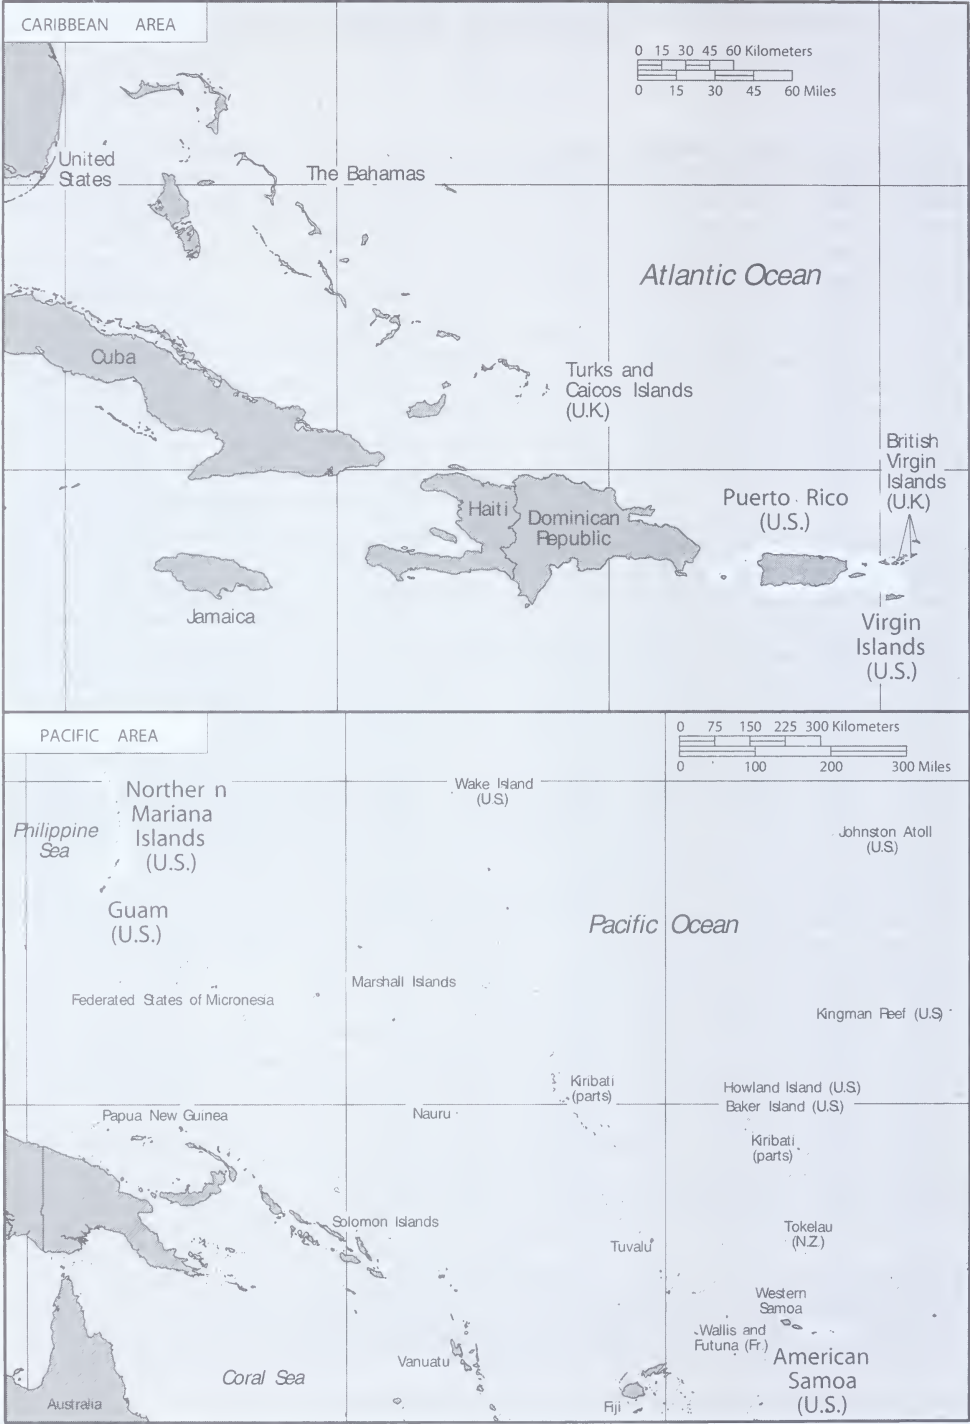

**Censuses**—Because characteristics of the outlying areas differ, the presentation of census data for them is not uniform. The

1960 Census of Population covered all of the places listed above except the Northern Mariana Islands (their census was conducted in April 1958 by the Office of the High Commissioner), while the 1960 Census of Housing also excluded American Samoa. The 1970, 1980, and 1990 Censuses of Population and Housing covered all five areas. The 1959, 1969, and 1978 Censuses of Agriculture covered Puerto Rico, American Samoa, Guam, and the Virgin Islands; the 1964, 1974, and 1982 censuses covered the same areas except American Samoa; and the 1969, 1978, 1987, 1992, and 1997 censuses included the Northern Mariana Islands. Beginning in 1967, Congress authorized the economic censuses, to be taken at 5-year intervals, for years ending in "2" and "7." Prior economic censuses were conducted in Puerto Rico for 1949, 1954, 1958, and 1963 and in Guam and the Virgin Islands for 1958 and 1963. In 1967, the census of construction industries was added for the first time in Puerto Rico; in 1972, Virgin Islands and Guam were covered. For 1982, 1987, 1992, and 1997 the economic censuses covered the Northern Mariana Islands.

**Information in other sections**—In addition to the statistics presented in this section, other data are included as integral parts of many tables showing distribution by states in various sections of the *Abstract*. See "Outlying areas of the United States" in the Index. For definition and explanation of terms used, see Section 1, Population; Section 4, Education; Section 17, Agriculture; Section 20, Construction and Housing; Section 21, Manufactures; and Section 22, Domestic Trade.

Figure 29.1

## Comparative International Statistics

This section presents statistics for the world as a whole and for many countries on a comparative basis with the United States. Data are shown for population, births and deaths, social and industrial indicators, finances, agriculture, communication, and military affairs.

Statistics of the individual nations may be found primarily in official national publications, generally in the form of yearbooks, issued by most of the nations at various intervals in their own national languages and expressed in their own or customary units of measure. (For a listing of selected publications, see Guide to Sources.) For handier reference, especially for international comparisons, the United Nations Statistics Division compiles data as submitted by member countries and issues a number of international summary publications, generally in English and French. Among these are the *Statistical Yearbook*; the *Demographic Yearbook*; *International Trade Statistics Yearbook*; *National Accounts Statistics: Main Aggregates and Detailed Tables*; *Population and Vital Statistics Reports* (quarterly); the *Monthly Bulletin of Statistics*; and the *Energy Statistics Yearbook*. Specialized agencies of the United Nations also issue international summary publications on agricultural, labor, health, and education statistics. Among these are the *Production Yearbook* and *Trade Yearbook* issued by the Food and Agriculture Organization, the *Yearbook of Labour Statistics* issued by the International Labour Office, *World Health Statistics* issued by the World Health Organization, and the *Statistical Yearbook* issued by the Educational, Scientific, and Cultural Organization.

The U.S. Census Bureau presents estimates and projections of basic demographic measures for countries and regions of the world in the *World Population Reports* (WP) series. The *International Population Reports* (Series IPC), and *International Briefs* (Series IB) also present population figures for many foreign

countries. Detailed population statistics are also available from the Census Bureau's International Data Base (<http://www.census.gov/ipc/www/idbnew.html>).

The International Monetary Fund (IMF) and the Organization for Economic Cooperation and Development (OECD) also compile data on international statistics. The IMF publishes a series of reports relating to financial data. These include *International Financial Statistics*, *Direction of Trade*, and *Balance of Payments Yearbook*, published in English, French, and Spanish. The OECD publishes a vast number of statistical publications in various fields such as economics, health, and education. Among these are *OECD in Figures*, *Main Economic Indicators*, *Economic Outlook*, *National Accounts*, *Labour Force Statistics*, *OECD Health Data*, and *Education at a Glance*.

**Statistical coverage, country names, and classifications**—Problems of space and availability of data limit the number of countries and the extent of statistical coverage shown. The list of countries included and the spelling of country names are based almost entirely on the list of sovereign nations, dependencies, and areas of special sovereignty provided by the U.S. Department of State.

In recent years, several important changes took place in the status of the world's nations. In 1990, a unified Germany was formed from the Federal Republic of Germany (West) and the German Democratic Republic (East). The Republic of Yemen was formed by union of the Yemen Arab Republic and the People's Democratic Republic of Yemen. Also in 1990, Namibia, once a United Nations mandate, realized its independence from South Africa.

In 1991, the Soviet Union broke up into 15 independent countries: Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania,

Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan.

Following the breakup of the Socialist Federal Republic of Yugoslavia in 1992, the United States recognized Bosnia and Herzegovina, Croatia, Slovenia, and The Former Yugoslav Republic of Macedonia as independent countries.

On January 1, 1993, Czechoslovakia was succeeded by two independent countries: the Czech Republic and Slovakia. Eritrea announced its independence from Ethiopia in April 1993 and was subsequently recognized as an independent nation by the United States.

The population estimates and projections used in Tables 1305, 1306, 1308, 1309, and 1312 were prepared by the Census Bureau. For each country, the data on population, by age and sex, fertility, mortality, and international migration were evaluated and, where necessary, adjusted for inconsistencies and errors in the data. In most instances, comprehensive projections were made by the component method, resulting in distributions of the population by age and sex and requiring an assessment of probable future trends of fertility, mortality, and international migration.

**Economic associations**—The Organization for European Economic Co-Operation (OEEC), a regional grouping of Western European countries established in 1948 for the purpose of harmonizing national economic policies and conditions, was succeeded on September 30, 1961, by the Organization for Economic Cooperation and Development (OECD). The member nations of the OECD are Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, Slovakia, South Korea, Spain, Sweden, Switzerland, Turkey, the United Kingdom, and the United States.

**Quality and comparability of the data**—The quality and comparability of the data presented here are affected by a number of factors:

(1) The year for which data are presented may not be the same for all subjects for a particular country or for a given subject for different countries, though the data shown are the most recent available. All such variations have been noted. The data shown are for calendar years except as otherwise specified.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary for different items within a particular country, and for like items for different countries. Footnotes and headnotes to the tables give a few of the major time-periods and coverage qualifications attached to the figures; considerably more detail is presented in the source publications. Many of the measures shown are, at best, merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Disagreements may be attributable to the use of differing original sources, a difference in the definition of geographic limits (the 50 states, conterminous United States only, or the United States including certain outlying areas and possessions), or to possible adjustments made in the United States figures by other sources in order to make them more comparable with figures from other countries.

**International comparisons of national accounts data**—In order to compare national accounts data for different countries, it is necessary to convert each country's data into a common unit of currency, usually the U.S. dollar. The market exchange rates which are often used in converting national currencies do not necessarily reflect the relative purchasing power in the various countries. It is necessary that the goods and services produced in different countries be valued consistently if the differences observed are meant to reflect real differences in the volumes of goods and services produced. The use of purchasing power parities (see Table 1320) instead of exchange rates is intended to achieve this objective.

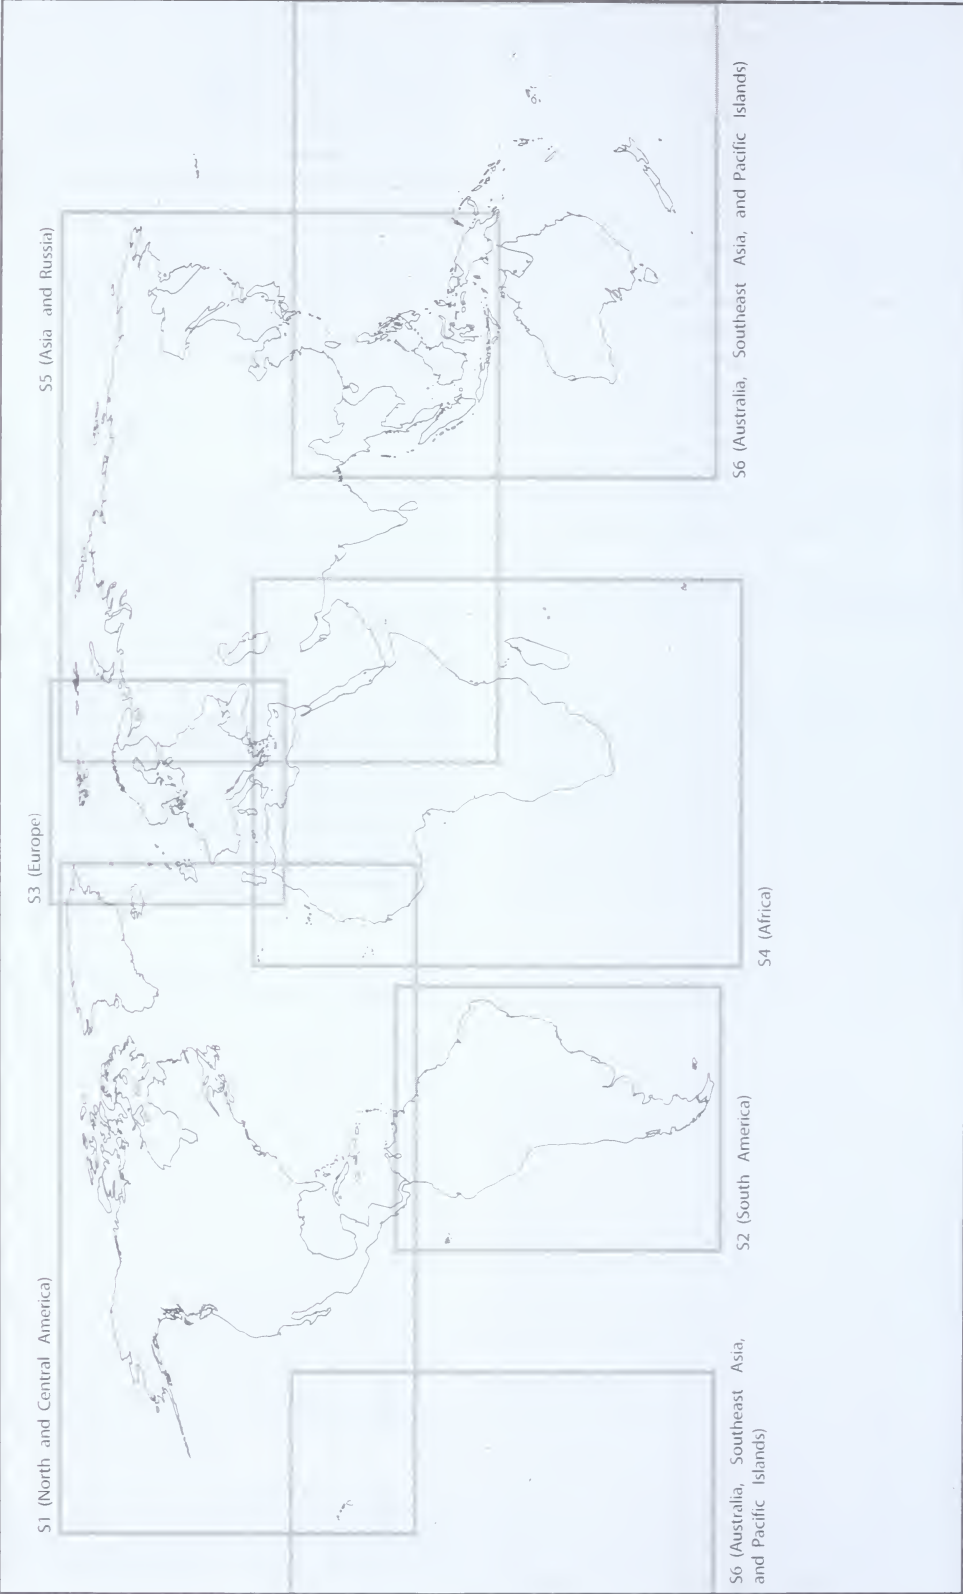

The method used to present the data shown in Table 1320 is to construct volume measures directly by revaluing the goods and services sold in different countries at a common set of international prices. By dividing the ratio of the gross domestic products of two countries expressed in their own national currencies by the corresponding ratio calculated at constant international prices, it is possible to derive the implied purchasing power parity (PPP) between the two currencies concerned. PPPs show how many units of currency are needed in one country to buy the same amount of goods and services which one unit of currency will buy in the other country. For further information, see *National Accounts, Main Aggregates, Volume I*, issued annually by the Organization for Economic Cooperation and Development, Paris, France.

**International Standard Industrial Classification**—The original version of the International Standard Industrial Classification of All Economic Activities (ISIC) was adopted in 1948. Wide use has been made both nationally and internationally in classifying data according to kind of economic activity in the fields of production, employment, national income, and other economic statistics. A number of countries have utilized the ISIC as the basis for devising their industrial classification scheme.

Substantial comparability has been attained between the industrial classifications of many other countries, including the United States and the ISIC by ensuring, as far as practicable, that the categories at detailed levels of classification in national schemes fitted into only one category of the ISIC. The United Nations, the International Labour Organization, the Food and Agriculture Organization, and other international bodies have utilized the ISIC in publishing and analyzing statistical data. Revisions of the ISIC were issued in 1958, 1968, and 1989.

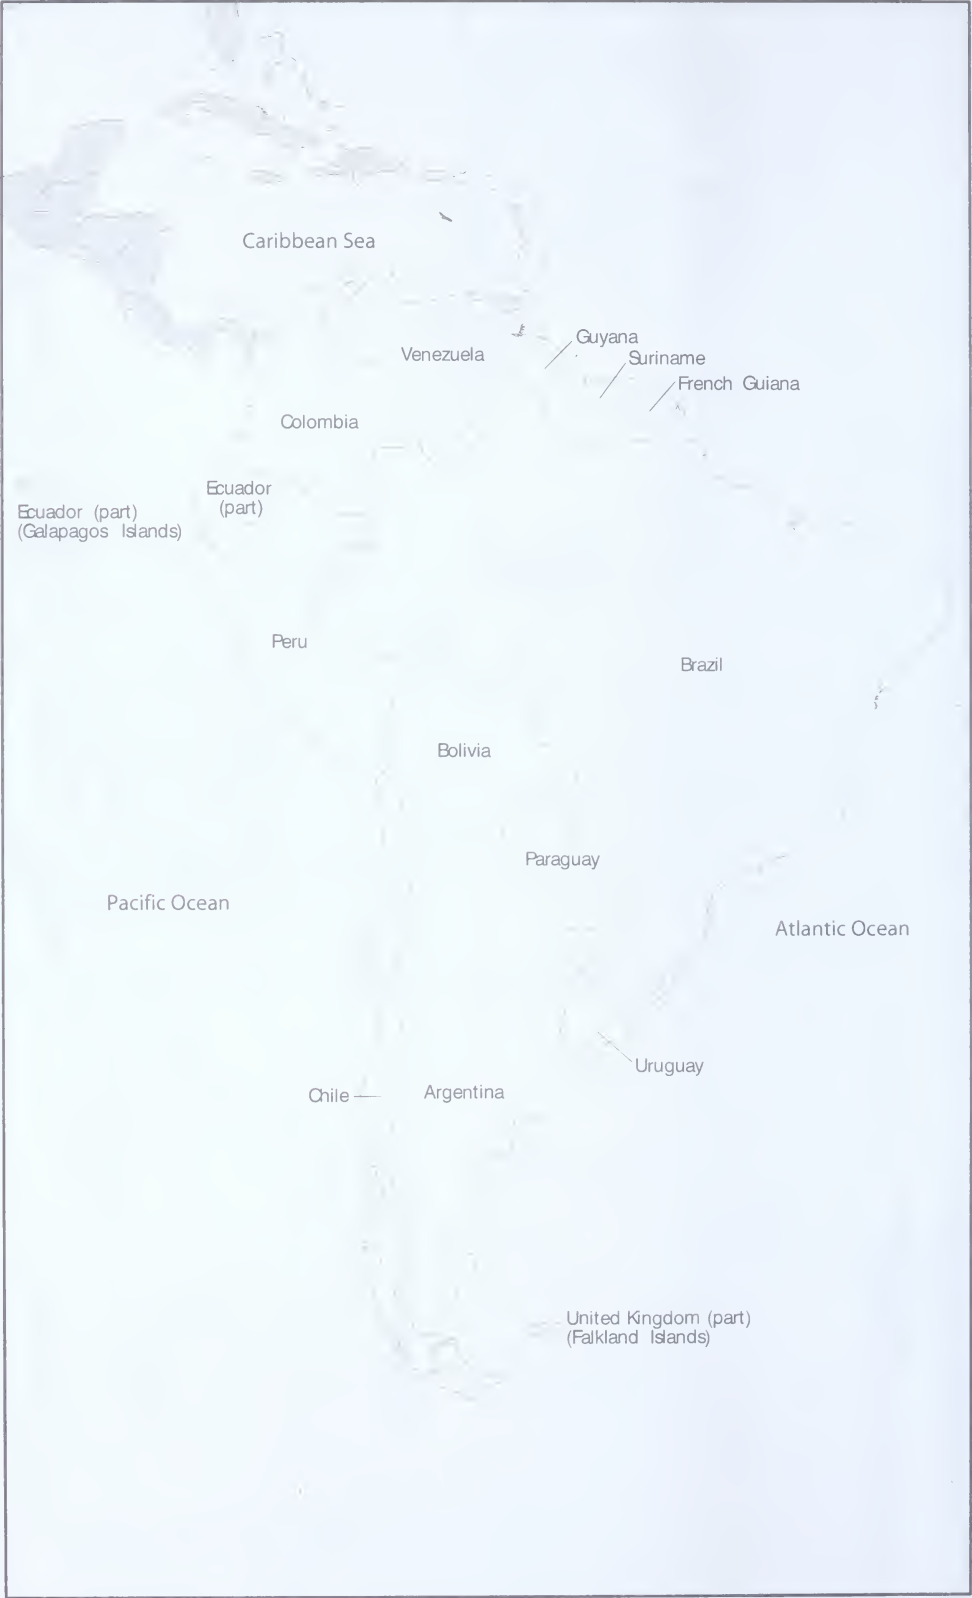

**International maps**—A series of regional world maps is provided on pages 816-822. References are included in Table 1308 for easy location of individual countries on the maps. The Robinson map projection is used for this series of maps. A map projection is used to portray all or part of the round Earth on a flat surface, but this cannot be done without some distortion. For the Robinson projection, distortion is very low along the Equator and within 45 degrees of the center but is greatest near the poles. For additional information on map projections and maps, please contact the Earth Science Information Center, U.S. Geological Survey, 507 National Center, Reston, VA 22092.

No. 1308. Population by Country: 1990 to 2010

[5,283,755 represents 5,283,755,000. Population data generally are de facto figures for the present territory. Population estimates were derived from information available as of spring 2000. East Timor became independent of Indonesia, but population data will not be available until the next update of the International Data Base. See text of this section for general comments concerning the data. For details of methodology, coverage, and reliability, see coverage, and reliability, see source. [Minus sign (-) indicates decrease]

Western Sahara	S4	191	245	251	301	181	2.1	2	102,703

- Represents or rounds to zero. X Not applicable. Z Less than one person per square mile. <sup>1</sup> Computed by the exponential method. For explanation of average annual percent change, see Guide to Tabular Presentation. <sup>2</sup> With the establishment of diplomatic relations with China on January 1, 1979, the U.S. government recognized the People's Republic of China as the sole legal government of China and acknowledged the Chinese position that there is only one China and that Taiwan is part of China. <sup>3</sup> "Congo" is the official short-form name for both the Republic of Congo and the Democratic Republic of the Congo. To distinguish one from the other the U.S. Dept. of State adds the capital in parentheses. This practice is unofficial and provisional. <sup>4</sup> The Gaza Strip and West Bank are Israeli occupied with interim status subject to Israeli/Palestinian negotiations. The final status is to be determined.

No. 1318. Participation in Job-Related Continuing Education and Training by Country

[Percentage of the employed population 25 to 64 years old. Data refer to all job-related education and training organized, financed, or sponsored by authorities, provided by employers, or self-financed. Job-related continuing education and training refers to all organized, systematic education and training activities in which people take part in order to obtain knowledge and/or learn new skills for a current or a future job, to increase earnings, improve job and/or career opportunities in current or other fields, and generally to improve their opportunities for advancement and promotion. Data are based on International Adult Literacy Survey 1994-1998 and national household surveys on adult education and training]

<sup>1</sup> Based on constant (1995) price data converted to U.S. dollars using 1995 exchange rates. <sup>2</sup> The goods and services produced in different countries should be valued consistently if the differences observed are meant to reflect real differences in the volumes of goods and services produced. The use of purchasing power parities (PPP) instead of exchange rates is intended to achieve this objective. PPP's show how many units of currency are needed in one country to buy the same amount of goods and services which one unit of currency will buy in the other country. See text of this section. <sup>3</sup> Excluding Czech Republic, Hungary, Poland, and Slovakia. <sup>4</sup> European Union: Austria, Belgium, Denmark, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden, and United Kingdom. <sup>5</sup> Includes overseas departments. <sup>6</sup> Based on System of National Accounts, 1968.

## No. 1321. Selected International Economic Indicators by Country: 1980 to 2000

[Data cover gross domestic product (GDP) at market prices. Gross fixed capital formation covers private and government sectors except military. Savings data are calculated by deducting outlays—such as personal consumption expenditures, interest paid, and transfer payments to foreigners—from disposable personal income]

Year	United States	France	Germany	Italy	Netherlands	United Kingdom	Japan	Canada
Ratio of gross fixed capital formation to GDP (current prices):								
1980	19.9	23.8	22.6	25.2	22.9	18.8	31.7	23.1
1985	19.2	20.3	19.5	21.8	21.0	18.1	27.7	19.8
1990	17.0	22.6	20.9	21.5	22.3	20.6	32.2	20.8
1995	17.5	18.8	22.4	18.3	20.3	16.3	27.8	17.0
1998	19.4	18.4	21.3	18.5	21.5	17.4	26.9	19.3
1999	20.0	19.1	21.3	19.0	22.2	17.7	26.2	19.5
2000	20.7	19.7	21.4	19.6	22.3	17.7	26.0	19.3
Ratio of savings to disposable personal income:								
1980	10.2	15.8	14.2	25.1	7.8	11.7	17.9	15.5
1985	9.2	13.8	12.8	21.0	5.6	9.1	19.0	15.7
1990	7.8	13.1	14.7	18.4	11.6	7.4	13.9	12.9
1995	5.6	16.0	11.2	16.6	14.9	10.3	12.3	9.2
1998	4.2	15.6	10.2	12.8	13.4	5.8	11.8	4.4
1999	2.2	15.4	9.9	11.5	10.6	5.2	11.1	4.2
2000	-0.1	15.9	9.8	10.3	9.4	4.5	11.1	3.9

Source: U.S. Dept. of Commerce, International Trade Administration, Office of Trade and Economic Analysis, based on official statistics of listed countries.

## No. 1322. International Economic Composite Indexes by Country: 1980 to 2000

[Average annual percent change from previous year; derived from indexes with base 1990=100. The coincident index changes are for calendar years and the leading index changes are for years ending June 30 because they lead the coincident indexes by about 6 months, on average. The G-7 countries are United States, Canada, France, Germany, Italy, United Kingdom, and Japan. Minus sign (-) indicates decrease]

No. 1324. Labor Productivity and Hours Worked by Country: 1990 to 2001

[Annual percent change for period shown. Data are derived from an annual database supported by the source. The Groningen Growth and Development Centre at the University of Groningen, Netherlands, maintains the database. For OECD countries and Eastern Europe, estimates are based on gross domestic product per hour worked, converted at purchasing power parities for 1996. Hence, estimates expressed in U.S. dollars at the price level of 1996 are corrected for differences in relative price levels. Minus sign (-) indicates decrease]

Sweden	42.7	76.9	48.6	55.8	62.1	53.1	59.8	54.2	56.4
United Kingdom	44.5	61.1	50.7	41.9	44.4	38.8	40.4	38.6	40.9

NA Not available. X Not applicable. <sup>1</sup> Includes funded part of central government employee pension liabilities amounting to 8.3 percent of GDP in 1999. Expenditures data includes outlays net of surpluses of public enterprises. Receipts exclude the operating surpluses of public enterprises. <sup>2</sup> Includes funded government employee pension liabilities amounting to 19 percent of GDP in 1999. This overstates the Canadian debt position relative to countries that have large unfunded liabilities for such pensions which are not counted in those countries' debt figures. <sup>3</sup> Debt data include accounts of the Inherited Debt Fund from 1995 on. The 1995 outlays are net of the debt taken on this year from the Inherited Debt funds. <sup>4</sup> Debt data include debt of the Japan Railway Settlement Corporation and the National Forest Special Account from 1998 on. The 1998 expenditures would have risen by 5.4 percentage points of GDP if account were taken of the assumption by the central government of the debt of these two entities.

# No. 1331. Age of Withdrawal From Labor Force and Retirement Duration: 1999

[This table shows the median age at which people completely withdraw from the labor force. For example, half of Canadian men leave the labor force at age 62.4 or before and live another 18.2 years without working. A quarter of Canadian men leave the labor force before the age of 57.8 and another quarter after the age of 66.5.]

Country	First and third quartiles: a quarter of the population				Median age of withdrawal		Duration of complete retirement	
	Withdraws earlier than age		Never withdraws or later than age					
	Men	Women	Men	Women	Men	Women	Men	Women
Nine-country average . . . . .	58.1	57.2	67.0	65.1	62.3	61.1	17.8	23.0
Canada . . . . .	57.8	56.8	66.5	65.2	62.4	60.8	18.2	23.5

# No. 1346. World Production of Major Mineral Commodities: 1990 to 2000

[5,386 represents 5,386,000,000]

Country	Unit	1990	1995	1999	2000, prel.	Leading producers, 1999
MINERAL FUELS						
Coal	Mil. short tons	5,386	5,218	5,053	5,059	China, United States, India
Dry natural gas	Tril. cu. ft.	73.6	78.0	84.9	88.0	Russia, United States, Canada
Natural gas plant liquids <sup>1</sup>	Mil. barrels <sup>2</sup>	1,691	2,005	2,187	2,279	United States, Saudi Arabia, Canada
Petroleum, crude	Mil. barrels <sup>2</sup>	22,107	22,752	24,035	24,858	Saudi Arabia, Russia, United States
NONMETALLIC MINERALS						
Cement, hydraulic	Mil. metric tons	1,160	1,444	1,600	1,700	China, India, United States
Diamond, gem and industrial	Mil. carats	111	113	117	(NA)	(NA)
Nitrogen in ammonia	Mil. metric tons	97.5	100.0	108.0	104.0	China, United States, India
Phosphate rock	Mil. metric tons	162	130	141	139	United States, China, Morocco
Potash, marketable	Mil. metric tons	27.5	24.6	25.7	26.5	Canada, Russia, Belarus
Salt	Mil. metric tons	183	192	209	210	United States, China, Germany
Sulfur, elemental basis	Mil. metric tons	57.8	53.2	57.1	57.4	United States, Canada, China
METALS						
Aluminum <sup>3</sup>	Mil. metric tons	19.3	19.7	23.1	23.9	United States, Russia, China
Bauxite, gross weight	Mil. metric tons	113.0	112.0	127.0	127.0	Australia, Guinea, Brazil
Chromite, gross weight <sup>1</sup>	1,000 metric tons	13,200	14,300	13,500	13,700	South Africa, Kazakhstan, Turkey
Copper, metal content <sup>4</sup>	1,000 metric tons	8,950	10,100	12,600	12,900	Chile, United States, Indonesia
Gold, metal content	Metric tons	2,180	2,210	2,540	2,445	South Africa, United States, Australia
Iron ore, gross weight <sup>5</sup>	Mil. metric tons	983	1,031	994	1,010	China, Brazil, Australia
Lead, metal content <sup>4</sup>	1,000 metric tons	3,370	2,820	3,020	2,980	Australia, United States, China
Nickel, metal content <sup>4</sup>	1,000 metric tons	974	1,030	1,120	1,230	Russia, Canada, Australia
Tin, metal content <sup>4</sup>	1,000 metric tons	221	193	198	200	China, Indonesia, Peru
Zinc, metal content <sup>4</sup>	1,000 metric tons	7,150	7,280	8,040	8,000	China, Australia, Canada

NA Not available. <sup>1</sup> Excludes China. <sup>2</sup> 42-gallon barrels. <sup>3</sup> Unalloyed ingot metal. <sup>4</sup> Mine output. <sup>5</sup> Includes iron ore concentrates and iron ore agglomerates.

## No. 1354. Indexes of Hourly Compensation Costs for Production Workers in Manufacturing by Country: 1980 to 2000

[United States=100. Compensation costs include pay for time worked, other direct pay (including holiday and vacation pay, bonuses, other direct payments, and the cost of pay in kind), employer expenditures for legally required insurance programs and contractual and private benefit plans, and for some countries, other labor taxes. Data adjusted for exchange rates. Area averages are trade-weighted to account for difference in countries' relative importance to U.S. trade in manufactured goods. The trade weights used are the sum of U.S. imports of manufactured products for consumption (customs value) and U.S. exports of domestic manufactured products (f.a.s. value) in 1992; see source for detail]

## No. 1358. Key Global Telecom Indicators for the World Telecommunication Service Sector: 1995 to 2002

[In billions U.S. dollars (778 represents \$778,000,000,000), except where noted. All data were converted by annual average exchange rates. Country fiscal year data was aggregated to obtain calendar year estimates]

Indicators	1995	1996	1997	1998	1999	2000	2001	2002, prel.
Telecom market total revenue	778	885	946	1,015	1,112	1,210	1,320	1,445
Telecom telephone services revenue <sup>1</sup>	428	444	437	456	470	489	509	529
Other statistics								
Main telephone lines <sup>2</sup>	691	741	795	849	907	986	1,040	1,115
Mobile cellular subscribers <sup>2</sup>	91	144	215	319	491	741	1,030	1,390
International telephone traffic minutes <sup>3</sup>	63	71	79	89	99	110	120	135
Personal computers <sup>2</sup>	230	260	320	370	430	500	550	605
Internet users <sup>2</sup>	34	58	96	155	241	361	505	655

<sup>1</sup> Revenue from installation, subscription and local, trunk and international call charges for fixed telephone service. <sup>2</sup> Data are in millions. <sup>3</sup> From 1994 including traffic between countries of former Soviet Union.

- Represents or rounds to zero. NA Not available. <sup>1</sup> Publications containing general news and appearing at least 4 times a week; may range in size from a single sheet to 50 or more pages. Circulation data refer to average circulation per issue or number of printed copies per issue and include copies sold outside the country. <sup>2</sup> Data cover estimated number of receivers in use and apply to all types of receivers for radio broadcasts to the public, including receivers connected to a radio "redistribution system" but excluding television sets. <sup>3</sup> Estimated number of sets in use. <sup>4</sup> In many countries mainframe computers are used extensively, and thousands of users can be connected to a single mainframe computer; thus the number of PCs understates the total use of computers. <sup>5</sup> 1999 data. <sup>6</sup> See footnote 2, Table 1308. <sup>7</sup> 1998 data. Source: U.S. Census Bureau. Data from Republic of China publications.

## No. 1363. United States and Foreign Stock Markets—Market Capitalization and Value of Shares Traded: 1990 to 2001

[In billions of U.S. dollars (3,059.4 represents \$3,059,400,000,000). Market capitalization is the market value of all domestic listed companies at the end of the year. The market value of a company is the share price times the number of shares outstanding. Value of shares traded is the annual total turnover of listed company shares]

No. 1369. External Debt by Country: 1990 to 2000

[In millions of dollars (27,877 represents \$27,877,000,000). Total external debt is debt owed to nonresidents repayable in foreign currency, goods, or services. It is the sum of public, publicly guaranteed, and private nonguaranteed long-term debt, use of IMF credit, and short-term debt. Short-term debt includes all debt having an original maturity of one year or less and interest in arrears on long-term debt. Public debt comprises long-term external obligations of public debtors, including the national government and political subdivisions (or an agency of either) and autonomous public bodies, and external obligations of private debtors that are guaranteed for repayment by a public entity]

## Section 31

# 2000 Census Data Sampler

This section presents a selection of data from the *2000 Census of Population and Housing* that became available too late to be incorporated into the topical sections of the *Abstract*. Data are presented for the states and, for some series, the 25 largest metro areas and cities. Most of these data are taken from the Census Bureau's *Demographic Profiles* presenting sample items from the decennial census. These data were asked of persons from a sample of housing units and persons in group quarters (e.g. college dormitories). The sample data include topics, such as school enrollment, educational attainment, marital status, grandparents as caregivers, veteran status, disability status of the civilian noninstitutionalized population, residence, nativity and place of birth, region of birth of the foreign

born, language spoken at home, ancestry, employment status, commuting to work, occupation, industry, class of worker, income, and poverty status. The sample items also include sample housing topics, such as units in structure, year structure built, rooms, year householder moved into unit, vehicles available, house heating fuel, occupants per room, value, mortgage status and selected monthly owner costs, selected monthly owner costs as a percentage of household income, gross rent, and gross rent as a percentage of household income. The *Demographic Profiles* also contain data collected from the entire population, such as sex, age, race, and household type, for example. For complete access to the *Demographic Profiles* see: <<http://www.census.gov/Press-Release/www/2002/demoprofiles.html>>.

# No. 1377. Disability Status of Population by State: 2000

[In thousands except percent (64,689 represents 64,689,000). As of April. Covers civilian noninstitutionalized population. A disability is a long-lasting physical, mental, or emotional condition. This condition can make it difficult for a person to do activities such as walking, climbing stairs, dressing, bathing, learning, or remembering. This condition can also impede a person from being able to go outside the home alone or to work at a job or business. Based on sample data from the 2000 Census of Population and Housing; see text, Section 1, Population, and Appendix III]

<sup>1</sup> For homes with a mortgage. Includes mortgages, deeds of trust, taxes, utilities, etc. <sup>2</sup> Represents the portion of a consolidated city that is not within one or more separately incorporated places.

Source of Tables 1398 and 1399: U.S. Census Bureau, "2000 Census of Population and Housing, Profiles of General Demographic Characteristics"; <<http://www.census.gov/Press-Release/www/2002/demoprofiles.html>>.

No. 1400. Specified Renter-Occupied Housing Units, Gross Rent by State: 2000

[In percent, except as indicated (35,200 represents 35,200,000). As of April 1. Specified renter-occupied units include all renter-occupied units except 1-unit attached or detached houses on 10 acres or more. Based on sample data from the 2000 Census of Population and Housing; see text, Section 1, Population, and Appendix III. For definition of median, see Guide to Tabular Presentation]

State	Percent of units with gross rent of—						Median gross rent (dol.)	Gross rent as a percent of household income, 1999			
	Total <sup>1</sup> (1,000)	\$299 or less	\$300 to \$499	\$500 to \$749	\$750 to \$999	\$1,000 or more		Less than 15 percent	15 to 24 percent	25 to 34 percent	35 percent or more

No. 1401. Specified Renter-Occupied Housing Units, Gross Rent—25 Largest Metropolitan Areas: 2000

[In percent, except as indicated (501.9 represents 501,900). As of April 1. Specified renter-occupied units include all renter-occupied units except 1-unit attached or detached houses on 10 acres or more. Based on sample data from the 2000 Census of Population and Housing; see text Section 1, Population, and Appendix III. Covers metropolitan statistical areas (MSAs) and consolidated metropolitan statistical areas (CMSAs) as defined by the U.S. Office of Management and Budget as of June 30, 1999. For definitions and components of metropolitan areas, see Appendix II. For definition of median, see Guide to Tabular Presentation.]

# Guide to—Sources of Statistics, State Statistical Abstracts, and Foreign Statistical Abstracts

Alphabetically arranged, this guide contains references to the important primary sources of statistical information for the United States published since 1990. Secondary sources have been included if the information contained in them is presented in a particularly convenient form or if primary sources are not readily available. Nonrecurrent publications presenting compilations or estimates for years later than 1990 or types of data not available in regular series are also included. Much data are also available in press releases.

Much valuable information may also be found in state reports, foreign statistical abstracts, which are included at the end of this appendix, and in reports for particular commodities, industries, or similar segments of our economic and social structures, many of which are not included here.

Publications listed under each subject are divided into two main groups: "U.S. Government" and "Nongovernment." The location of the publisher of each report is given except for federal agencies located in Washington, DC. Most federal publications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, tel. 202-512-1800, (Web site <<http://www.access.gpo.gov>> or from Government Printing Office bookstores in certain major cities. In some cases, federal publications may be obtained from the issuing agency.

## U.S. GOVERNMENT

### Administrative Office of the United States Courts

- <http://www.uscourts.gov>
- Calendar Year Reports on Authorized Wiretaps. (State and Federal.)
- Federal Court Management Statistics. Annual.
- Federal Judicial Caseload Statistics. Annual.
- Judicial Business of the United States Courts.
- Statistical Tables for the Federal Judiciary. Semiannual.

### Agency for International Development

- <http://www.usaid.gov>
- U.S. Overseas Loans and Grants and Assistance From International Organizations. Annual.

### Army, Corps of Engineers

- <http://www.usace.army.mil>
- Waterborne Commerce of the United States (in five parts). Annual.

### Board of Governors of the Federal Reserve System

- <http://www.federalreserve.gov>
- Annual Statistical Digest.

### Board of Governors of the Federal Reserve System —Con.

- Domestic Offices, Commercial Bank Assets and Liabilities Consolidated Report of Condition. Quarterly.
- Federal Reserve Banks. Monthly review published by each Bank with special reference to its own Federal Reserve District.
- Federal Reserve Bulletin. Monthly. (Also monthly releases on industrial production indexes.)
- Flow of Funds Accounts of the United States: Flows and Outstandings. Z.1 (780). Quarterly.
- Industrial Production and Capacity Utilization C.17. Monthly.
- Money Stock and Debt Measures. H.6. Weekly.

### Bureau of Alcohol, Tobacco, and Firearms

- <http://www.atf.treas.gov>
- Alcohol and Tobacco Summary Statistics. Annual.

### Bureau of Economic Analysis

- <http://www.bea.doc.gov>
- National Income and Product Accounts of the United States, 1929-1997: Statistical Tables, early 2001.

### **Bureau of Economic Analysis —Con.**

- Survey of Current Business. Monthly.  
(March, June, September, and December issues contain data on U.S. international transactions. Articles on foreign direct investment in the United States, U.S. direct investment abroad, and other topics appear periodically in other issues.)  
U.S. Direct Investment Abroad: 1994 Benchmark Survey, 1998.  
U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and their Foreign Affiliates. Preliminary, 1997. Estimates, 1999

### **Bureau of Justice Statistics**

- Occupational Projections and Training Data. Biennial.
- Producer Price Indexes. Detailed report. Monthly, with annual supplement.
- Productivity Measures for Selected Industries and Government Services. Annual.
- Real Earnings. Monthly.
- Regional and State Employment and Unemployment. Monthly.
- Relative Importance of Components in the Consumer Price Indexes. Annual.
- Metropolitan Area Employment and Unemployment. Monthly.
- U.S. Import and Export Price Indexes. Monthly.
- Usual Weekly Earnings of Wage and Salary Workers. Quarterly.
- Work Experience of the Population. Annual.

### **Bureau of Land Management**

- <http://www.blm.gov>
- Public Land Statistics. Annual.

### **Census Bureau**

- <http://www.census.gov>
- Major reports, such as the Census of Population, which consist of many volumes, are listed by their general, all-inclusive titles. In most cases, separate reports of the most recent censuses are available for each state, subject, industry, etc.
- 1997 Economic Census.
- Comparative Statistics.
- Bridge Between NAICS and SIC.
- Business Expenses.
- Nonemployer Statistics.
- Minority- and Women-Owned Business Enterprises.
- Annual Benchmark Report for Retail Trade.
- Annual Benchmark Report for Wholesale Trade and Food Services.
- Annual Survey of Manufactures. (1996, most recent.)
- Census of Governments. Quinquennial.
- Compendium of Public Employment. Series GC, Vol. 3.

### **Census Bureau —Con.**

- Employee-Retirement Systems of State and Local Governments. Series GC, Vol. 4.
- Employment of Major Local Governments. Series GC, Vol. 3.
- Finances of County Governments. Series GC, Vol. 4.
- Government Organization. Series GC, Vol. 1.
- Public Education Finances. Series GC, Vol. 4.
- Census of Housing. Decennial. (2000, most recent.)
- Census of Population. Decennial. (2000, most recent.)
- CFFR Consolidated Federal Funds Report. Annual.
  - Volume I County Areas
  - Volume II Subcounty Areas
- County Business Patterns. Annual.
- Current Construction Reports: New Residential Construction and New Residential Sales: Press Releases and Web Sites. Value of Construction Put in Place, C30 (monthly with occasional historical supplement); Residential Improvements and Repairs, C50 (quarterly and annual).
- Current Housing Reports: Housing Vacancies, H111 (quarterly and annual); Who Can Afford to Buy a House, H121 (biennial) Market Absorption of Apartments, H130 (quarterly and annual); Characteristics of Apartments Completed, H131 (annual); American Housing Survey for the United States, H150 (biennial); American Housing Survey for Selected Metropolitan Areas, H170; Survey for Selected Metropolitan Areas, H171.
- Current Population Reports. (Series P20.)
- Consumer Income and Poverty, P60 and Household Economic Studies, P70.
- Economic Census. Quinquennial.
- Economic Census of Outlying Areas. Quinquennial.
- FAS Federal Aid to States for Fiscal Year. Annual.
- International Briefs. (Series IB.)
- International Population Reports. (Series IPC.)
- Manufacturing Profiles. (Series MP-1.) Annual.
- Manufacturers' Shipments, Inventories, and Orders. Monthly.
- Manufacturers' Shipments, Inventories, and Orders: 1992-2000.
- Population Profile of the United States. (Biennial Series P23.)
- Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations.
- Service Annual Survey Report.
- Summary of U.S. International Trade in Goods and Services: includes cumulative data. (FT 900.)
- Survey of Plant Capacity Utilization. (Current Industrial Reports MQ-C1.)

## **Census Bureau —Con.**

- U.S. Trade with Puerto Rico and U.S. Possessions. Monthly and Annual. (FT 895.)
- Vehicle Inventory and Use Survey. Quinquennial.
- World Population Profile: 1998 (Series WP).

## **Centers for Disease Control and Prevention, Atlanta, GA**

- <http://www.cdc.gov>
- Morbidity and Mortality Weekly Report. Annual.

## **Health Care Financing Administration**

- <http://www.hcfa.gov>
- Centers for Medicare and Medicaid Services (CMS)
- Health Care Financing Review. Medicare and Medicaid Statistical Supplement. Annual.
- Health Care Financing Research Reports. Occasional.
- Health Care Financing Review. Quarterly.

## **Coast Guard**

- <http://www.uscg.mil>
- Annual Report of the Secretary of Transportation.
- Marine Casualty Statistics. Annual.
- Polluting Incidents in and Around U.S. Waters. Annual.

## **Comptroller of the Currency**

- <http://www.occ.treas.gov>
- Quarterly Journal.

## **Congressional Clerk of the House**

- <http://clerkweb.house.gov>
- Statistics of the Presidential and Congressional Election Years. Biennial.

## **Council of Economic Advisers**

- <http://www.whitehouse.gov>
- Economic Indicators. Monthly.
- Economic Report of the President. Annual.

## **Council on Environmental Quality**

- <http://www.whitehouse.gov/ceq>
- Environmental Quality. Annual.

## **Department of Agriculture**

- <http://www.usda.gov>
- Agricultural Chemical Usage. Field crops, vegetables (fruits and vegetables alternate years), restricted use pesticides. Chemical application rates and acres treated, selected states and U.S. Annual.
- Agricultural Income and Finance. Situation and Outlook Report. Quarterly.
- Agricultural Outlook. 11 issues per year.
- Agricultural Price Reports. Reports on prices received for farm commodities, prices paid for farm supplies, indexes and parity ratios. Monthly and annual.
- Agriculture and Trade Reports (five per year).
  - Western Europe

## **Department of Agriculture —Con.**

- China
- Developing Economies
- Pacific Rim
- USSR
- CATFISH. Catfish and Trout Production. Annual.
- Census of Agriculture. Quinquennial. (1997, most recent.)
- Cotton Ginnings and Winter Wheat Seedings.
- Crop Production Reports. Acreage, yield, and production of various commodities. Monthly and annual.
- Crop Values Report. Price and value of various commodities. Annual.
- Dairy Product Prices. U.S. cheddar cheese, butter, nonfat dry milk, and dry whey prices and sales volumes. Regional cheddar cheese prices and sales volumes. Weekly.
- Farm Labor. Quarterly.
- Farmline. 11 issues per year.
- Farm Numbers, Value. Farm numbers and land in farms, agricultural cash rents, agricultural land values, foreign ownership of U.S. Agricultural Land (ERS). Annual.
- Financial Characteristics of U.S. (Agriculture Information Bulletin. No. 569.) Annual.
- Food Consumption, Prices, and Expenditures, 1970-97. (Statistical Bulletin No. 928.) Revised annually.
- Food Marketing Review, (Agricultural Economic Report No. 743). Revised annually.
- Food Review. Quarterly.
- Food Spending in American Households. (Statistical Bulletin No. 824.) Annual.
- Foreign Agricultural Trade of the United States (FATUS). Bimonthly with annual supplements on calendar year and fiscal year trade statistics.

# Guide to State Statistical Abstracts

This bibliography includes the most recent statistical abstracts for states published since 1995 plus those that will be issued in late 2002. For some states, a near equivalent has been listed in substitution for, or in addition to, a statistical abstract. All sources contain statistical tables on a variety of subjects for the state as a whole, its component parts, or both. The page counts given for publications are approximate. Internet sites also contain statistical data.

## Alabama

University of Alabama, Center for Business and Economic Research, Box 870221, Tuscaloosa 35487-0221. 205-348-6191. Internet site <<http://cber.cba.ua.edu/>>

*Economic Abstract of Alabama*. 2000. 534 pp.

*Alabama Economic Outlook*, 2002. (Revised annually.)

## Alaska

Department of Commerce, Department of Economic Development, Division of Community and Business Development, P.O. Box 110809, Juneau 99811-0809. 907-465-2017. Internet site <[http://www.dced.state.ak.us/cbd/AEIS/AEIS\\_Home.htm/](http://www.dced.state.ak.us/cbd/AEIS/AEIS_Home.htm/)>

*The Alaska Economy Performance Report*. 1996. Online.

## Arizona

University of Arizona, Economic and Business Research, Eller College of Business and Public Administration, McClelland Hall 103, Tucson 85721-0108. 520-621-2523. Fax: 520-621-2150. Internet site <<http://www.ebr.eller.arizona.edu/>>

*Arizona Statistical Abstract*, 2002. 600 pp.

*Arizona's Economy*. 16-20 pp. Quarterly newsletter.

*Arizona Economic Indicators* 52 pp. Biennial.

*Economic Outlook-Annual Forecast*.

## Arkansas

University of Arkansas at Little Rock, Institute for Economic Advancement, Economic Research, 2801 South University, Little Rock 72204. 501-569-8551.

*Arkansas State and County Economic Data*, 2002. 16 pp. (Revised annually.)

*Arkansas Personal Income Handbook*, 2002. 98 pp.

University of Arkansas at Little Rock, Institute for Economic Advancement, Census State Data Center, 2801 South University, Little Rock 72204. 501-569-8533. Internet site <<http://www.aiea.uarl.edu/>>

*Arkansas Statistical Abstract*, 2000. 740 pp. (Revised biennially.)

## California

Department of Finance, 915 L Street, 8th Floor, Sacramento 95814. 916-322-2263. Internet site <<http://www.dof.ca.gov/html/fdata/stat-abs/sahome.htm>>

*California Statistical Abstract*, 2001.

## Colorado

University of Colorado, Boulder 80309-0420. 303-492-8227. Internet site <<http://www.colorado.edu/libraries/govpubs/online.htm/>>

*Colorado by the Numbers-online only*.

## Connecticut

Connecticut Department of Economic & Community Development, 505 Hudson St., Hartford 06106. 1-860-270-8165. Internet site <<http://www.state.ct.us/ecd/>>

*Connecticut Town Profiles*, 2000. 340 pp.

## Delaware

Delaware Economic Development Office, 99 Kings Highway, Dover 19901. 302-739-4271. Fax 302-739-2027. Internet site <<http://www.state.de.us/dedo/newwebsite/>>

*Delaware Statistical Overview*, 2002. 160 pp.

## District of Columbia

Office of Planning, Data Management Division, 801 North Capitol St., N.E. Washington 20002. 202-442-7603

Office of Policy and Evaluation, Executive Office of the Mayor, 1 Judiciary Square, Suite 920 So., 441 4th St., NW, Washington 20001. 202-727-6979.

*Indices—A Statistical Index to DC Services*, Dec. 1997-98. 273 pp.

## Florida

University of Florida, Bureau of Economic and Business Research, 221 Matherly Hall, Gainesville 32611-7145. 352-392-0171. Internet site <<http://www.bebr.ufl.edu/>>

*Florida Statistical Abstract*, 2001. 35th ed. 821 pp. Also available on diskette or CD-ROM.

*Florida County Perspectives*, 2001. One profile for each county. Annual. Available on CD-ROM.

*Florida County Rankings*, 2001. 8th edition. Annual. Available on CD-ROM.

*Florida and the Nation*, 2002. 6th edition. Annual. Available on CD-ROM.

## Georgia

University of Georgia, Selig Center for Economic Growth, Terry College of Business, Athens 30602-6269.  
706-542-4085. Internet site <<http://www.selig.uga.edu/>>

## Metropolitan Areas: Concepts, Components, and Population

Statistics for metropolitan areas (MAs) shown in the *Statistical Abstract* represent areas designated by the U.S. Office of Management and Budget (OMB) according to published standards that are applied to Census Bureau data. The general concept of an MA is that of a core area containing a large population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. Currently defined MAs are based on application of 1990 standards (which appeared in the Federal Register on March 30, 1990) to 1990 decennial census data and to subsequent Census Bureau population estimates, special census data, and 2000 census results. Current MA definitions were announced by OMB effective June 30, 1999. MAs include metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs), as well as New England county metropolitan areas (NEC-MAs), the county-based alternative metropolitan areas for the city- and town-based MSAs and CMSAs of the six New England states.

Standards for designating metropolitan areas were first issued in 1949 by the then Bureau of the Budget (predecessor of OMB), under the designation "standard metropolitan area" (SMA). The term was changed to "standard metropolitan statistical area" (SMSA) in 1959 and to "metropolitan statistical area" (MSA) in 1983. The collective term "metropolitan area" (MA) became effective in 1990.

OMB has been responsible for the official metropolitan areas since they were first defined, except for the period 1977 to 1981, when they were the responsibility of the Office of Federal Statistical Policy and Standards, Department of Commerce. The standards for designating metropolitan areas were modified in 1958, 1971,

1975, 1980, and 1990. They were modified again in 2000, but OMB will not re-designate areas until 2003.

### Designating MSAs, CMSAs, and PMSAs—

The current standards provide that each newly qualifying MSA must include at least: one city with 50,000 or more inhabitants, or a Census Bureau-defined urbanized area (of at least 50,000 inhabitants) and a total metropolitan population of at least 100,000 (75,000 in New England). Under the standards, the county (or counties) that contains the largest city becomes the "central county" (counties), along with any adjacent counties that have at least 50 percent of their population in the urbanized area surrounding the largest city. Additional "outlying counties" are included in the MSA if they meet specified requirements of commuting to the central counties and other selected requirements of metropolitan character (such as population density and percent urban). In New England, the MSAs are defined in terms of county subdivisions (primarily cities and towns) rather than counties. An area that meets these requirements for recognition as an MSA and also has a population of 1 million or more may be recognized as a CMSA if separate component areas can be identified within the entire area by meeting statistical criteria specified in the standards, and local opinion indicates support for recognizing the component areas. If recognized, the component areas are designated PMSAs, and the entire area becomes a CMSA. PMSAs, like the CMSAs that contain them, are composed of entire counties, except in New England where they are composed of county subdivisions. If no PMSAs are recognized, the entire area is designated as an MSA. As of the June 30, 1999, OMB announcement, there were 258 MSAs, and 18 CMSAs containing 73 PMSAs in the United States. In addition, there were three MSAs, one CMSA, and three PMSAs in Puerto Rico.

**Central cities and MA titles**—The largest city in each MSA/CMSA is designated a “central city.” Additional cities qualify if specified requirements are met concerning population size and commuting patterns. The title of each MSA consists of the names of up to three of its central cities and the name of each state into which the MSA extends. However, a central city with less than 250,000 population and less than one-third the population of the area’s largest city is not included in an MSA title unless local opinion supports its inclusion. Titles of PMSAs also typically are based on central city names, but in certain cases consist of county names. Generally, titles of CMSAs are based on the titles of their component PMSAs.

**Defining New England County Metropolitan Areas (NECMAs)**—The OMB defines NECMAs as a county-based alternative to the county subdivision based New England MSAs and CMSAs. The NECMA for an MSA or CMSA includes: the county containing the first-named city in that MSA/CMSA title (this county may include the first-named cities of other MSAs/ CMSAs as well), and each additional county having at least half its population in the MSAs/CMSAs whose first-named cities are in the previously identified county. NECMAs are not identified for individual PMSAs. There are 12 NECMAs, including 1 for the Boston-Worcester-Lawrence, MA-NH-ME-CT CMSA and 1 for

the Connecticut portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT-PA CMSA. Central cities of a NECMA are those cities in the NECMA that qualify as central cities of an MSA or a CMSA. NECMA titles derive from names of central cities.

**Changes in MAs over time**—Changes in MAs since the 1950 census have consisted chiefly of the recognition of new areas as they reached the minimum required city or area population, and the addition of counties (or county subdivisions in New England) to existing areas as new decennial census data showed them to qualify. In some instances, formerly separate MAs have been merged, a component of an MA has been transferred from one MA to another, or a component has been dropped from an MA. The large majority of changes have taken place on the basis of decennial census data. However, Census Bureau population estimates and special censuses serve as the basis for intercensal updates.

Because of these historical changes in geographic definitions, users must be cautious in comparing MA data from different dates. For some purposes, comparisons of data for MAs as designated at given dates may be appropriate; for other purposes, it may be preferable to maintain consistent MA definitions.

**Table A. New England County Metropolitan Areas (NECMAs) as of June 30, 1999**

[In thousands (145 represents 145,000). As of July]

NECMA	Population, 2001	NECMA	Population, 2001	NECMA	Population, 2001

## Appendix III

# Limitations of the Data

**Introduction**—The data presented in this *Statistical Abstract* came from many sources. The sources include not only Federal statistical bureaus and other organizations that collect and issue statistics as their principal activity, but also governmental administrative and regulatory agencies, private research bodies, trade associations, insurance companies, health associations, and private organizations such as the National Education Association and philanthropic foundations. Consequently, the data vary considerably as to reference periods, definitions of terms and, for ongoing series, the number and frequency of time periods for which data are available.

The statistics presented were obtained and tabulated by various means. Some statistics are based on complete enumerations or censuses while others are based on samples. Some information is extracted from records kept for administrative or regulatory purposes (school enrollment, hospital records, securities registration, financial accounts, social security records, income tax returns, etc.), while other information is obtained explicitly for statistical purposes through interviews or by mail. The estimation procedures used vary from highly sophisticated scientific techniques, to crude “informed guesses.”

Each set of data relates to a group of individuals or units of interest referred to as the *target universe* or *target population*, or simply as the *universe* or *population*. Prior to data collection the target universe should be clearly defined. For example, if data are to be collected for the universe of households in the United States, it is necessary to define a “household.” The target universe may not be completely tractable. Cost and other considerations may restrict data collection to a *survey universe* based on some available list, such list may be it of date. This list is called a *survey frame* or *sampling frame*.

The data in many tables are based on data obtained for all population units, a *census*, or on data obtained for only a portion, or *sample*, of the population units. When the data presented are based on a sample, the sample is usually a scientifically selected *probability sample*. This is a sample selected from a list or sampling frame in such a way that every possible sample has a known chance of selection and usually each unit selected can be assigned a number, greater than zero and less than or equal to one, representing its likelihood or probability of selection.

For large-scale sample surveys, the probability sample of units is often selected as a multistage sample. The first stage of a multistage sample is the selection of a probability sample of large groups of population members, referred to as primary sampling units (PSUs). For example, in a national multistage household sample, PSUs are often counties or groups of counties. The second stage of a multistage sample is the selection, within each PSU selected at the first stage, of smaller groups of population units, referred to as secondary sampling units. In subsequent stages of selection, smaller and smaller nested groups are chosen until the ultimate sample of population units is obtained. To qualify a multistage sample as a probability sample, all stages of sampling must be carried out using probability sampling methods.

Prior to selection at each stage of a multistage (or a single stage) sample, a list of the sampling units or sampling frame for that stage must be obtained. For example, for the first stage of selection of a national household sample, a list of the counties and county groups that form the PSUs must be obtained. For the final stage of selection, lists of households, and sometimes persons within the households, have to be compiled in the field. For surveys of economic entities and for

the economic censuses the Bureau generally uses a frame constructed from the Bureau's Business Register. The Business Register contains all establishments with payroll in the United States including small single establishment firms as well as large multi-establishment firms.

Wherever the quantities in a table refer to an entire universe, but are constructed from data collected in a sample survey, the table quantities are referred to as *sample estimates*. In constructing a sample estimate, an attempt is made to come as close as is feasible to the corresponding universe quantity that would be obtained from a complete census of the universe. Estimates based on a sample will, however, generally differ from the hypothetical census figures. Two classifications of errors are associated with estimates based on sample surveys: (1) *sampling error*—the error arising from the use of a sample, rather than a census, to estimate population quantities and (2) *nonsampling error*—those errors arising from nonsampling sources. As discussed below, the magnitude of the sampling error for an estimate can usually be estimated from the sample data. However, the magnitude of the nonsampling error for an estimate can rarely be estimated. Consequently, actual error in an estimate exceeds the error that can be estimated.

The particular sample used in a survey is only one of a large number of possible samples of the same size which could have been selected using the same sampling procedure. Estimates derived from the different samples would, in general, differ from each other. The *standard error* (SE) is a measure of the variation among the estimates derived from all possible samples. The standard error is the most commonly used measure of the sampling error of an estimate. Valid estimates of the standard errors of survey estimates can usually be calculated from the data collected in a probability sample. For convenience, the standard error is sometimes expressed as a percent of the estimate and is called the relative standard error or *coefficient of variation* (CV). For example, an estimate of 200 units with an estimated standard error of 10 units has an estimated CV of 5 percent.

A sample estimate and an estimate of its standard error or CV can be used to construct interval estimates that have a prescribed confidence that the interval includes the average of the estimates derived from all possible samples with a known probability. To illustrate, if all possible samples were selected under essentially the same general conditions, and using the same sample design, and if an estimate and its estimated standard error were calculated from each sample, then:

- 1) Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average estimate derived from all possible samples;
- 2) approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average estimate derived from all possible samples;
- and 3) approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average estimate derived from all possible samples.

Thus, for a particular sample, one can say with the appropriate level of confidence (e.g., 90 percent or 95 percent) that the average of all possible samples is included in the constructed interval. Example of a confidence interval: An estimate is 200 units with a standard error of 10 units. An approximately 90 percent confidence interval (plus or minus 1.6 standard errors) is from 184 to 216.

All surveys and censuses are subject to nonsampling errors. Nonsampling errors are of two kinds—*random* and *nonrandom*. Random nonsampling errors arise because of the varying interpretation of questions (by respondents or interviewers) and varying actions of coders, keyers, and other processors. Some randomness is also introduced when respondents must estimate. Nonrandom nonsampling errors result from total nonresponse (no usable data obtained for a sampled unit), partial or item nonresponse (only a portion of a response may be usable), inability or unwillingness on the part of respondents to provide correct information, difficulty interpreting questions, mistakes

in recording or keying data, errors of collection or processing, and coverage problems (overcoverage and undercoverage of the target universe). Random nonresponse errors usually, but not always, result in an understatement of sampling errors and thus an overstatement of the precision of survey estimates. Estimating the magnitude of nonsampling errors would require special experiments or access to independent data and, consequently, the magnitudes are seldom available.

Nearly all types of nonsampling errors that affect surveys also occur in complete censuses. Since surveys can be conducted on a smaller scale than censuses, nonsampling errors can presumably be controlled more tightly. Relatively more funds and effort can perhaps be expended toward eliciting responses, detecting and correcting response error, and reducing processing errors. As a result, survey results can sometimes be more accurate than census results.

To compensate for suspected nonrandom errors, adjustments of the sample estimates are often made. For example, adjustments are frequently made for nonresponse, both total and partial. Adjustments made for either type of nonresponse are often referred to as *imputations*. Imputation for total nonresponse is usually made by substituting for the questionnaire responses of the nonrespondents the “average” questionnaire responses of the respondents. These imputations usually are made separately within various groups of sample members, formed by attempting to place respondents and nonrespondents together that have “similar” design or ancillary characteristics. Imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are “similar” to those of the nonrespondent.

For an estimate calculated from a sample survey, the *total error* in the estimate is composed of the sampling error, which can usually be estimated from the sample, and the nonsampling error, which usually cannot be estimated from the

sample. The total error present in a population quantity obtained from a complete census is composed of only nonsampling errors. Ideally, estimates of the total error associated with data given in the *Statistical Abstract* tables should be given. However, due to the unavailability of estimates of nonsampling errors, only estimates of the levels of sampling errors, in terms of estimated standard errors or coefficients of variation, are available. To obtain estimates of the estimated standard errors from the sample of interest, obtain a copy of the referenced report which appears at the end of each table.

**Principal data bases**—Beginning below are brief descriptions of 41 of the sample surveys and censuses that provide a substantial portion of the data contained in this *Abstract*.

## U.S. DEPARTMENT OF AGRICULTURE, National Agriculture Statistics Service

### Census of Agriculture

#### *Universe, Frequency, and Types of Data:*

Complete count of U.S. farms and ranches conducted once every 5 years with data at the national, state, and county level. Data published on farm numbers and related items/ characteristics.

*Type of Data Collection Operation:* Complete census for— number of farms; land in farms; estimated market value of land and buildings, agriculture products sold; total cropland; irrigated land; farm operator characteristics; livestock and poultry inventory and sales; and selected crops harvested. Total farm production expenses, machinery and equipment, fertilizer and chemicals, and farm labor are estimated from a sample of farms.

*Data Collection and Imputation Procedures:* Data collection is by mailing questionnaires to all farmers and ranchers. Nonrespondents are contacted by telephone and correspondence followups. Imputations were made for all nonresponse item/characteristics.

*Estimates of Sampling Error:* Variability in the estimates is due to the sample selection and estimation for items collected

by sample and census nonresponse estimation procedures. The CVs for national and state estimates are generally very small. Approximately 85 percent response rate.

**Other (nonsampling) Errors:** Nonsampling errors are due to incompleteness of the census mailing list, duplications on the list, respondent reporting errors, errors in editing reported data, and in imputation for missing data. Evaluation studies are conducted to measure certain non-sampling errors such as list coverage and classification error. Results from the evaluation program for the 1997 census indicate the net under coverage amounted to about 13 percent of the nations total farms.

**Sources of Additional Material:** U.S. Department of Agriculture (NASS), *1997 Census of Agriculture*, Volume 2, Subject Series—Part 1, *Agriculture Atlas of the U.S.*; Part 2, *Coverage Evaluation*; Part 3, *Rankings of States and Counties*; Part 4, *History*; Part 5, *ZIP Code Tabulation of Selected Items*; and Volume 3 *Special Studies*, Part 1, *Farm and Ranch Irrigation Survey*; Part 2, *Census of Horticultural Specialties*; Part 3, *Census of Aquaculture*.

## Basic Area Frame Sample

**Universe, Frequency, and Types of Data:** June agricultural survey collects data on planted acreage and livestock inventories. The survey also serves to measure list incompleteness and is subsampled for multiple frame surveys.

**Type of Data Collection Operation:** Stratified probability sample of about 11,000 land area units of about 1 sq. mile (range from 0.1 sq. mile in cities to several sq. miles in open grazing areas). Sample includes 42,000 parcels of agricultural land. About 20 percent of the sample replaced annually.

**Data Collection and Imputation Procedures:** Data collection is by personal enumeration. Imputation is based on enumerator observation or data reported by respondents having similar agricultural characteristics.

**Estimates of Sampling Error:** Estimated CVs range from 1 percent to 2 percent for regional estimates to 3 percent to 6 percent for state estimates of major crop acres and livestock inventories.

**Other (nonsampling) Errors:** Minimized through rigid quality controls on the collection process and careful review of all reported data.

**Sources of Additional Material:** U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service*, (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

## Multiple Frame Surveys

**Universe, Frequency, and Types of Data:** Surveys of U.S. farm operators to obtain data on major livestock inventories, selected crop acreage and production, grain stocks, and farm labor characteristics; farm economic data and chemical use data.

**Type of Data Collection Operation:** Primary frame is obtained from general or special purpose lists, supplemented by a probability sample of land areas used to estimate for list incompleteness.

**Data Collection and Imputation Procedures:** Mail, telephone, or personal interviews used for initial data collection. Mail nonrespondent followup by phone and personal interviews. Imputation based on average of respondents.

**Estimates of Sampling Error:** Estimated CV for number of hired farm workers is about 3 percent. Estimated CVs range from 1 percent to 2 percent for regional estimates to 3 percent to 6 percent for state estimates of livestock inventories and crop acreage.

**Other (nonsampling) Errors:** In addition to above, replicated sampling procedures used to monitor effects of changes in survey procedures.

**Sources of Additional Material:** U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service*, (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

## Objective Yield Surveys

**Universe, Frequency, and Types of Data:** Surveys for data on corn, cotton, potatoes, soybeans, and wheat, to forecast and estimate yields.

*Type of Data Collection Operation:* Random location of plots in probability sample. Corn, cotton, soybeans, spring wheat, and durum wheat selected in June from Basic Area Frame Sample (see above). Winter wheat and potatoes selected from March and June multiple frame surveys, respectively.

*Data Collection and Imputation Procedures:* Enumerators count and measure plant characteristics in sample fields. Production measured from plots at harvest. Harvest loss measured from post harvest gleanings.

*Estimates of Sampling Error:* CVs for national estimates of production are about 2-3 percent.

*Other (nonsampling) Errors:* In addition to above, replicated sampling procedures used to monitor effects of changes in survey procedures.

*Sources of Additional Material:* U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service*, (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

## U.S. CENSUS BUREAU

### County Business Patterns

*Universe, Frequency, and Types of Data:* Annual tabulation of basic data items extracted from the Business Register, a file of all known single and multi establishment companies maintained and updated by the Census Bureau. Data include number of establishments, number of employees, first quarter and annual payrolls, and number of establishments by employment size class. Data are excluded for self-employed persons, domestic service workers, railroad employees, agricultural production workers, and most government employees.

*Type of Data Collection Operation:* The annual Company Organization Survey provides individual establishment data for multi establishment companies. Data for single establishment companies are obtained from various Census Bureau programs, such as the Annual Survey of

Manufactures and Current Business Surveys, as well as from administrative records of the Internal Revenue Service and the Social Security Administration.

*Estimates of Sampling Error:* Not Applicable. Other (nonsampling) Error: Response rates of greater than 85 percent for the 2000 Company Organization Survey.

*Sources of Additional Materials:* U.S. Census Bureau, *General Explanation of County Business Patterns*.

### Census of Manufactures

*Universe, Frequency, and Types of Data:* Conducted every 5 years to obtain information on labor, materials, capital input and output characteristics, plant location, and legal form of organization for all plants in the United States with one or more paid employees. Universe was 365,000 manufacturing establishments in 1997.

*Type of Data Collection Operation:* Complete enumeration of data items obtained from 210,000 firms. Administrative records from Internal Revenue Service (IRS) and Social Security Administration (SSA) are used for 155,000 smaller single-location firms, which were determined by various cutoffs based on size and industry.

*Data Collection and Imputation Procedures:* Five mail and telephone follow-ups for larger nonrespondents. Data for small single-location firms (generally those with fewer than 10 employees) not mailed census questionnaires were estimated from administrative records of IRS and SSA. Data for nonrespondents were imputed from related responses or administrative records from IRS and SSA. Approximately 8 percent of total value of shipments was represented by fully imputed records in 1987.

*Estimates of Sampling Error:* Not applicable.

*Other (nonsampling) Errors:* Based on evaluation studies, estimates of non-sampling errors for 1972 were about 1.3 percent for estimated total payroll; 2 percent for total employment; and 1 percent for value of shipments. Estimates for later years are not available.

*Sources of Additional Material:* U.S. Census Bureau, 1987 *Census of Manufactures, Industry Series, Geographic Area Series, and Subject Series*.

## Foreign Trade—Export Statistics

### *Universe, Frequency, and Types of Data:*

The export declarations collected by Customs are processed each month to obtain data on the movement of U.S. merchandise exports to foreign countries. Data obtained include value, quantity, and shipping weight of exports by commodity, country of destination, Customs district of exportation, and mode of transportation.

*Type of Data Collection Operation:* Shipper's Export Declarations (paper and electronic) are required to be filed for the exportation of merchandise valued over \$1,500 - \$2,500. Customs officials collect and transmit the documents to the Census Bureau on a flow basis for data compilation. Value data for shipments valued under \$2,501 are estimated, based on established percentages of individual country totals.

*Data Collection and Imputation Procedures:* Statistical copies of Shipper's Export Declarations are received on a daily basis from Customs ports throughout the country and subjected to a monthly processing cycle. They are fully processed to the extent they reflect items valued over \$2,500. Estimates for shipments valued at \$2,500 or less are made, based on established percentages of individual country totals.

*Estimates of Sampling Error:* Not applicable.

*Other (nonsampling) Errors:* Clerical and complex computer checks intercept most processing errors and minimize otherwise significant reporting errors; other nonsampling errors are caused by undercounting of exports to Canada due to the nonreceipt of some Shipper's Export Declarations.

*Sources of Additional Material:* U.S. Census Bureau, U.S. *International Trade in Goods and Services: Exports, General Imports, and Imports for Consumption, SITC, Commodity by Country*, FT 925 (discontinued after 1996), U.S. *Imports of Merchandise*, and U.S. *Exports of Merchandise*.

## Foreign Trade—Import Statistics

### *Universe, Frequency, and Types of Data:*

The import entry documents collected are processed each month to obtain data on the movement of merchandise imported into the United States. Data obtained include value, quantity, and shipping weight by commodity, country of origin, Customs district of entry, and mode of transportation.

*Type of Data Collection Operation:* Import entry documents, either paper or electronic, are required to be filed for the importation of goods into the United States valued over \$2,000 or for articles which must be reported on formal entries. Customs officials collect and transmit statistical copies of the documents to the Census Bureau on a flow basis for data compilation. Estimates for shipments valued under \$2,001 and not reported on formal entries are based on estimated established percentages of individual country totals.

*Data Collection and Imputation Procedures:* Statistical copies of import entry documents, received on a daily basis from Customs ports of entry throughout the country, are subjected to a monthly processing cycle. They are fully processed to the extent they reflect items valued at \$2,501 and over or items which must be reported on formal entries.

*Estimates of Sampling Error:* Not applicable.

*Other (nonsampling) Errors:* Verification of statistical data reporting by Customs officials prior to transmittal and a subsequent program of clerical and computer checks are utilized to hold nonsampling errors arising from reporting and/or processing errors to a minimum.

*Sources of Additional Material:* U.S. Census Bureau, U.S. *International Trade in Goods and Services: Exports, General Imports, and Imports for Consumption, SITC, Commodity by Country*, FT 925 (discontinued after 1996), U.S. *Imports of Merchandise*, and U.S. *Exports of Merchandise*.

## Census of Governments

### *Universe, Frequency, and Types of Data:*

Survey of all governmental units in the United States conducted every 5 years

to obtain data on government revenue, expenditures, debt, assets, employment and employee retirement systems, property values, public school systems, and number, size, and structure of governments.

*Type of Data Collection Operation:* Complete census. List of units derived through classification of government units recently authorized in each state and identification, counting, and classification of existing local governments and public school systems.

*Data Collection and Imputation Procedures:* Data collected through field and office compilation of financial data from official records and reports for states and large local governments; mail canvass of selected data items, like state tax revenue and employee retirement systems; and collection of local government statistics through central collection arrangements with state governments.

*Estimates of Sampling Error:* Not applicable.

*Other (nonsampling) Errors:* Some nonsampling errors may arise due to possible inaccuracies in classification, response, and processing.

*Sources of Additional Material:* U.S. Census Bureau, *Census of Governments, 1997*, various reports, and *State Government Finances: 1992*, GF 92, No. 3.

## Annual Surveys of State and Local Government

*Universe, Frequency, and Types of Data:* Sample survey conducted annually to obtain data on revenue, expenditure, debt, and employment of state and local governments. Universe is all governmental units in the United States (about 87,500).

*Type of Data Collection Operation:* Sample survey includes all state governments, county governments with 100,000+ population, municipalities with 75,000+ population, townships with 50,000+ population, all school districts with 10,000+ enrollment in March 1999, and other governments meeting certain criteria; probability sample for remaining units.

*Data Collection and Imputation Procedures:* Field and office compilation of data from official records and reports

for states and large local governments; central collection of local governmental financial data through cooperative agreements with a number of state governments; mail canvass of other units with mail and telephone follow-ups of nonrespondents. Data for nonresponses are imputed from previous year data or obtained from secondary sources, if available.

*Estimates of Sampling Error:* State and local government totals are generally subject to sampling variability of less than 3 percent.

*Other (nonsampling) Errors:* Nonresponse rate is less than 15 percent for local governments. Other possible errors may result from undetected inaccuracies in classification, response, and processing.

*Sources of Additional Material:* U.S. Census Bureau, *Public Employment in 1992*, GE 92, No. 1, *Governmental Finances in 1991-1992*, GF 92, No. 5, and *Census of Governments, 1997*, various reports. Web site references: Employment - state and local site: <<http://www.census.gov/govs/www/apes.html>>. Finance - state and local site: <<http://www.census.gov/govs/estimate.html>>. Finance - state site: <<http://www.census.gov/govs/www/state.html>>.

## American Housing Survey

*Universe, Frequency, and Types of Data:* Conducted nationally in the fall in odd numbered years to obtain data on the approximately 116 million occupied or vacant housing units in the United States (group quarters are excluded). Data include characteristics of occupied housing units, vacant units, new housing and mobile home units, financial characteristics, recent mover households, housing and neighborhood quality indicators, and energy characteristics.

*Type of Data Collection Operation:* The national sample was a multistage probability sample with about 53,000 units eligible for interview in 2001. Sample units, selected within 394 PSUs, were surveyed over a 4-month period.

*Data Collection and Imputation Procedures:* For 2001, the survey was conducted by personal interviews. The interviewers obtained the information

from the occupants or, if the unit was vacant, from informed persons such as landlords, rental agents, or knowledgeable neighbors.

*Estimates of Sampling Error:* For the national sample, illustrations of the S.E. of the estimates are provided in the Appendix D of the 2001 report. As an example, the estimated CV is about 0.2 percent for the estimated percentage of owner occupied units with two persons.

*Other (nonsampling) Errors:* Response rate was about 93 percent. Nonsampling errors may result from incorrect or incomplete responses, errors in coding and recording, and processing errors. For the 2001 national sample, approximately 1.9 percent of the total housing inventory was not adequately represented by the AHS sample.

*Sources of Additional Material:* U.S. Census Bureau, *Current Housing Reports*, Series H-150 and H-170, *American Housing Survey*.

## Monthly Survey of Construction

*Universe, Frequency, and Types of Data:* Survey conducted monthly of newly constructed housing units (excluding mobile homes). Data are collected on the start, completion, and sale of housing. (Annual figures are aggregates of monthly estimates.)

*Type of Data Collection Operation:* Probability sample of housing units obtained from building permits selected from 17,000 places. For nonpermit places, multistage probability sample of new housing units selected in 169 PSUs. In those areas, all roads are canvassed in selected enumeration districts.

*Data Collection and Imputation Procedures:* Data are obtained by telephone inquiry and field visit.

*Estimates of Sampling Error:* Estimated CV of 3 percent to 4 percent for estimates of national totals, but may be higher than 20 percent for estimated totals of more detailed characteristics, such as housing units in multiunit structures.

*Other (nonsampling) Errors:* Response rate is over 90 percent for most items. Nonsampling errors are attributed to definitional problems, differences in

interpretation of questions, incorrect reporting, inability to obtain information about all cases in the sample, and processing errors.

*Sources of Additional Material:* All data are available on the Internet at <<http://www.census.gov/const/www/newsresconstindex.html>>. Further documentation of the survey is also available at that site.

## Value of Construction Put in Place

*Universe, Frequency, and Types of Data:* Survey conducted monthly on total value of all construction put in place in the current month, both public and private projects. Construction values include costs of materials and labor, contractors' profits, overhead costs, cost of architectural and engineering work, and miscellaneous project costs. (Annual figures are aggregates of monthly estimates.)

*Type of Data Collection Operation:* Varies by type of activity: Total cost of private one-family houses started each month is distributed into value put in place using fixed patterns of monthly construction progress; using a multistage probability sample, data for private multifamily housing are obtained by mail from owners of multiunit projects. Data for residential additions and alterations are obtained in a quarterly survey measuring expenditures; monthly estimates are interpolated from quarterly data. Estimates of value of private nonresidential construction, and state and local government construction are obtained by mail from owners (or agents) for a probability sample of projects. Estimates of farm nonresidential construction expenditures are based on U.S. Department of Agriculture annual estimates of construction; public utility estimates are obtained from reports submitted to Federal regulatory agencies and from private utility companies; estimates of Federal construction are based on monthly data supplied by Federal agencies.

*Data Collection and Imputation Procedures:* See "Type of Data Collection Operation." Imputation accounts for approximately 20 percent of estimated value of construction each month.

*Estimates of Sampling Error:* CV estimates for private nonresidential construction range from 3 percent for estimated value of industrial buildings to 9 percent for religious buildings. CV is approximately 2 percent for total new private nonresidential buildings.

*Other (nonsampling) Errors:* For directly measured data series based on samples, some nonsampling errors may arise from processing errors, imputations, and misunderstanding of questions. Indirect data series are dependent on the validity of the underlying assumptions and procedures.

*Sources of Additional Material:* U.S. Census Bureau, *Construction Reports*, Series C30, *Value of Construction Put in Place*.

## Annual Survey of Manufactures

*Universe, Frequency, and Types of Data:*

The Annual Survey of Manufactures (ASM) is conducted annually, except for years ending in 2 and 7 for all manufacturing establishments having one or more paid employees. The purpose of the ASM is to provide key intercensal measures of manufacturing activity, products, and location for the public and private sectors. The ASM provides statistics on employment, payroll, worker hours, payroll supplements, cost of materials, value added by manufacturing, capital expenditures, inventories, and energy consumption. It also provides estimates of value of shipments for 1,500 classes of manufactured products.

*Type of Data Collection Operation:* The ASM includes approximately 55,000 establishments selected from the census universe of 365,000 manufacturing establishments. Some 25,000 large establishments are selected with certainty, and some 30,000 other establishments are selected with probability proportional to a composite measure of establishment size. The survey is updated from two sources; Internal Revenue Service administrative records are used to include new single-unit manufacturers and the Company organization Survey identifies new establishments of multi-unit forms.

*Data Collection and Imputation Procedures:* Survey is conducted by mail with phone and mail follow-ups of nonrespondents. Imputation (for all nonresponse items) is based on previous year reports, or for new establishments in survey, on industry averages.

*Estimates of Sampling Error:* Estimated standard errors for number of employees, new expenditure, and for value added totals are given in annual publications. For U.S. level industry statistics, most estimated standard errors are 2 percent or less, but vary considerably for detailed characteristics.

*Other (nonsampling) Errors:* Response rate is about 85 percent. Nonsampling errors include those due to collection, reporting, and transcription errors, many of which are corrected through computer and clerical checks.

*Sources of Additional Material:* U.S. Census Bureau, *Annual Survey of Manufactures*, and Technical Paper 24.

## Census of Population

*Universe, Frequency, and Types of Data:*

Complete count of U.S. population conducted every 10 years since 1790. Data obtained on number and characteristics of people in the U.S.

*Type of Data Collection Operation:* In 1970, 1980, 1990 and 2000 complete census for some items—age, sex, race, and relationship to householder. In 1970, other items collected from a 5 percent and a 15 percent probability (systematic) sample of the population. In 1980, approximately 19 percent of the housing units were included in the sample; in 1990 and 2000, approximately 17 percent.

*Data Collection and Imputation Procedures:* In 1970, extensive use of mail questionnaires in urban areas; personal interviews in most rural areas. In 1980, 1990, and 2000, mail questionnaires were used in even more areas than in 1970, with personal interviews in the remainder. Extensive telephone and personal followup for nonrespondents was done in the censuses. Imputations were made for missing characteristics.

*Estimates of Sampling Error:* Sampling errors for data are estimated for all items collected by sample and vary by

characteristic and geographic area. The CVs for national and state estimates are generally very small.

*Other (nonsampling) Errors:* Since 1950, evaluation programs have been conducted to provide information on the magnitude of some sources of nonsampling errors such as response bias and undercoverage in each census. Results from the evaluation program for the 1990 census indicate that the estimated net under coverage amounted to about 1.5 percent of the total resident population.

*Sources of Additional Material:* U.S. Census Bureau, *The Coverage of Population in the 1980 Census*, PHC80-E4; *Content Reinterview Study: Accuracy of Data for Selected Population and Housing Characteristics as Measured by Reinterview*, PHC80-E2; *1980 Census of Population*, Vol. 1, (PC80-1), Appendixes B, C, and D.

## Current Population Survey (CPS)

*Universe, Frequency, and Types of Data:* Nationwide monthly sample survey of civilian noninstitutional population, 15 years old or over, to obtain data on employment, unemployment, and a number of other characteristics.

*Type of Data Collection Operation:* Multi-stage probability sample of about 50,000 households in 754 PSUs in 1996 expanded to about 60,000 households in July 2001. Over-sampling in some states and the largest MSAs to improve reliability for those areas of employment data on annual average basis. A continual sample rotation system is used. Households are in sample 4 months, out for 8 months, and in for 4 more. Month-to-month overlap is 75 percent; year-to-year overlap is 50 percent.

*Data Collection and Imputation Procedures:* For first and fifth months that a household is in sample, personal interviews; other months, approximately, 85 percent of the data collected by phone. Imputation is done for both item and total nonresponse. Adjustment for total nonresponse is done by a predefined cluster of units, by MSA size and residence; for item nonresponse imputation varies by subject matter.

*Estimates of Sampling Error:* Estimated CVs on national annual averages for labor force, total employment, and nonagricultural employment, 0.2 percent; for total unemployment and agricultural employment, 1.0 percent to 2.5 percent. The estimated CVs for family income and poverty rate for all persons in 1986 are 0.5 percent and 1.5 percent, respectively. CVs for subnational areas, such as states, would be larger and would vary by area.

*Other (nonsampling) Errors:* Estimates of response bias on unemployment are not available, but estimates of unemployment are usually 5 percent to 9 percent lower than estimates from reinterviews. Six to 7.0 percent of sample households unavailable for interviews.

*Sources of Additional Material:* U.S. Census Bureau and Bureau of Labor Statistics, *Current Population Survey; Design and Methodology*, (Tech. Paper 63), available on Internet <[www.bls.census.gov/cps/tp/tp63.htm](http://www.bls.census.gov/cps/tp/tp63.htm)> and Bureau of Labor Statistics, *Employment and Earnings*, monthly, Explanatory Notes and Estimates of Error, Tables 1-A through 1-D and *BLS Handbook of Methods*, Chapter 1 (Bulletin 2490.)

## Surveys of Minority- and Women-Owned Business Enterprises (SMOBE/SWOBE)

*Universe, Frequency, and Types of Data:*

The surveys provide basic economic data on businesses owned by Blacks, Hispanics, Asians, Pacific Islanders, Alaska Natives, American Indians, and Women. All firms operating during 1997, except those classified as agricultural, are represented. The lists of all firms (or sample frames) are compiled from a combination of business tax returns and data collected on other economic census reports. The published data include the number of firms, gross receipts, number of paid employees, and annual payroll. The data are presented by geographic area, industry, size of firm, and legal form of organization of firm.

*Type of Data Collection Operation:*

The surveys are based on a stratified probability sample of approximately 2.5 million firms from a universe of approximately 20.8 million firms. There were

approximately 5.3 million firms with paid employees and 15.5 million firms with no paid employees. The data are based on the entire firm rather than on individual locations of a firm.

*Data Collection and Imputation Procedures:* Data were collected through a mailout/mailback operation. Compensation for missing data is addressed through reweighting, edit correction, and standard statistical imputation methods.

*Estimates of Sampling Error:* Variability in the estimates is due to the sample selection and estimation for items collected by SMOBE/SWOBE. CVs are applicable to only published cells in which sample cases are tabulated. The CVs for number of firms and receipts at the national level range from 1 to 4 percent. Other (nonsampling) Error: Nonsampling errors are attributed to many sources: inability to obtain information for all cases in the universe, adjustments to the weights of respondents to compensate for nonrespondents, imputation for missing data, data errors and biases, mistakes in recording or keying data, errors in collection or processing, and coverage problems.

*Sources of Additional Materials:* U.S. Census Bureau, *Guide to the 1997 Economic Census and Related Statistics*.

## **1997 Economic Census** (Geographic Area Series and Subject Series Reports) (for NAICS sectors 22, 42, 4445, 48-49, and 51-81)

*Universe, Frequency, and Types of Data:* Conducted every 5 years to obtain data on number of establishments, number of employees, total payroll size, total sales, and other industry specific statistics. In 1997, the universe was all employer and nonemployer establishments primarily engaged in wholesale, retail, utilities, finance & insurance, real estate, transportation & warehousing, and other service industries.

*Type of Data Collection Operation:* All large employer firms were surveyed (i.e. all employer firms above the payroll size cutoff established to separate large from small employers) plus a 5 percent to 25 percent sample of the small employer firms. Firms with no employees were not required to file a census return.

*Data Collection and Imputation Procedures:* Mail questionnaires were used with both mail and telephone followups for nonrespondents. Data for nonrespondents and for small employer firms not mailed a questionnaire were obtained from administrative records of the IRS and Social Security Administration or imputed. Nonemployer data were obtained exclusively from IRS 1997 income tax returns.

*Estimates of Sampling Error:* Not applicable for basic data such as sales, revenue, payroll, etc. Other (nonsampling) Errors: Trade area level unit response rates in 1997 ranged from 85 percent to 99 percent. Item response rates ranged from 60 percent to 90 percent with lower rates for the more detailed questions. Nonsampling errors may occur during the collection, reporting, and keying of data, and industry misclassification.

*Sources of Additional Material:* U.S. Census Bureau, *1997 Economic Census: Geographic Area Series and Subject Series Reports* (by NAICS sector), Appendix C and <[www.census.gov/con97.html](http://www.census.gov/con97.html)>

## **Current Business Surveys**

*Universe, Frequency, and Types of Data:* Provides monthly estimates of retail sales by kind of business, and end-of-month inventories of retail stores; wholesale sales and end-of-month inventories; and annual receipts of selected service industries.

*Type of Data Collection Operation:* Probability sample of all firms from a list frame and, additionally, for retail and service an area frame. The list frame is the Bureau's Standard Statistical Establishment List (SSEL) updated quarterly for recent birth Employer Identification (EI) Numbers issued by the Internal Revenue Service and assigned a kind-of-business code by the Social Security Administration. The largest firms are included monthly.

*Data Collection and Imputation Procedures:* Data are collected by mail questionnaire with telephone followups for nonrespondents. Imputation made for each nonresponse item and each item failing edit checks.

*Estimates of Sampling Error:* For the 2001 monthly surveys, median CVs are about 0.6 percent for estimated total retail sales, 1.4 percent for wholesale sales, 1.7 percent for wholesale inventories. For dollar volume of receipts, CVs from the Service Annual Survey vary by kind of business and range between 1.5 percent to 15.0 percent. Sampling errors are shown in monthly publications.

*Other (nonsampling) Errors:* Imputation rates are about 18 percent to 23 percent for monthly retail sales, 30 percent for wholesale sales, about 32 percent for monthly wholesale inventories and 14 percent for the *Service Annual Survey*.

*Sources of Additional Material:* U.S. Census Bureau, *Current Business Reports*, *Monthly Retail Trade*, *Monthly Wholesale Trade*, and *Service Annual Survey*.

## Service Annual Surveys

### *Universe, Frequency, and Types of Data:*

Provides national estimates for taxable and tax-exempt firms on selected service industries as defined by the North American Industrial Classification System (NAICS). Industries covered by the Service Annual Survey include all or part of the following NAICS sectors: Transportation and Warehouse (NAICS 48-49); Information (NAICS 51); Finance (NAICS 52); Real Estate and Leasing (NAICS 53); Professional, Scientific, and Technical Services (NAICS 54); Administrative and Support and Waste Management and Remediation Services (NAICS 56); Health Care and Social Assistance (NAICS 62); Arts, Entertainment, and Recreation (NAICS 71); and Other Services, except Public Administration (NAICS 81). Items collected include total revenue and revenue from e-commerce transactions; and for selected industries, revenue from detailed service products, total expenses and expenses by major type, revenue from exported services, and inventories. The Service Annual Survey is mailed in January and collects calendar year data for the prior year. Data collection continues for approximately 14 weeks. The data are published approximately 12 months after the initial survey mailing.

*Type of Data Collection Operation:* Data are obtained from a mail-out/mail-back probability sample of approximately 50,000 selected service firms with paid employees. The survey is supplemented with business births on a quarterly basis. The sampling frame for the Service Annual Survey (SAS) has two types of sampling units represented—Employer Identification Numbers (EINS) and large, multiple-establishment firms. Both sampling units represent clusters of one or more establishments owned or controlled by the same firm. The information used to create these sampling units was extracted the Census Bureau's Business Register and includes information in the most recent Economic Census.

*Estimates of Sampling Error:* The estimates are based on a sample. Exact agreement with results that would be obtained from a complete enumeration of firms represented on the sampling frame using the same enumeration procedures is not expected. However, because each firm on the sampling frame has a known probability of being selected into the sample, it is possible to estimate the sampling variability of the survey estimates. The particular sample used in this survey is one of a large number of samples of the same size that could have been selected using the same design. If all possible samples had been surveyed under the same conditions, an estimate of an unknown population value could have been obtained from each sample. These samples give rise to a distribution of estimates for the unknown population value. A statistical measure of the variability among these estimates is the standard error, which can be approximated from any one sample.

*Other (nonsampling) Errors:* Nonsampling error encompasses all other factors that contribute to the total error of a sample survey estimate and may occur in Census. In the Service Annual Survey, nonsampling error can be attributed to many sources: inability to obtain information about all units in the sample; response errors; differences in the interpretation of the questions; mistakes in coding or keying the data obtained; and other errors of collection, response, coverage, and processing.

*Sources of Additional Material:* U.S. Census Bureau, *Current Business Reports*, *Service Annual Survey*, Census Bureau Web site <<http://www.census.gov/econ/www/servmenu.html>>.

## Wholesale Trade Survey

*Universe, Frequency, and Types of Data:* Provides monthly estimates of retail sales by kind of business, and end of month inventories of retail stores; wholesale sales and end of month inventories; and annual receipts of selected service industries.

*Type of Data Collection Operation:* Probability sample of all firms from a list frame and, additionally, for retail and service an area frame. The list frame is the Bureau's Standard Statistical Establishment List (SSEL) updated quarterly for recent birth Employer Identification (EI) Numbers issued by the Internal Revenue Service and assigned a kind of business code by the Social Security Administration. The largest firms are included monthly.

*Data Collection and Imputation Procedures:* Data are collected by mail questionnaire with telephone followups for nonrespondents. Imputation made for each nonresponse item and each item failing edit checks.

*Estimates of Sampling Error:* For the 2001 monthly surveys median CV's are about 0.6 percent for estimated total retail sales, 1.4 for wholesale sales, 1.7 for wholesale inventories. For dollar volume of receipts, CV's from the Service Annual Survey vary by kind of business and range between 1.5 percent to 15.0 percent. Sampling errors are shown in monthly publications.

*Other (nonsampling) Errors:* Imputation rates are about 18 percent to 23 percent for monthly retail sales, 30 percent for wholesale sales, about 32 percent for monthly wholesale inventories and 14 percent for the Service Annual Survey.

*Sources of Additional Material:* U.S. Census Bureau, *Current Business Reports*, *Monthly Retail Trade*, *Monthly Wholesale Trade*, and *Service Annual Survey*.

## Monthly Retail Trade Survey

*Universe, Frequency, and Types of Data:* Provides monthly estimates of retail sales by kind of business and end of month inventories of retail stores; wholesale sales and end of month inventories; and annual receipts of selected service industries.

*Type of Data Collection Operation:* Probability sample of all firms from a list frame. The list frame is the Bureau's Standard Statistical Establishment List (SSEL) updated quarterly for recent birth Employer Identification (EI) Numbers issued by the Internal Revenue Service and assigned a kind of business code by the Social Security Administration. The largest firms are included monthly; a sample of others is included every month also.

*Data Collection and Imputation Procedures:* Data are collected by mail questionnaire with telephone followups for nonrespondents. Imputation made for each nonresponse item and each item failing edit checks.

*Estimates of Sampling Error:* For the 1989 monthly surveys, CV's are about 0.5 percent for estimated total retail sales, 0.99 percent for estimated total retail inventories, 1.2 percent for wholesale sales, 1.7 percent for wholesale inventories. For dollar volume of receipts, CV's from the Service Annual Survey vary by kind of business and range between 1.5 percent to 15.0 percent. Sampling errors are shown in monthly publications.

*Other (nonsampling) Errors:* Imputation rates are about 20 percent for monthly retail sales, 28 percent for monthly retail inventories, 30 percent for wholesale sales, about 32 percent for monthly wholesale inventories and 14 percent for the Service Annual Survey.

*Sources of Additional Material:* U.S. Census Bureau, *Current Business Reports*, *Monthly Retail Trade*, *Monthly Wholesale Trade*, *Service Annual Survey*.

U.S. DEPARTMENT OF  
EDUCATION, National Center  
for Education Statistics

**Higher Education General  
Information Survey (HEGIS),  
Fall Enrollment in Institutions  
of Higher Education;** beginning  
1986, **Integrated Postsecondary  
Education Data Survey (IPEDS),  
Fall Enrollment**

*Universe, Frequency, and Types of Data:*

Annual survey of all institutions and branches listed in the *Directory* to obtain data on total enrollment by sex, level of enrollment, type of program, racial/ethnic characteristics (every other year prior to 1989, then annually) and attendance status of student, and on first-time students.

*Type of Data Collection Operation:* Complete census.

*Data Collection and Imputation Procedures:*

Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data of similar institutions.

*Estimates of Sampling Error:* Not applicable.

*Other (nonsampling) Errors:* For degree-granting institutions approximately 96.9 percent response rate in fall 1999.

*Sources of Additional Material:* U.S.

Department of Education, National Center for Education Statistics, *Fall Enrollment in Higher Education*, annual.

**Higher Education General  
Information Survey (HEGIS),  
Financial Statistics of Institutions  
of Higher Education;** beginning  
1986, **Integrated Postsecondary  
Education Data Survey (IPEDS),  
Finance**

*Universe, Frequency, and Types of Data:*

Annual survey of all institutions and branches listed in the *Education Directory*, *Colleges and Universities* to obtain data on financial status and operations, including current funds revenues, current funds expenditures, and physical plant assets.

*Type of Data Collection Operation:* Complete census.

*Data Collection and Imputation Procedures:* Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data of similar institutions.

*Estimates of Sampling Error:* Not applicable.

*Other (nonsampling) Errors:* For 1997, 95 percent for degree-granting institutions.

*Sources of Additional Material:* U.S.

Department of Education, National Center for Education Statistics, *Financial Statistics*.

**Higher Education General  
Information Survey (HEGIS),  
Degrees and Other Formal  
Awards Conferred.** Beginning  
1986, **Integrated Postsecondary  
Education Data Survey (IPEDS),  
Completions**

*Universe, Frequency, and Types of Data:*

Annual survey of all institutions and branches listed in the *Education Directory*, *Colleges and Universities* to obtain data on earned degrees and other formal awards, conferred by field of study, level of degree, sex, and by racial/ethnic characteristics (every other year prior to 1989, then annually).

*Type of Data Collection Operation:* Complete census.

*Data Collection and Imputation Procedures:*

Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data of similar institutions.

*Estimates of Sampling Error:* Not applicable.

*Other (nonsampling) Errors:* For 1999-2000, approximately 84.4 percent response rate for degree-granting institutions.

*Sources of Additional Material:* U.S.

Department of Education, National Center for Education Statistics, *Completions*, annual.

## U.S. ENERGY INFORMATION ADMINISTRATION

### Residential Energy Consumption Survey

*Universe, Frequency, and Types of Data:* Quadriennial survey of households and fuel suppliers. Data are obtained on energy-related household characteristics, housing unit characteristics, use of fuels, and energy consumption and expenditures by fuel type.

*Type of Data Collection Operation:* Probability sample of 5,900 eligible units in 116 PSUs. For responding units, fuel consumption and expenditure data obtained from fuel suppliers to those households.

*Data Collection and Imputation Procedures:* Personal interviews. Extensive followup of nonrespondents including mail questionnaires for some households. Adjustments for nonrespondents were made in weighting for respondents. Most item nonresponses were imputed.

*Estimates of Sampling Error:* Estimated CVs for household averages: For consumption, 1.3 percent; for expenditures, 1.0 percent; for various fuels, values ranged from 2.0 percent for electricity to 7.0 percent for LPG.

*Other (nonsampling) Errors:* Household response rate of 81.0 percent. Nonconsumption data were mostly imputed for mail respondents (2.5 percent of eligible units). Usable responses from fuel suppliers for various fuels ranged from 80.7 percent for electricity to 56.6 percent for fuel oil.

*Sources of Additional Material:* U.S. Energy Information Administration, *A look at Residential Energy Consumption in 1997*.

## U.S. NATIONAL CENTER FOR HEALTH STATISTICS (NCHS)

### National Vital Statistics System

*Universe, Frequency, and Types of Data:* Annual data on births and deaths in the United States.

*Type of Data Collection Operation:* Mortality data based on complete file of death records, except 1972, based on 50 percent sample. Natality statistics 1951-71,

based on 50 percent sample of birth certificates, except a 20 percent to 50 percent in 1967, received by NCHS.

Beginning 1972, data from some states received through Vital Statistics Cooperative Program (VSCP) and complete file used; data from other states based on 50 percent sample. Beginning 1986, all reporting areas participated in the VSCP.

*Data Collection and Imputation Procedures:* Reports based on records from registration offices of all states, District of Columbia, New York City, Puerto Rico, Virgin Islands, Guam, American Samoa, and Northern Marianas.

*Estimates of Sampling Error:* For recent years, CVs for births are small due to large portion of total file in sample (except for very small estimated totals).

*Other (nonsampling) Errors:* Data on births and deaths believed to be at least 99 percent complete.

*Sources of Additional Material:* U.S. National Center for Health Statistics, *Vital Statistics of the United States*, Vol. I and Vol. II, annual, and *National Vital Statistics Report*.

### National Health Interview Survey (NHIS)

*Universe, Frequency, and Types of Data:* Continuous data collection covering the civilian noninstitutional population to obtain information on personal and demographic characteristics, illnesses, injuries, impairments, and other health topics.

*Type of Data Collection Operation:* Multistage probability sample of 49,000 households (in 198 PSUs) from 1985 to 1994; 43,000 households (358 design PSUs) from 1995 on, selected in groups of about four adjacent households.

*Data Collection and Imputation Procedures:* Some missing data items (e.g., race, ethnicity) are imputed using a hot deck imputation value. Unit nonresponse is compensated for by an adjustment to the survey weights.

*Estimates of Sampling Error:* Estimates of Standard Error (SE): For 1997 medically attended injury or poisoning episodes rates in the past 12 months by falling for: females 47.70 (2.37), and males 36.92 (2.06) per 1,000 population; for

1997 injury episodes rates during the past 12 months inside the home - 29.38 (1.28) per 1,000 population.

*Other (nonsampling) Errors:* The response rate was 93.8 percent in 1996; in 1999, the total household response rate was 87.6 percent, with the final family response rate of 86.1 percent, and the final sample adult response rate of 69.6 percent; in 2000, the total household response rate was 88.9 percent, with the final family response rate of 72.1 percent, and the final sample adult response rate was 72.1 percent for the NHIS. (Note: The NHIS sample redesign was conducted in 1995, and the NHIS questionnaire was redesigned in 1997.)

*Sources of Additional Material:* U.S. National Center for Health Statistics, Summary Health Statistics for U.S. Children: National Health Interview Survey, 1997, Vital and Health Statistics, Series 10 #203; U.S. National Center for Health Statistics, Summary Health Statistics for the U.S. Population: National Health Interview Survey, 1997, Vital and Health Statistics, Series 10 #204; U.S. National Center for Health Statistics, Summary Health Statistics for U.S. Adults: National Health Interview Survey, 1997, Vital and Health Statistics, Series 10 #205 (In preparation); U.S. National Center for Health Statistics, Design and Estimation for the National Health Interview Survey, 1995-2004, Vital and Health Statistics, Series 2 #130; U.S. National Center for Health Statistics, Summary Health Statistics Technical Report: National Health Interview Survey, 1997-2003, Vital and Statistics, Series 2 #134.

addresses from the 1980 census, supplemented by new construction permits and an area sample where permits are not required.

*Data Collection and Imputation Procedures:* Interviews are conducted every 6 months for 3 years for each household in the sample; 8,300 households are interviewed monthly. Personal interviews are used in the first interview; the intervening interviews are conducted by telephone whenever possible.

*Estimates of Sampling Error:* CVs averaged over the period 1998-2001 are: "3.7 percent for personal crimes (includes all crimes of violence plus purse snatching crimes), 3.8 percent for crimes of violence; 12.1 percent for estimate of rape/sexual assault counts; 7.9 percent for robbery counts; 4.1 percent for assault counts; 11.2 percent for purse snatching (it refers to purse snatching and pocket picking); 2.5 percent for property crimes; 3.8 percent for burglary counts; 2.7 percent for theft (of property); and 5.2 percent for motor vehicle theft counts.

*Other (nonsampling) Errors:* Respondent recall errors which may include reporting incidents for other than the reference period; interviewer coding and processing errors; and possible mistaken reporting or classifying of events. Adjustment is made for a household noninterview rate of about 7 percent and for a within-household noninterview rate of 10 percent.

*Sources of Additional Material:* U.S. Bureau of Justice Statistics, *Criminal Victimization in the United States*, annual.

## U.S. BUREAU OF JUSTICE STATISTICS (BJS)

### National Crime Victimization Survey

*Universe, Frequency, and Types of Data:* Monthly survey of individuals and households in the United States to obtain data on criminal victimization of those units for compilation of annual estimates.

*Type of Data Collection Operation:* National probability sample survey of about 50,000 interviewed households in 376 PSUs selected from a list of

## U.S. FEDERAL BUREAU OF INVESTIGATION

### Uniform Crime Reporting (UCR) Program

*Universe, Frequency, and Types of Data:* Monthly reports on the number of criminal offenses that become known to law enforcement agencies. Data are collected on crimes cleared by arrest, by age, sex, and race of offender, and on assaults on law enforcement officers.

*Type of Data Collection Operation:* Crime statistics are based on reports of crime data submitted either directly to the FBI

by contributing law enforcement agencies or through cooperating state UCR programs.

*Data Collection and Imputation Procedures:* States with UCR programs collect data directly from individual law enforcement agencies and forward reports, prepared in accordance with UCR standards, to FBI. Accuracy and consistency edits are performed by FBI.

*Estimates of Sampling Error:* Not applicable.

*Other (nonsampling) Errors:* Coverage of 94 percent of the population (96 percent in MSA's, 87 percent in "other cities," and 88 percent in rural areas) by UCR program, though varying number of agencies report. Some error may be present through incorrect reporting.

*Sources of Additional Material:* U.S. Federal Bureau of Investigation, *Crime in the United States, Hate Crime Statistics*, annual, *Law Enforcement Officers Killed & Assaulted*, annual.

## U.S. BUREAU OF LABOR STATISTICS

### U.S. Census Bureau, Current Population Survey (CPS)

*Universe, Frequency, and Types of Data:* Nationwide monthly sample survey of civilian noninstitutional population, 15 years old or over, to obtain data on employment, unemployment, and a number of other characteristics.

*Type of Data Collection Operation:* Multi-stage probability sample of about 50,000 households in 754 PSUs in 1996, expanded to about 60,000 households in July 2001. Over-sampling in some states and the largest MSA's to improve reliability for those areas of employment data on annual average basis. A continual sample rotation system is used. Households are in sample 4 months, out for 8 months, and in for 4 more. Month-to-month overlap is 75 percent; year-to-year overlap is 50 percent.

*Data Collection and Imputation Procedures:* For first and fifth months that a household is in sample, personal interviews; other months, approximately, 85 percent of the data collected by phone. Imputation is done for both item and total nonresponse. Adjustment for total nonresponse is done by a predefined

cluster of units, by MSA size and residence; for item nonresponse imputation varies by subject matter.

*Estimates of Sampling Error:* Estimated CVs on national annual averages for labor force, total employment, and nonagricultural employment, 0.2 percent; for total unemployment and agricultural employment, 1.0 percent to 2.5 percent. The estimated CVs for family income and poverty rate for all persons in 1986 are 0.5 percent and 1.5 percent, respectively. CVs for subnational areas, such as states, would be larger and would vary by area.

*Other (nonsampling) Errors:* Estimates of response bias on unemployment are not available, but estimates of unemployment are usually 5 percent to 9 percent lower than estimates from reinterviews. About 7.5 percent of sample households unavailable for interviews.

*Sources of Additional Material:* U.S. Census Bureau and Bureau of Labor Statistics, *Current Population Survey; Design and Methodology*, (Tech. Paper 63 RV), available on Internet <[www.bls.census.gov/cps/tp/tp63.htm](http://www.bls.census.gov/cps/tp/tp63.htm)> and Bureau of Labor Statistics, *Employment and Earnings*, monthly, Explanatory Notes and Estimates of Error, Tables 1-A through 1-D and *BLS Handbook of Methods*, Chapter 1 (Bulletin 2490).

### Consumer Price Index (CPI)

*Universe, Frequency, and Types of Data:* Monthly survey of price changes of all types of consumer goods and services purchased by urban wage earners and clerical workers prior to 1978, and urban consumers thereafter. Both indexes continue to be published.

*Type of Data Collection Operation:* Prior to 1978, sample of various consumer items in 87 urban areas; thereafter, in 85 PSUs, except from January 1987 through March 1988, when 91 areas were sampled.

*Data Collection and Imputation Procedures:* Prices of consumer items are obtained from about 50,000 housing units, and 23,000 other reporters in 87 areas. Prices of food, fuel, and a few other items are obtained monthly; prices of most other commodities and services

are collected every month in the three largest geographic areas and every other month in others.

*Estimates of Sampling Error:* Estimates of standard errors are available.

*Other (nonsampling) Errors:* Errors result from inaccurate reporting, difficulties in defining concepts and their operational implementation, and introduction of product quality changes and new products.

*Sources of Additional Material:* U.S. Bureau of Labor Statistics, Internet site <<http://www.stats.bls.gov/cpihome.htm>> and *BLS Handbook of Methods*, Chapter 17, Bulletin 2490. U.S. Bureau of Labor Statistics Internet sites <<http://www.bls.gov/ppi>>.

## Producer Price Index (PPI)

*Universe, Frequency, and Types of Data:* Monthly survey of producing companies to determine price changes of all commodities produced in the United States for sale in commercial transactions. Data on agriculture, forestry, fishing, manufacturing, mining, gas, electricity, public utilities, and a few services.

*Type of Data Collection Operation:* Probability sample of approximately 30,000 establishments that result in about 100,000 price quotations per month.

*Data Collection and Imputation Procedures:* Data are collected by mail and facsimile. If transaction prices are not supplied, list prices are used. Some prices are obtained from trade publications, organized exchanges, and government agencies. To calculate index, price changes are multiplied by their relative weights taken from 1997 shipment values from the Census of Manufactures.

*Estimates of Sampling Error:* Not applicable.

*Other (nonsampling) Errors:* Not available at present.

*Sources of Additional Material:* U.S. Bureau of Labor Statistics, *BLS Handbook of Methods*, Chapter 14, Bulletin 2490. U.S. Bureau of Labor Statistics Internet sites <<http://www.bls.gov/ppi>>.

## Current Employment Statistics (CES) Program

*Universe, Frequency, and Types of Data:* Monthly survey covering about 7 million establishments to obtain data on employment, hours, and earnings, by industry.

*Type of Data Collection Operation:* Sample survey of over 300,000 establishments in June 2002.

*Data Collection and Imputation Procedures:* Cooperating state agencies mail questionnaires to sample establishments to develop state and local estimates; information is forwarded to BLS where national estimates are prepared.

*Estimates of Sampling Error:* Not available until survey redesign is completed.

*Other (nonsampling) Errors:* Estimates of employment adjusted annually to reflect complete universe. Average adjustment is 0.3 percent over the last decade.

*Sources of Additional Material:* U.S. Bureau of Labor Statistics, *Employment and Earnings*, monthly, Explanatory Notes and Estimates of Error, Tables 2-A through 2-H.

## National Compensation Survey

*Universe, Frequency, and Types of Data:* Nationwide sample survey of establishments of all employment size classes, stratified by geographic area, in private industry and state and local government. Data collected include wages and salaries, employer costs of employer compensation, and employee benefits. Data produced include percent changes in the cost of employment cited in the ECI and costs per hour worked for individual benefits cited in the ECEC. The survey provides data by ownership (Private industry and state and local government), industry sector, major industry divisions, major occupational groups, bargaining status, metropolitan area status, and census region. ECEC also provides data by establishment size class.

*Type of Data Collection Operation:* Probability proportionate to size sample of establishments. The sample is replaced on a continual basis. Establishments are

in the survey for approximately 5 years, with some establishments replaced each quarter.

*Data Collection and Imputation Procedures:* For the initial visit, data are primarily collected in a personal visit to the establishment. Quarterly updates are obtained primarily by mail, fax, and telephone. Imputation is done for individual benefits.

*Estimates of Sampling Error:* Because standard errors vary from quarter to quarter, the ECI uses a 5-year moving average of standard errors to evaluate published series. These standard errors are available at <<http://www.bls.gov/ncs/ect/home.htm>>.

*Other (nonsampling) Errors:* Nonsampling errors have a number of potential sources. The primary sources are (1) survey nonresponse and (2) data collection and processing errors. Nonsampling errors are not measured. Procedures have been implemented for reducing nonsampling errors, however, primarily through quality assurance programs. These programs include the use of data collection reinterviews, observed interviews, computer edits of the data, and systematic professional review of the reports on which the data are recorded. The programs also serve as a training device to provide feedback to the field economists, or data collectors, on errors. And, they provide information on the sources of error which can be remedied by improved collection instructions or computer processing edits. Extensive training of field economists is also conducted to maintain high standards in data collection.

*Sources of Additional Material:* Bureau of Labor Statistics, *BLS Handbook of Methods*, Chapter 8 (Bulletin 2490) and <<http://www.bls.gov/ncs>>.

## BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

### Survey of Consumer Finances

*Universe, Frequency, and Types of Data:* Periodic sample survey of families. In this survey a given household is divided into a primary economic unit and other

economic units. The primary economic unit, which may be a single individual, is generally chosen as the unit that contains the person who either holds the title to the home or is the first person listed on the lease. The primary unit is used as the reference family. The survey collects detailed data on the composition of family balance sheets, the terms of loans, and relationships with financial institutions. It also gathered information on the employment history and pension rights of the survey respondent and the spouse or partner of the respondent.

*Type of Data Collection Operation:* The survey employs a two-part strategy for sampling families. Some families were selected by standard multistage area-probability sampling methods from the 48 contiguous states. The remaining families in the survey were selected using tax data under the strict rules governing confidentiality and the rights of potential respondents to refuse participation.

*Data Collection and Imputation Procedures:* The Survey Research Center at the University of Michigan collected the 1989 survey data between August 1989 and March 1990. Adjustments for nonresponse errors are made through systematic imputation of unanswered questions and through weighting adjustments based on data used in the sample design for families that refused participation.

*Estimates of Sampling Error:* Because of the complex design of the survey, the estimation of potential sampling errors is not straightforward.

*Other (nonsampling) Errors:* The achieved sample of 3,143 families represents a response rate of about 69 percent in the area-probability sample and a rate of about 34 percent in the tax-data sample. Proper training of interviewers and careful design of questionnaires were used to control inaccurate survey responses.

*Sources of Additional Material:* Board of Governors of the Federal Reserve System, "Changes in Family Finances from 1983 to 1989: Evidence from the Survey of Consumer Finances," *Federal Reserve Bulletin*, January 1992.

## Statistics of Income, Individual Income Tax Returns

### *Universe, Frequency, and Types of Data:*

Annual study of unaudited individual income tax returns, forms 1040, 1040A, and 1040EZ, filed by U.S. citizens and residents. Data provided on various financial characteristics by size of adjusted gross income, marital status, and by taxable and nontaxable returns. Data by state, based on 100 percent file, also include returns from 1040NR, filed by nonresident aliens plus certain self-employment tax returns.

*Type of Data Collection Operation:* Annual 1999 stratified probability sample of approximately 177,000 returns broken into sample strata based on the larger of total income or total loss amounts as well as the size of business plus farm receipts. Sampling rates for sample strata varied from 0.05 percent to 100 percent.

*Data Collection and Imputation Procedures:* Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

*Estimates of Sampling Error:* Estimated CVs for tax year 1999: Adjusted gross income less deficit 0.11 percent; salaries and wages 0.21 percent; and tax-exempt interest received 1.78 percent. (State data not subject to sampling error.)

*Other (nonsampling) Errors:* Processing errors and errors arising from the use of tolerance checks for the data.

*Sources of Additional Material:* U.S. Internal Revenue Service, *Statistics of Income, Individual Income Tax Returns*, annual.

## Statistics of Income, Sole Proprietorship Returns and Statistics of Income Bulletin

### *Universe, Frequency, and Types of Data:*

Annual study of unaudited income tax returns of nonfarm sole proprietorships, form 1040 with business schedules. Data provided on various financial characteristics by industry.

*Type of Data Collection Operation:* Stratified probability sample of approximately 51,000 sole proprietorships for tax year 1999. The sample is classified based on presence or absence of certain business schedules; the larger of total income or loss; and size of business plus farm receipts. Sampling rates vary from 0.05 percent to 100 percent.

*Data Collection and Imputation Procedures:* Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

*Estimates of Sampling Error:* Estimated CVs for tax year 1999 are available. For sole proprietorships, business receipts, 0.71 percent; net income, (less loss), 1.05 percent; depreciation 1.42 percent.

*Other (nonsampling) Errors:* Processing errors and errors arising from the use of tolerance checks for the data.

*Sources of Additional Material:* U.S. Internal Revenue Service, *Statistics of Income, Sole Proprietorship Returns* (for years through 1980) and *Statistics of Income Bulletin*, Vol. 21, No. 1 (summer 2001).

## Statistics of Income, Partnership Returns and Statistics of Income Bulletin

### *Universe, Frequency, and Types of Data:*

Annual study of unaudited income tax returns of partnerships, Form 1065. Data provided on various financial characteristics by industry.

*Type of Data Collection Operation:* Stratified probability sample of approximately 43,000 partnership returns from a population of 2.0 million filed during calendar year 1999. The sample is classified based on combinations of gross receipts, net income or loss, and total assets, and on industry. Sampling rates vary from 0.08 percent to 100 percent.

*Data Collection and Imputation Procedures:* Computer selection of sample of tax return records. Data are adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return. Data not available due to regulations are not imputed.

*Estimates of Sampling Error:* Estimated CVs for tax year 1999 (latest available): For number of partnerships, 0.3 percent; business receipts, 0.2 percent; net income, 0.5 percent; net loss, 1.6 percent.

*Other (nonsampling) Errors:* Processing errors and errors arising from the use of tolerance checks for the data.

*Sources of Additional Material:* U.S. Internal Revenue Service, *Statistics of Income, Partnership Returns and Statistics of Income Bulletin*, Vol. 21, No. 2 (fall 2001).

## Corporation Income Tax Returns

*Universe, Frequency, and Types of Data:* Annual study of unaudited corporation income tax returns, Forms 1120 and 1120 (A, F, L, PC, REIT, RIC, and S), filed by corporations or businesses legally defined as corporations. Data provided on various financial characteristics by industry and size of total assets, and business receipts.

*Type of Data Collection Operation:* Stratified probability sample of approximately 141,400 returns for 1999, distributed by sample classes generally based on type of return, size of total assets, size of net income or deficit, and selected business activity. Sampling rates for sample strata varied from .25 percent to 100 percent.

*Data Collection and Imputation Procedures:* Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return and to achieve statistical definitions.

*Estimates of Sampling Error:* Estimated CVs for 1999: Number of returns in subgroups ranged from 0.2 percent with assets under \$100,000, to 0 percent with assets over \$100 mil.; for amount of net income 0.22 percent.

*Other (nonsampling) Errors:* Processing errors and errors arising from the use of tolerance checks for the data.

*Sources of Additional Material:* U.S. Internal Revenue Service, *Statistics of Income, Corporation Income Tax Returns*, annual.

## U.S. SOCIAL SECURITY ADMINISTRATION

### Benefit Data

*Universe, Frequency, and Types of Data:*

All persons receiving monthly benefits under Title II of Social Security Act. Data on number and amount of benefits paid by type and state.

*Type of Data Collection Operation:* Data based on administrative records. Data based on 100 percent files, as well as 10 percent and 1 percent sample files.

*Data Collection and Imputation Procedures:* Records used consist of actions pursuant to applications dated by subsequent post-entitlement actions.

*Estimates of Sampling Error:* Varies by size of estimate and sample file size.

*Other (nonsampling) Errors:* Processing errors, which are believed to be small.

*Sources of Additional Material:* U.S. Social Security Administration, *Annual Statistical Supplement to the Social Security Bulletin*.

### Supplemental Security Income (SSI) Program

*Universe, Frequency, and Types of Data:*

All eligible aged, blind, or disabled persons receiving SSI benefit payments under SSI program. Data include number of persons receiving federally administered SSI, amounts paid, and state administered supplementation.

*Type of Data Collection Operation:* Data based on administrative records.

*Data Collection and Imputation Procedures:* Data adjusted to reflect returned checks and overpayment refunds. For federally administered payments, actual adjusted amounts are used.

*Estimates of Sampling Error:* Not applicable.

*Other (nonsampling) Errors:* Processing errors, which are believed to be small.

*Sources of Additional Material:* U.S. Social Security Administration, *Annual Statistical Supplement to the Social Security Bulletin*.

## Tables Deleted From the 2001 Edition of the Statistical Abstract

2001  
number

### Sec. 1. **POPULATION**

- 14 Resident Population by Race, 1980 to 2000, and Projections, 2005 to 2050
- 21 Resident by Sex, Age, and State: 2000
- 25 Annual Immigration, Outmigration, and Net Migration for Regions: 1990 to 1999
- 43 Native and Foreign-Born Populations by Age, Sex, Race, and Hispanic Origin: 1990 to 1999
- 46 Population by Selected Ancestry Group and Region: 1990
- 47 Persons 5 Years Old and Over Speaking a Language Other Than English at Home by Language: 1990

### Sec. 2. **VITAL STATISTICS**

- 86 Numbers and Rates of Pregnancies, Live Births, Induced Abortions, and Fetal Losses for Teenagers by Age, Race, and Hispanic Origin: 1996
- 88 Women 15-44 Years of Age Who Have Ever Had a Live Birth and Use of Maternity Leave for the Most Recent Birth: 1995
- 95 Average Lifetime in Years by Race by State: 1989-91
- 100 Death Rates by Age, Sex, and Race: 1970 to 1998
- 103 Infant Deaths and Infant Mortality Rates by Cause of Death: 1980 to 1998
- 106 Age-Adjusted Death Rates by Selected Causes: 1990 to 1998
- 113 Death Rates from Accidents and Violence by Race and Sex: 1990 to 1998
- 114 Deaths and Death Rates from Accidents by Type: 1980 to 1998
- 115 Homicide Rates by Race, Sex, and Age: 1997 and 1998
- 117 Marriages and Divorces: 1970 to 1998

### Sec. 3. **HEALTH AND NUTRITION**

- 134 Medicare—Persons Served and Reimbursements: 1990 to 1998
- 146 Percent of Private Establishments Offering Health Insurance and Employees Enrolled: 1998
- 185 Disability Status of Children Under 15 Years Old: 1997
- 186 Disability Status of Persons 15 Years Old and Over: 1997
- 187 Receipt of Personal Assistance by Persons With Disabilities: 1997
- 200 Healthy Eating Indexes by Selected Food Groups and Dietary Guidelines: 1996

### Sec. 4. **EDUCATION**

- 230 Public Elementary and Secondary School Building Conditions: 1999
- 247 Student Use of Computers at School: 1984 to 1997
- 267 Postsecondary Institutions Offering Distance Education: 1997-98
- 275 Finances of Public Colleges, 1990 to 1997, and by State, 1998
- 277 Student Borrowing Status for Higher Education: 1997

### Sec. 5. **LAW ENFORCEMENT, COURTS, AND PRISONS**

- 307 Nonfatal Violent Victimitizations With Injury by Victim Characteristics: Period 1992-98
- 324 U.S. District Courts—Civil Rights-Related Complaints and Disposition: 1990 to 1999

### Sec. 10. **NATIONAL DEFENSE AND VETERANS AFFAIRS**

- 495 Worldwide Military Expenditures in Current and Constant Dollars: 1990 to 1997
- 496 Arms Trade in Constant (1997) Dollars—Selected Countries: 1990 to 1997

## Sec. 12. **LABOR FORCE, EMPLOYMENT, AND EARNINGS**

- 585 Self-Employed Persons With Home-Based Businesses: 1997
- 599 Use of Traditional Methods of Job Searching: 1994 to 1999
- 610 Employers With Selected Work-Based Learning Activities by Establishment Size and Type: 1997
- 611 Adults Taking Work-Related Adult Education Classes: 1995 and 1999
- 614 Workers Using Computers on the Job: 1993 and 1997
- 628 Employee Benefits in Medium and Large Establishments: 1997
- 629 Employee Benefits in Small Establishments: 1996

## Sec. 13. **INCOME, EXPENDITURES, AND WEALTH**

- 664 Household Income Before and After Taxes in Current and Constant (1999) Dollars: 1980 to 1999
- 665 Mean-Taxes Paid and Taxes Paid as a Percentage of Total Mean Before-Tax Income by Type of Tax in Current and Constant (1999) Dollars: 1980 to 1999
- 683 Persons 65 Years Old and Over Below Poverty Level: 1980 to 1999

## Sec. 15. **BUSINESS ENTERPRISES**

- 734 Women-Owned and Minority-Owned Firms by Receipt Size: 1997
- 735 Women-Owned and Minority-Owned Firms With Paid Employees by Employment Size: 1997
- 736 Women-Owned and Minority-Owned Firms by State: 1997
- 737 Business Starts and Employment Associated With Start: 1990 to 1999
- 747 Academic Patenting—Number of U.S. Universities and Colleges With Patent Awards and Number of Academic Patent Awards: 1985 to 1998

## Sec. 19. **ENERGY AND UTILITIES**

- 898 Residential Energy Consumption, Expenditures, and Average Price: 1980 to 1997
- 900 Commercial Buildings—Energy Consumption and Expenditures: 1995

## Sec. **CONSTRUCTION AND HOUSING**

- 953 Housing Inventory for Selected Metropolitan Areas—Summary Characteristics: 1993 to 1999

## Sec. 21. **MANUFACTURES**

- 1015 Firearms Manufacturers—Shipments, Exports, and Imports: 1980 to 1998
- 1016 Selected Industrial Air Pollution Control Equipment—Shipments: 1998

## Sec. 22. **DOMESTIC TRADE**

- 1027 Motor Vehicle Retail Sales: 1980 to 2000
- 1041 U.S. Mail Order Sales by Kind of Business: 1997 and 1998
- 1042 Catalog Sales—Method Used and Characteristic of Purchaser: 2000
- 1043 Merchandise or Services Ordered by Mail or Phone by Characteristic of Purchaser: 2000
- 1044 Population Ordering by Catalog by Type of Product and Characteristic of Purchaser: 2000

## Sec. 23. **TRANSPORTATION**

- 1067 Civil Flying—Summary: 1970 to 1997
- 1088 Recreational Vehicles—Number and Retail Value of Shipments: 1980 to 1997

## Sec. 24. **INFORMATION AND COMMUNICATIONS**

- 1156 Use of Home Computers: 1997

Sec. 25. **BANKING, FINANCE, AND INSURANCE**

- 1170 Percent Distribution of Amount of Debt Held by Families: 1995 and 1998
- 1171 Ratios of Debt Payments to Family Income: 1992 to 1998
- 1181 Insured Commercial Banks by State and Other Area: 2000

Sec. 30. **COMPARATIVE INTERNATIONAL STATISTICS**

- 1331 Percent of Births to Unmarried Women for Selected Countries: 1980 and 1998
- 1360 Per Capita Consumption of Meat and Poultry: 2000
- 1376 Information and Communication Technology (ICT) Sector - Value Added by Country: 1997
- 1377 Information and Communication Technology (ICT) Sector—Research and Development (R&D) Expenditures by Country: 1997
- 1390 Foreign Direct Investment Flows in OECD Countries: 1997 to 1999
- 1391 Military Expenditures and Armed Forces Personnel by Country: 1990 and 1997

# Appendix VI

## New Tables

Table number		Page number
	<b>Sec. 1. POPULATION</b> .....	<b>1</b>
14	Resident Population by Race, Hispanic Origin, and Single Years of Age: 2001 . . .	16 & 17
20	Resident Population—Components of Change for States: 2000-2001 .....	24
42	Foreign-Stock Population by Nativity and Parentage: 1960 to 2000 .....	45
49	Unmarried-Partner Households by Sex of Partners: 2000 .....	48
61	Population in Group Quarters by Sex, Age, and Group Quarters Type: 2000 .....	54
	<b>Sec. 2. VITAL STATISTICS</b> .....	<b>57</b>
95	Death Rates by Age: 1940 to 2000 .....	75
96	Age-Adjusted Death Rates by Race and Sex: 1940 to 2000 .....	76
101	Deaths, Death Rates by Selected Causes: 1999 and 2000 .....	80
106	Death Rates From Cerebrovascular Diseases by Race, Sex and Age: 1950 to 1999 .....	84
107	Death Rates From Malignant Neoplasms, by Race, Sex, and Age: 1950 to 1999 ..	85
108	Death Rates From Suicide, by Sex and Race: 1950 to 1999 .....	86
109	Death Rates From Human Immunodeficiency Virus (HIV) Disease by Race, Sex and Age: 1990 to 1999 .....	86
	<b>Sec. 3. HEALTH AND NUTRITION</b> .....	<b>89</b>
134	State Children's Health Insurance Program-Enrollment by State: 1999 to 2001 . . .	101
140	Medical Care Benefits of Workers by Amount and Type of Employee Contribution: 1999 .....	103
179	Persons With Limitation of Activity Caused by Chronic Conditions: 1997 and 1999 .....	121
180	Persons 65 Years Old and Over With Limitation of Activity Caused by Chronic Conditions: 1997 to 1999 .....	121
194	Sources of Calcium, Iron, and Cholesterol in the U.S. Food Supply: 1970 and 1999 .....	128
	<b>Sec. 4. EDUCATION</b> .....	<b>131</b>
223	Students Who Are Homeschooled, Selected Characteristics: 1999 .....	147
240	Children's Access to Home Computer and Use of the Internet at Home: 2000 . . .	157
265	Undergraduates in Postsecondary Institutions Owning Credit Cards and Balance Due: 1999-2000 .....	170
267	Undergraduates in Postsecondary Institutions Taking Distance Education Courses: 1999-2000 .....	171
	<b>Sec. 5. LAW ENFORCEMENT, COURTS, AND PRISONS</b> .....	<b>179</b>
307	Firearm Use by Offenders: 1997 .....	194
317	Per Capita Justice Expenditure and Employment of State and Local Governments by State: 1999 .....	199
	<b>Sec. 9. FEDERAL GOVERNMENT FINANCES AND EMPLOYMENT</b> .....	<b>303</b>
481	Federal Agencies Employing 500 or More Full-Time Officers With Authority to Carry Firearms and Make Arrests-Number of Officers: 1993 to 2000 .....	323
483	Federally Owned Property in the United States by State: 2000 .....	324

Table number		Page number

# County and City Data Book: 2000

**The Official and Original source of local area data since the 1940s**

---

## Featuring:

- Results of the 2000 Census of Population and Housing.
  - 1997 Economic Census results.
  - Approximately 200 data items for all states and counties.
  - Approximately 100 items for cities with population of 25,000 or more.
  - Eleven items for places and MCDs\* with population of 2,500 or more.
  - Metropolitan areas and their component counties with Census 2000 population.
  - State maps showing all counties, places of 25,000 or more population, and metropolitan areas.
- 

**Provides the data for making informed decisions about our nation and its activities.**

Adobe Acrobat version available on the Internet—

### Printed Products

**Statistical Abstract of the United States: 2002.** Since 1878, the authoritative summary of statistics on the social, political, and economic organization of the United States. Includes a representative selection of statistics widely used by public officials, business analysts, educators, librarians, research workers, and students.

**County and City Data Book: 2000.** The latest in a series of publications that contains data for all counties and cities with a population of 25,000 or more. It also includes 2000 census population data for places of 2,500 or more inhabitants. Also included is a complete set of state maps showing all counties, places of 25,000 or more, and metropolitan areas. GPO price: \$68; GPO stock number: 003-024-08862-2. NTIS price: \$65 plus handling fee; NTIS stock number PB2002-101674.

**State and Metropolitan Area Data Book: 1997-98.** This volume, the fifth in a series, presents a vast array of demographic and economic data for the

United States, the 50 states and the District of Columbia; metropolitan areas (MAs); also includes selected data for component counties of MAs and population data for central cities of MAs. GPO price: \$24; GPO stock number: 003-024-08827-4. NTIS price: \$22.50 plus handling fee; NTIS stock number: PB98-124407.

**GPO orders** may be mailed to: Superintendent of Documents, Government Printing Office (GPO), P.O. Box 371954, Pittsburgh, PA 15250-7954. Payment must accompany order. Telephone: 202-512-1800 or 1-866-512-1800. Fax: 202-512-2250. Publications also available in GPO bookstores located in major cities.

**NTIS orders** may be mailed to: National Technical Information Service (NTIS), U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161. Payment must accompany order. Telephone: 703-605-6000 or 1-800-553-6847. Fax: 703-605-6900.

### Electronic Products

**Statistical Abstract: 2001 on CD-ROM.** Contains more than 1,400 tables found in the printed version, contains Adobe Acrobat software with hyperlinks to Lotus and Excel worksheets and to the Internet. Price: \$50. Available winter 2002.

**County and City Data Book: 2000 on CD-ROM.** Provides data from major tables in this book for the United States, states, counties and equivalent areas, cities of 25,000 or more inhabitants, and places of 2,500 or more inhabitants. Price: \$50.

**State and Metropolitan Area Data Book: 1997-98 on CD-ROM.** Contains tables covering state and metropolitan area data found in the printed version of this product, contains Adobe Acrobat software with hyperlinks to Lotus and Excel worksheets and government Internet sites. Price: \$50.

**USA Counties: 1998 on CD-ROM.** Contains over 5,000 data items for the United States, states, and counties and equivalent areas from a variety of sources. Includes 1997 population estimates and over 500 items from the 1990 Census of Population and Housing, as well as data from the 1980 census and the 1992, 1987, 1982, and 1977 economic censuses. Major noncensus sources include the Bureau of Economic Analysis, Bureau of Labor Statistics, and Federal Bureau of Investigation. In database files with Windows software. Price: \$50.

**Electronic product orders** may be mailed to: U.S. Department of Commerce, U.S. Census Bureau, P.O. Box 277943, Atlanta, GA 30384-7943. Payment must accompany order. To order or obtain more information, call 301-763-4636. To fax orders, dial 1-888-249-7295; for fax inquiries, call 301-457-4714.
